An even smaller number of startup founders enjoy a truly prosperous exit. He explains the major phases in a technology company's life cycle, helping entrepreneurs avoid common pitfalls and survive crises when they strike. He guides readers from the initial bootstrapping process through venture capital financing and provides valuable advice on how to sell a technology company profitably even in a challenging economic environment. Every chapter presents solutions to real-world issues that could otherwise have fatal consequences for a tech venture. Aspiring tech entrepreneurs will learn to: Set up shop, build the team, assemble necessary startup assets including technology and intellectual property, get legal and financial affairs in order, secure capital, ask for money, nail the term sheet, ask for more money, Get out, know when to sell, who to sell to, and how to make it a happy exit for all stakeholders including the employees.
