Redesigning Life The Worldwide Challenge To Genetic Engineering:

Redesigning Life? Brian Tokar, 2001-05-04 Genetic engineering technologies are being promoted as keys to a brighter future These writings examine the hidden hazards of the new genetic technologies and reveal the emergence of worldwide resistance to unfettered exploitation State Agency and the Patenting of Life in International Law Bitá Amani, 2016-12-05 How should a state respond to competing international obligations where the patenting of life is concerned Following the institutionalization of Intellectual Property in the world trading system under the Agreement on Trade Related Aspects of Intellectual Property Rights TRIPS states face differing challenges and restraints on their freedom to develop biopatenting programmes Through a comparative review of patenting in two key but diverging jurisdictions Canada and the US this book considers how states might exercise the right of self determination in their domestic law and policy over biopatenting to promote objectives of human welfare and fair competition Departing from existing studies this timely and important volume offers a pragmatic two step approach to state agency to resolve apparent conflicts between the regulatory options afforded by economic globalization and the need to forge domestic laws that reflect community values In this approach rich and poor countries alike are invited to assert the primacy of human rights in their industrial and cultural policies Disability Through the Life Course Tamar Heller, Sarah Parker Harris, 2012 The SAGE Reference Series on Disability is a cross disciplinary and issues based series incorporating links from varied fields that make up Disability Studies This volume tackles issues relating to disability through the life course *The Suffering Gene* Roy Burdon, 2003-05 Cancer kills one man out of every two and one woman out of three in the industrialized countries today And its incidence despite all efforts to the contrary is increasing at one per cent a year The fact is that some 80 per cent of cancers are likely to be due to environmental factors that could be reduced or even eradicated This book explains how our genes work and how they are adversely affected by the modern environment in which we live whether in the North or the South The factors include toxic industrial and agricultural chemicals excessive sunlight a result of the hole in the ozone layer nuclear radiation from power plants and the military other forms of radiation mobile phones electricity transmission systems food contaminants atmospheric pollutants tobacco smoke car exhaust fumes and the potential impact of genetic engineering It explains how the body defends itself from external attack what happens when these defences are overwhelmed and the need for much more careful development of new technologies industrial processes products and foodstuffs **Resisting Intellectual Property** Debora J. Halbert, 2006-02-01 Over the past decade the scope of copyright and patent law has grown significantly strengthening property rights even when such rights seem to infringe upon other more basic priorities This book investigates the ways in which activists scholars and communities are resisting the expansion of copyright and patent law in the information age Debora J Halbert explores how an alternative framework for understanding intellectual property including about how we ought to think about the issues the development of social movements around specific issues and civil

disobedience has developed Each chapter in the book discusses how resistance is developing in relation to a particular copyright or patent issue such as access to patented medication access to copyrighted information and music via the Internet the patenting of genetic material This controversial book examines the ways in which the idea of intellectual property is being re thought by the victims of an over expansive legal system It will appeal to students and researchers from a range of disciplines from law and political science to computer science with an interest in intellectual property Food Biotechnology in Ethical Perspective Paul B. Thompson, 2007-05-05 Agrifood biotechnology the genetic transformation of plants and animals through recombinant means has created controversy in the food system for more than twenty years This thoroughly revised and amended edition of Paul B Thompson s path breaking study of ethical and philosophical issues raised by this technology up to date The original 1997 edition was the first book length treatment by a philosopher to focus on food and agricultural biotechnology covering ethical issues associated with risk assessment labelling animal transformation patents and the impact of biotechnology on traditional farming communities in both the developed and developing world The new edition reflects lessons from the hotly contested debates over those issues in the intervening decade and includes wholly new discussions on ethical issues associated with livestock cloning the Precautionary Principle and the transatlantic debate between United States and European perspectives on biotechnology Thompson s unique and insightful approach to addressing the risks and questions of public acceptability associated with novel technology stands as a model for anyone interested in technological innovation and social change The book should be of interest to scholars and citizens interested in the Internet or nanotechnology while it remains an essential resource for understanding the twists and turns of debate over the role of molecular genetics in the transformation of the global food system Biotechnology Steven P. McGiffen, 2005-03-20 Frankenfoods designer babies Dolly the Sheep and Raelian fantasists few subjects generate as much controversy and misinformation as biotechnology This book takes the reader behind the headlines to examine the new laws on genetic based technologies who s making them and why Steven P McGiffen offers a lucid analysis of the real implications of biotechnology legislation in the US and the EU and contrasts it with approaches to agricultural and medical biotech in the rest of the world He argues that the EU and America are removing decision making power from the people and their elected representatives Biotechnology regulation is a local manifestation of a global process of transferring power from the people to corporations from poor countries to rich ones from the public to the private He shows that biotechnology demands effective and democratic international decision making procedures and that we are very far from achieving them This is an indispensable guide for activists and anyone who wants to know more about how to control biotech regulation and how to resist handing control of our future to corporations Frontline Farmers Annette Aurélie Desmarais, 2019-11-13T00:00:00Z Who grows the food we eat How important is it that family farms are viable in Canada today and in the future How do viable family farms help determine the safety diversity and sustainability of Canada s food systems Why is this important to those of

