*The Subtlety of Emotions* Aaron Ben-Ze'Ev, 2001-08-24 An informal yet rigorous exploration of human emotions in all their complexity and subtlety Why do we cry at the movies What is the best way to manage destructive feelings such as jealousy Although emotions pervade our lives their nature causes and effects have only recently been studied by social scientists and philosophers Despite growing scientific interest in the subject empirical findings have not yet caught up with our intuitive knowledge In this book Aaron Ben Ze ev carries out what he calls a careful search for general patterns in the primeval jungle of emotions In an engaging informal style he draws on a variety of theoretical approaches and popular sources to produce a coherent account of emotions in all their subtlety All of the ideas are illustrated with examples drawn from everyday life The book is organized into two parts The first presents an overall conceptual framework for understanding emotions It looks at the typical

characteristics and components of emotions distinguishes emotions from other affective phenomena classifies the emotions and covers such related issues as emotional intelligence regulating emotions and emotions and morality The second part discusses individual emotions including envy jealousy pleasure in others misfortune pity compassion anger hate disgust love sexual desire happiness sadness pride regret and shame The text is laced with insightful and often amusing quotations from sources ranging from Mae West to Montesquieu The Routledge Handbook of Phenomenology of Emotion Thomas Szanto, Hilge Landweer, 2020-04-22 The emotions occupy a fundamental place in philosophy going back to Aristotle However the phenomenology of the emotions has until recently remained a relatively neglected topic The Routledge Handbook of Phenomenology of Emotion is an outstanding guide and reference source to this important and fascinating topic Comprising forty nine chapters by a team of international contributors this handbook covers the following topics historical perspectives including Brentano Husserl Sartre Levinas and Arendt contemporary debates including existential feelings situated affectivity embodiment art morality and feminism self directed and individual emotions including happiness grief self esteem and shame social emotions including sympathy aggressive emotions collective emotions and political emotions borderline cases of emotion including solidarity trust pain forgiveness and revenge Essential reading for students and researchers in philosophy studying phenomenology ethics moral psychology and philosophy of psychology The Routledge Handbook of Phenomenology of Emotion is also suitable for those in related disciplines such as religion sociology and anthropology

**Emotions as Original Existences** Demian Whiting, 2020-09-25 This book defends the much disputed view that emotions are what Hume referred to as original existences feeling states that have no intentional or representational properties of their own In doing so the book serves as a valuable counterbalance to the now mainstream view that emotions are representational mental states Beginning with a defence of a feeling theory of emotion Whiting opens up a whole new way of thinking about the role and centrality of emotion in our lives showing how emotion is key to a proper understanding of human motivation and the self Whiting establishes that emotions as types of bodily feelings serve as the categorical bases for our behavioural dispositions including those associated with moral thought virtue and vice The book concludes by advancing the idea that emotions make up our intrinsic nature the characterisation of what we are like in and of ourselves when considered apart from how we are disposed to behave The conclusion additionally draws out the implications of the claims made throughout the book in relation to our understanding of mental illness and the treatment of emotional disorders

Philosophy and the Emotions Anthony Hatzimoysis, 2003-07-21 This major volume of original essays maps the place of emotion in human nature through a discussion of the relation between consciousness and body by analysing the importance of emotion for human agency by pointing to the ways in which practical rationality may be enhanced as well as hindered by emotions and by exploring questions of value in making sense of emotions at a political ethical and personal level Leading researchers in the field reflect on the nature of human feelings how and why we understand what other people feel and the

way in which our values become involved in specific emotional phenomena such as guilt fear shame amusement or love This collection addresses important questions in the philosophy of mind and comments on the implications of research in biology cognitive psychology psychoanalysis and narrative theory for the philosophical understanding of emotions **Emotion**

**True Emotions** Mikko Salmela, 2014-08-15 True Emotions discusses several key problems in emotion research The question about the true nature of emotions focuses on the role of cognition in human emotions at different levels of analysis functional role types of processes and representations and neural implementation Truth to the self or authenticity has two meanings psychological and normative where the latter is analyzed as coherence between the evaluative content of an emotion and the subject's internally justified beliefs and values Truth to the world is argued to be a matter of correct evaluative representation of the emotional object on the one hand and the existence of the object or the actuality or accurate probability of the represented situation on the other hand Finally authenticity and truth are applied to analyses of the authenticity of occupational emotions and the constitution of sentimental values respectively Recommended reading for philosophers psychologists sociologists and gender researchers **Sound Sentiments** David Pugmire, 2005-04-21 Sound Sentiments seeks to open a new path in the philosophy of emotion The focus of most recent work on the philosophy of emotion has been on the nature of emotion with some attention also to the relation of emotion to ethics This book explores the idea that emotions admit of valuation of degrees of adequacy We cannot just decide what to think or to desire or to feel as we can decide to act and these attitudes are integral to emotions Nonetheless emotions can have normative characteristics that resemble virtues Philosophers are familiar with the notion that emotions are valuational But how well they serve that function determines the value they themselves have The book opens with an account of the theory of emotion reflecting

