

FAMILY HEALTH CARE NURSING

Presented by:
Aanchal Rautela
B.Sc. Nursing 4th year

INTRODUCTION

Family health care nursing is an art and a science that has evolved over the last 20 years as a way of thinking about and working with families. It is the central point of health services. It is important component of "Health for All" goal. Each family has different background, thinking, style, economic, living, customs' etc. Family nursing comprises a philosophy and a way of interacting with clients that affects how nurses collect information, intervenes with patients, advocate for patients, and approach spiritual care with families. This philosophy and practice incorporates the assumption that health affects all members of families that health and illness are family events, and that families influence the process and outcome of health care.
