Greening Society P.J. Driessen, P. Glasbergen, 2013-04-17 This book can be regarded as a monograph on the debates and developments in Dutch environmental policy It has been written with a specific perspective in mind First and foremost the line of approach we have taken was from a multidisciplinary social science point of view The trend in environmental policy is looked at from the angle of sociology policy studies and political science Secondly all analyses depart from the paradigm shift concept This particular paradigm shift is based on the fact that a radical change has taken shape over the years in the way environmental issues are handled Previously environmental policy had always been characterised by a top down approach in which government determined the actual objectives of policy and assumed that it could win over business non governmental organisations and citizens to act in line with those objectives There was also a great deal of faith in the technical solutions to environmental issues Today's environmental policy is based on a totally different philosophy Environmental objectives are now reached in association with business non governmental organisations and citizens These actors are also involved in bringing environmental policy into practice In other words the implementation of policy has a more interactive nature New relationships emerge between government the market and civil society and policy discourses also become integrated The environmental interest is more often weighed against the economic interests the spatial development and against social justice

Environmental Leaders and Laggards in Europe Tanja A. Börzel, 2017-05-15 No other European laws are so frequently violated as environmental directives This informative and illuminating volume explains why member states have repeatedly failed to comply with European Environmental Law It challenges the assumption that non compliance is merely a southern problem By critically comparing and analyzing Spain and Germany the volume demonstrates that both northern leaders and southern laggards face compliance problems if a European policy is not compatible with domestic regulatory structures The North South divide is therefore much more complex than previously thought Examining each country's capabilities of shaping European policies according to its environmental concerns and economic interests the book debates the possible outcomes if the European Union does not come to terms with the leader laggards dynamics in environmental policy making It will be a prime resource for anyone concerned with environmental policy making and law particularly within the EU as well as those interested in environmental and political geography
