Red Sun Rising:

Red Sun Rising Allen Lyle, 2025-07-28 A world shattered by the wars of gods A land rebuilt under the watchful eye of the Church of the Divine Inheritance A throne of bones waiting for a ruler strong enough to seize it Ducaine de Bordeaux was never meant to inherit power A bastard son of a disgraced house he should have been forgotten a shadow in the halls of Burjean But war betrayal and blood have a way of rearranging destiny Through cunning and ruthless ambition Ducaine rises from the ashes of his fallen family forging alliances in the dark and setting his sights on something far greater than a mere county Yet the lords of Yuropa do not bow easily The Church watches with wary eyes The kings play their endless games And in the depths of the ruined world something stirs something older than empires older than men To seize power Ducaine must be willing to risk everything His honor His soul His very humanity Because in the end all that matters is this Will he conquer the world before the world consumes him Or is the rise of Ducaine de Bordeaux destined to end in ruin like the countless rulers before him The sun is rising and it burns red

Quest for Decisive Victory Robert M. Citino, 2002-06-17 Since the earliest days of warfare military operations have followed a predictable formula after a decisive battle an army must pursue the enemy and destroy its organization in order to achieve a victorious campaign But by the mid nineteenth century the emergence of massive armies and advanced weaponry and the concomitant decline in the effectiveness of cavalry had diminished the practicality of pursuit producing campaigns that bogged down short of decisive victory Great battles had become curiously indecisive decisive campaigns virtually impossible At the beginning of the twentieth century the inability to achieve decisive victories in warfare had become the single greatest military problem facing modern armies Robert Citino now tells how European military leaders analyzed and eventually overcame this problem by restoring pursuit to its rightful place in combat and resurrecting the possibility of decisive warfare on the operational level Quest for Decisive Victory chronicles the evolution of European warfare during the first half of the twentieth century A study of war at the operational level it demonstrates the interplay and tension between technology and doctrine in warfare and reveals how problems surrounding mobility including such factors as supply lines command and control and prewar campaign planning forced armies to find new ways of fighting Citino focuses on key campaigns of both major and minor conflicts Minor wars before 1914 Boer Russo Japanese and the Balkan Wars of 1912 13 featured instructive examples of operational maneuver the First World War witnessed the collapse of operations and the rise of attrition warfare the Italo Ethiopian and Spanish Civil Wars held some promise for breaking out of stalemate by incorporating such innovations as air and tank warfare Ultimately it was Germany's opening blitzkrieg of World War II that resurrected the decisive campaign as an operational possibility By grafting new technologies tanks aircraft and radio onto a long tradition of maneuver warfare the Wehrmacht won decisive victories in the first year of the war and in the process transformed modern military doctrine Citino's study is important for shifting the focus from military theory and doctrine to detailed operational analyses of actual campaigns that formed the basis for the