recent work on that and considers the way in which emotions are valuational with reference to the contributions of writers such as de Sousa Gibbard and McDowell The worth of an emotional experience depends on the quality of the valuation it itself achieves Most of the book is then devoted to a set of interconnected themes Some of these concern properties that emotions can have which can variously enhance or detract from them profundity social leverage narcissism and sentimentality Others are attitudes with characteristic emotional loadings and sometimes motivations that raise similar questions cynicism ambivalence and sophistication David Pugmire s general approach is indirect and negative to analyse emotional foibles which tend to elude us as we succumb to them and thereby to point to what soundness in emotion would be He also elicits connections amongst these aspects of the emotional life The most pervasive is the dimension of profundity which opens the discussion each of the subsequent problems amounts to a way in which emotion can be shallow and slight and so amount to less than it seems and accordingly each identifies a form of integrity in the emotions **The Oxford**

**Handbook of Philosophy of Emotion** Peter Goldie,2009-12-03 This volume contains thirty one state of the art contributions from leading figures in the study of emotion today The volume addresses all the central philosophical issues in current emotion research including the nature of emotion and of emotional life the history of emotion from Plato to Sartre emotion and practical reason emotion and the self emotion value and morality and emotion art and aesthetics Anyone interested in the philosophy of emotion and its wide ranging implications in other related fields such as morality and aesthetics will want to consult this book It will be a vital resource not only for scholars and graduate students but also for undergraduates who are finding their way into this fascinating topic Thinking about the Emotions Alix Cohen,Robert Stern,2017-05-26 Philosophical reflection on the emotions has a long history stretching back to classical Greek thought even though at times philosophers have marginalized or denigrated them in favour of reason Fourteen leading philosophers here offer a broad survey of the development of our understanding of the emotions The thinkers they discuss include Aristotle Aquinas Ockham Descartes Malebranche Spinoza Hobbes Hume Shaftesbury Hutcheson Kant Schiller Schopenhauer Nietzsche James Brentano Stumpf Scheler Heidegger and Sartre Central issues include the taxonomy of the emotions the distinction between emotions passions feelings and moods the relation between the emotions and reason the relationship between the self and the emotions At a metaphilosophical level the collection also raises issues about the value of historical study of the discipline and what light it can shed on contemporary concerns Thinking about the Emotions is a fascinating and illuminating collective study of how philosophers have grappled with this most intriguing part of our nature as beings who feel as well as think and act **Philosophy, Music and Emotion** Geoffrey Madell,2019-08-05

Philosophy Music and Emotion explores two issues which have been intensively debated in contemporary philosophy the nature of music s power to express emotion and the nature of emotion itself It shows how closely the two topics are related and provides a radically new account of what it means to say that music expresses emotion Geoffrey Madell maintains that most current accounts of

musical expressiveness are fundamentally misguided. He attributes this fact to the influence of a famous argument of the nineteenth century critic Hanslick and also to the dominant cognitivist approach to the nature of emotion which sees the essence of emotion to be the entertaining of evaluative judgements and beliefs of a certain sort, an account very much in accord with Hanslick's position. Such an approach results either in the unpersuasive view that musical expressiveness is somehow akin to human expressive gesture or in the view that music arouses feelings which have no specific object and unavoidably no necessary connection with the music. The book argues that the cognitivist account of the nature of emotion is quite false and that it needs to be replaced with a conception of emotions as states of feeling towards states of intentional feeling whose objects are often evaluatively characterised states of affairs, however in the context of the emotions that are aroused by music these objects are always musical events or states. Central to this bold analysis of emotion is a new account of two closely connected mental states: those of desire and of pleasure, and of what role these states have in human motivation and value.

The Logic of Love Andrew J. B. Cameron, 2022-12-29. Overviewing what makes the intersection between emotion and ethics so confusing, this book surveys an older wisdom in how to manage it using a range of Christian theologians and sources. More important even than managing, we begin to see a vision for a better set of affections to grow within and among us. In this vision emerges a practical and nuanced account of what the Christian tradition sometime summarises as love. How may we recover a deep affection for what matters both within ourselves and together in groups? This book also dialogues with a new movement in moral psychology, social intuitionism. Cameron argues that researchers in this discipline have interests and conclusions that sometimes overlap with Christian sources even where their respective lenses differ. In this way, the book overviews recent trends in moral psychology against a recent historical and contemporary cultural backdrop whilst assaying major sources in Christian theology that offer guidance on moral psychology.

