Sceptres and Sciences in the Spains Ruth Hill, 2000-10-01 *Sceptres and Sciences* argues convincingly that previous research on the Hispanic Late Baroque has underweighted the ideologies of ethnicity and empire embedded in Cartesianism and French neoclassicism. *The Mystical Science of the Soul* Jessica A. Boon, 2012-12-07 *The Mystical Science of the Soul* explores the unexamined influence of medieval discourses of science and spirituality on *recogimiento* the unique Spanish genre of recollection mysticism that served as the driving force behind the principal developments in Golden Age mysticism. Building on recent research in medieval optics physiology and memory in relation to the devotional practices of the late Middle Ages Jessica A Boon probes the implications of an embodied soul for the intellectual history of Spanish mysticism. Boon proposes a fundamental rereading of the key *recogimiento* text *Subida del Monte Si* n 1535-1538 which melds the traditionally distinct spiritual techniques of moral self-examination Passion meditation and negative theology into one cognitively adept path towards mystical union. She is also the first English language scholar to treat the author of this influential work the Renaissance physician Bernardino de Laredo a pivotal figure in the transition from medieval to early modern spirituality on the Iberian peninsula and a source for Teresa of Ávila's mystical language. **Proceedings of the Second Pan American Scientific Congress: (section I) Anthropology.