us who do not farm Frontline Farmers introduces readers to the National Farmers Union NFU For over fifty years the NFU has been on the frontlines of our food system From fighting against transnational corporations that seek to control our food system by imposing genetically modified organisms into our food to protecting seeds maintaining orderly marketing saving the prison farms keeping the land in the hands of family farmers farming ecologically and building food sovereignty the NFU has been front and centre of farm and food activism This book collects the voices of NFU members who tell the stories of the key struggles of the progressive farm movement in Canada fighting to build viable rural communities protecting the family farm and creating socially just and ecologically sustainable food systems Frontline Farmers reveals that the stakes for controlling our food in Canada have never been higher The book was made possible with support from the Canada Research Chair Program For an updated corrected list of the protagonists from Frontline Farmers please click here

The Oxford Handbook of Disability History Michael Rembis, Catherine J. Kudlick, Kim Nielsen, 2018-06-19 Disability history exists outside of the institutions healers and treatments it often brings to mind It is a history where disabled people live not just as patients or cure seekers but rather as people living differently in the world and it is also a history that helps define the fundamental concepts of identity community citizenship and normality The Oxford Handbook of Disability History is the first volume of its kind to represent this history and its global scale from ancient Greece to British West Africa The twenty seven articles written by thirty experts from across the field capture the diversity and liveliness of this emerging scholarship Whether discussing disability in modern Chinese cinema or on the American antebellum stage this collection provides new and valuable insights into the rich and varied lives of disabled people across time and place

Sociology in Today's World Brian Furze, Cengage Learning Australia, Pauline Savy, 2014 Sociology in Today's World explores why sociology is important and relevant to everyday life It teaches students how to think sociologically not just what to think and shows how sociology can help us make sense of our lives It comprehensively covers key aspects and current issues in Australian and New Zealand society whilst emphasising the importance of diversity and a global perspective

Encyclopedia of Organic, Sustainable, and Local Food Leslie A. Duram, 2009-11-12 A comprehensive compilation of entries illuminates the key trends activities and themes in organic sustainable and local food covering consumers organizations farming policies and much more The Encyclopedia of Organic Sustainable and Local Food pulls together a fascinating array of diverse interdisciplinary topics to provide a thorough overview of our current alternative food system With increasing attention focused on organic and local food many people are attracted to these sustainable food choices Yet despite its popularity there are misconceptions and a general lack of understanding about organic and local food This encyclopedia illuminates social concerns economic trends policy influences and ecological terms to provide a comprehensive overview Contributions from expert authors from government agencies

research universities and private organizations provide key information on each of these relevant topics Eating is a basic human activity yet many people do not know where their food comes from This book helps readers fill the gap between the trendy and the factual

Our Chemical Selves Dayna Nadine Scott,2015-02-25 Chemicals found in homes schools and workplaces are having devastating consequences on human health and the environment Our Chemical Selves examines the gender dynamics associated with these everyday toxic exposures Written by leading researchers in science law and public policy the chapters in Our Chemical Selves reveal that while exposures to chemicals are pervasive and widespread people from low income racialized and Indigenous communities face a far greater risk of exposure At the same time the risks associated with these exposures and the burdens of managing them rest disproportionately on the shoulders of women This collection hones in on the political economy of pollution by critically examining the system that manufactures the chemicals and the social political and gender relations that enable harmful chemicals to continue being produced and consumed It also demonstrates the urgent need to revise existing approaches to the regulation of toxics including Canada s current Chemicals Management Plan

