consumers While culture is important the author shows that innate evolutionary forces deeply influence the foods we eat the gifts we offer the cosmetics and clothing styles we choose to make ourselves more attractive to potential mates and even the cultural products that stimulate our imaginations such as art music and religion This book demonstrates that most acts of consumption can be mapped onto four key Darwinian drives namely survival we prefer foods high in calories reproduction we use products as sexual signals kin selection we naturally exchange gifts with family members and reciprocal altruism we enjoy offering gifts to close friends The author further highlights the analogous behaviors that exist between human consumers and a wide range of animals