Thinking about Feeling Robert C. Solomon, 2004-03-04. Philosophers since Aristotle have explored emotion, and the study of emotion has always been essential to the love of wisdom. In recent years, Anglo-American philosophers have rediscovered and placed new emphasis on this very old discipline. The view that emotions are ripe for philosophical analysis has been supported by a considerable number of excellent publications. In this volume, Robert Solomon brings together some of the best Anglo-American philosophers now writing on the philosophy of emotion, with chapters from philosophers who have distinguished themselves in the field of emotion research and have interdisciplinary interests, particularly in the social and biological sciences. The reader will find a lively variety of positions on topics such as the nature of emotion, the category of emotion, the rationality of emotions, the relationship between an emotion and its expression, the relationship between emotion, motivation and action, the biological nature versus social construction of emotion, the role of the body in emotion, the extent of freedom and our control of emotions, the relationship between emotion and value, and the very nature and warrant of theories of emotion. In addition, this book acknowledges that it is impossible to study the emotions today without engaging with

contemporary psychology and the neurosciences and moreover engages them with zeal Thus the essays included here should appeal to a broad spectrum of emotion researchers in the various theoretical experimental and clinical branches of psychology in addition to theorists in philosophy philosophical psychology moral psychology and cognitive science the social sciences and literary theory

**Identity Construction and Science Education Research** Maria Varelas,2012-12-17 In this edited volume science education scholars engage with the constructs of identity and identity construction of learners teachers and practitioners of science Reports on empirical studies and commentaries serve to extend theoretical understandings related to identity and identity development vis vis science education link them to empirical evidence derived from a range of participants educational settings and analytic foci examine methodological issues in identity studies and project fruitful directions for research in this area Using anthropological sociological and socio cultural perspectives chapter authors depict and discuss the complexity messiness but also potential of identity work in science education and show how critical constructs such as power privilege and dominant views access and participation positionality agency structure dialectic and inequities are integrally intertwined with identity construction and trajectories Chapter authors examine issues of identity with participants ranging from first graders to pre service and in service teachers to physics doctoral students to show ways in which identity work is a vital albeit still underemphasized dimension of learning and participating in science in and out of academic institutions Moreover the research presented in this book mostly concerns students or teachers with racial ethno linguistic class academic status and gender affiliations that have been long excluded from or underrepresented in scientific practice science fields and science related professions and linked with science achievement gaps This book contributes to the growing scholarship that seeks to problematize various dominant views regarding for example what counts as science and scientific competence who does science and what resources can be fruitful for doing science

*Knowing Emotions* Rick Anthony Furtak,2018 In *Knowing Emotions* Furtak argues that it is only through the emotions that we can perceive meaning in life and only by feeling emotions that we are able to recognize the value or significance of anything whatsoever Our affective responses and dispositions therefore play a critical role in human existence and their felt quality is intimately related to the awareness they provide

Criminology Eamonn Carrabine,Paul Iganski,Nigel South,Maggy Lee,2004 Covering all the major areas of the subject this introduction to criminology features specific topics such as the history and theory of criminology and categories of crime

*The Heart Has Its Reasons* Beata Toth,2016-05-26 *The Heart Has Its Reasons* explores a hitherto neglected area of theological anthropology the unity of human emotion and reason embodied in the Biblical concept of the heart While the theological contours of human rationality have long been clearly drawn and presented as the exclusive seat of the image of God affectivity has been relegated to a secondary position With the reintegration of the body into recent philosophical and theological discourses a number of questions have arisen if the image also resides in the body how does this change one's view of the theological significance of human affect In what

way is our likeness to God realised in the whole of what we are Can one overcome the traditional dissociation between intellect and affect by a renewed theory of love In conversation with patristic and medieval authors like Irenaeus Tertullian Gregory of Nyssa Maximus and Thomas Aquinas and in dialogue with more recent interlocutors such as Blaise Pascal Ricoeur Marion Milbank and John Paul II Beata Toth pursues a novel theological vision of the essential unity of our humanity

**Emotion: The Essence Of Life** Kuldip Kumar Dhiman, 2008      **The Emotions** Peter Goldie, 2002-08 Peter Goldie opens the path to a deeper understanding of our emotional lives through a lucid philosophical exploration of this surprisingly neglected topic He illuminates the phenomena of emotion by drawing not only on philosophy but also on literature and science He considers the roles of culture and evolution in the development of our emotional capabilities He examines the links between emotion mood and character and places the emotions in the context of such related phenomena as consciousness thought feeling and imagination He explains how it is that we are able to make sense of our own and other people's emotions and how we can explain the very human things which emotions lead us to do A key theme of *The Emotions* is the idea of a personal perspective or point of view contrasted with the impersonal stance of the empirical sciences Goldie argues that it is only from the personal point of view that thoughts reasons feelings and actions come into view He suggests that there is a tendency for philosophers to over intellectualize the emotions and investigates how far it is possible to explain emotions in terms of rationality Over intellectualizing can also involve neglecting the centrality of feelings and Goldie shows how to put them where they belong as part of the intentionality of emotional experience directed towards the world from a point of view Goldie argues that the various elements of emotional experience including thought feeling bodily change and expression are tied together in a narrative structure To make sense of one's emotional life one has to see it as part of a larger unfolding narrative The narrative is not simply an interpretative framework of a life it is what that life is Goldie concludes by applying these ideas in a close study of one particular emotion jealousy This fascinating book gives an accessible but penetrating exploration of a subject that is important but mysterious to all of us Any reader interested in emotion and its role in our understanding of our lives will find much to think about here