Genetically Modified Democracy Aniket Aga,2021-01-01 How the debate over genetically modified crops in India is transforming science and politics Genetically modified or transgenic crops are controversial across the world Advocates see such crops as crucial to feeding the world s growing population critics oppose them for pushing farmers deeper into ecological and economic distress and for shoring up the power of agribusinesses India leads the world in terms of the intensity of democratic engagement with transgenic crops Anthropologist Aniket Aga excavates the genealogy of conflicts of interest and disputes over truth that animate the ongoing debate in India around the commercial release of transgenic food crops The debate may well transform agriculture and food irreversibly in a country already witness to widespread agrarian distress and over 300 000 suicides by farmers in the last two decades Aga illustrates how state science and agrarian capitalism interact in novel ways to transform how democracy is lived and understood and sheds light on the dynamics of technological change in populous unequal polities

Resistance Is Fertile Wilhelm Peekhaus,2013-03-13 For decades government industry and the mainstream media have extolled the virtues of biotechnology downplaying its negative side effects and claiming that it can improve everything from our health and diet to our environment and economy Focusing on agricultural biotechnology *Resistance Is Fertile* challenges this dominant rhetoric by offering a critical analysis of the role of capital and the state in the development of this technoscience Wilhelm Peekhaus analyzes the major issues around which opponents of agricultural biotechnology in Canada are mobilizing resistance namely the enclosure of the biological commons and the knowledge commons which together form the BioCommons What emerges is an empirically and theoretically informed analysis of topics such as Canada s regulatory regime the corporate control of seeds the intellectual property system and attempts to construct and control public discussions about agricultural biotechnology

First the Seed Jack Ralph Kloppenburg, Jr.,2005-04-26 *First the Seed* spotlights the history of plant breeding and shows how efforts to control

the seed have shaped the emergence of the agricultural biotechnology industry This second edition of a classic work in the political economy of science includes an extensive new chapter updating the analysis to include the most recent developments in the struggle over the direction of crop genetic engineering 1988 Cloth 1990 Paperback Cambridge University Press Winner of the Theodore Saloutos Award of the Agricultural History Society Winner of the Robert K Merton Award of the American Sociological Association *Patent Law in Global Perspective* Professor Ruth L. Okediji, Professor Margo A. Bagley, 2014-02-27 Patent Law in Global Perspective addresses critical and timely questions in patent law from a truly global perspective with contributions from leading patent law scholars from various countries Offering fresh insights and new approaches to evaluating key institutional economic doctrinal and practical issues these chapters reflect critical analyses and review developments in national patent laws efforts to reform the global patent system and reconfigure geopolitical interests Professors Ruth L Okediji and Margo A Bagley bring together the first collection to explore patent law issues through the lens of economic development theory international relations theoretical foundations for the patent law system in the global context and more Topics include the role of patent law in economic development the efficacy of patent rights in facilitating innovation patents and access to medicines comparative patentability standards including subject matter eligibility for biotechnology and software inventions limitations and exceptions to patent scope and protection including exhaustion compulsory licensing and research exceptions patents on plants and other living organisms and the impact of emerging economies on global patent system governance The contributors provide a wealth of original insight and thought provoking discussion that will be of great interest and benefit to scholars policymakers and practitioners alike Eat Your Genes Stephen Nottingham, 2003-04 Food safety scares such as salmonella in eggs or BSE in beef continue to cause public concern but far more unnoticed is the way that genetically engineered food is entering our diet This book looks at how this situation came about revealing those responsible for driving genetically modified foods so rapidly on to the market Stephen Nottingham argues that consumer pressure could decide whether these new products succeed or fail His book gives us the facts what these new foods are how they are produced why they remain unlabelled and how they are arriving on our plates unannounced Never before has science been likely to have quite such a huge impact on our lives after all we are what we eat Here is an issue every thinking person needs to apply their mind to This is the book to help you do it *By Their Fruits* Ann FARMER, 2008 Though controversial in subject *By Their Fruits* presents an important examination of not only the history of abortion legislation but also the history and impact of the Eugenics movement **A New Agenda for Sustainability** Mr Bo Elling, Mr Erling Jelsøe, Ms Maria Figueroa, Professor Kurt Aagaard Nielsen, 2012-11-28 Two decades after the Brundtland Commission's Report *Our Common Future* adopted the concept of sustainable development this book provides a renewal of the concept exploring the potential for new practices and fields for those involved in sustainability activity The book addresses a number of themes concerning firstly the provision of a next generation perspective which was a central and still

unresolved notion of the original Brundtland definition and secondly the provision of new milestones for policy and research that can expand the discussion on this second generation concept on sustainability The material dealt with in the book offers a wide variety of perspectives on sustainability and reflects the importance of interdisciplinary and transdisciplinary work in the field Suggesting targets for future analytical and political efforts in achieving global sustainability this book offers new analytical opportunities for holistic politics and research at a general and sector level
