Primer of Cancer Management Lokich,2012-12-06 Cancer is a general term which applies to a broad spectrum of malignant diseases For most patients the diagnosis of cancer evokes images of intractable pain mutilation and impending death Many of these feelings are derived from distortions of one s experiences with relatives or friends or are based on misconceptions or myths about the disease itself Fortunately technologic and therapeutic advances have created a more optimistic future for the cancer patient Health care teams specializing in oncology are defining and attending to the special needs of cancer patients They are developing cancer management profiles for each patient which involve not only the primary diagnostic and therapeutic aspects of the disease but also its secondary effects on physiologic and psychologic processes The purpose of this primer is to function as a general guide for managing all stages of cancer from the early curable tumor to advanced metastasis Therapy for such patients may require surgery chemotherapy radiation therapy or a combination of modalities including immune therapy This text will focus on cancer care and the role of the staff in the following general areas 1 the communication of the diagnosis and the characteristics of the disease 2 the application of the therapeutic modalities 3 the management of secondary symptoms such as pain and 4 the development of support services such as psychological counseling

Intravenous Therapy Intravenous Nurses Society,1995 This text addresses special areas of IV therapy including oncology and pain management blood and blood components and parenteral nutrition The book also offers calculations required for parenteral therapies and applies IV therapy to a variety of settings including home health care and

long term care in addition it provides therapy principles for care of paediatric and geriatric patients
Nutrition Care of Renal Patients Kerri Lynn Wiggins, 2002
