

Rediscovering the New World¹Claudio J. B. de Carvalho²¹Department of Zoology, Universidade Federal do Paraná, Curitiba, Brazil. cjbcarva@ufpr.br

Diptera, one of the megadiverse orders of the Insecta, has around 160,000 described species (Chris Thompson, pers. comm.). Flies are probably the best cataloged of all insect groups, with taxonomic catalogs for all biogeographic regions. During the 7th International Congress of Dipterology, 8–13 August 2010, in San José, Costa Rica (the first in a neotropical country), more dipterists were from neotropical countries than any other part of the world. Prior to the ICD-7, most dipterists living in Central or South America studied flies using the *Manual of Neartic Diptera* (MND), in three volumes, published from 1981–1989. It was indeed this manual that was one of the most important for all Neotropical dipterists (see also Contreras-Ramos 2010).

The project to publish, in two volumes, the *Manual of Central American Diptera* (MCAD) was put together by a team of international taxonomic experts. This first volume has 49 chapters, including chapters on adult morphology and terminology to those on the 'nematocerous' and basal Brachycera families. The apical Cyclorhapha families were included in the second volume of the MCAD, which was published last year (Brown *et al.* 2010).

The Central America region covered by the MCAD comprises tropical Mexico (mainly lowlands) to Panama. Fortunately for those of us living in neotropical countries, the superb biogeographical evolution here is the result of a very diverse and exuberant biota, in which Diptera is certainly one of the most outstanding results of this evolution. The format of the MCAD followed the format of the MND. While following that format was useful, the classification it adopted was not. That is, the MCAD followed the classification in MND, which is 30 years old. Some of the 42 families were treated as single families, such as the Tipulidae, even though today they may divided into several families.

I agree with William Eberhard, who noted in Costa Rica at the ICD-7 and in the foreword to volume 1 of the MCAD: "Life is exciting for an entomologist living in the tropics." Studying New World tropical flies is essential for understanding the evolution of flies in general. Within the classical

Neotropical region, the tropics have always been known as one of the richest biological areas in the world. The MCAD project began with Costa Rica as the main focus, and only later grew to include the remainder of Central America. Most identification keys for families or genera are easy to use to identify flies in South American lowlands. Unfortunately, the South American highlands continue to be poorly known.

Few regional and recent books for the identification of Diptera have been published (Zumbado 2006, Wolff 2006). However, these regional books are very important contributions that will help researchers in their fly studies in neotropical countries. In Brazil, the book *Insects of Brazil: diversity and taxonomy* (Rafael *et al.*, in press) will soon be released. Maybe in the near future, the projects MND and MCAD will grow to include the southernmost areas of South America, and will initiate a new project, such as *Manual of South America Diptera* (MSAD) to include the entire South American continent. Today MCAD will be very useful for all those also in South America, acting as a first step, while we are awaiting the publication of comprehensive MSAD. Only then we will have a complete synopsis of the Diptera of the New World, and then we will really rediscover the New World, only 500 years after it was discovered.

Rediscovering The New World:

A Voyage Long and Strange Tony Horwitz, 2008-04-29 A chronicle of the period in American history between Columbus's discovery of the New World and Jamestown's founding evaluates the voyages and first contact experiences of numerous European adventurers

Writing New Worlds Marília dos Santos Lopes, 2016-05-11 Writing New Worlds analyses the different ways in which travel literature constituted a fundamental pillar in the production of knowledge in the modern era. The impressive frequency of publication and the widespread circulation of translations and editions account for the leading and essential contribution of travel literature for a better understanding and awareness about the dynamics and practices associated with decoding and making sense of the prose of the world. These texts in some cases accompanied by illustrations covered a broad and extensive panoply of languages, grammars and ways of seeing, translating and writing new worlds. In drawing special attention to internationally less studied sources from Portugal and Germany, the book shows how authors, scholars and artists between the 15th and 17th centuries responded to the challenges of modernity and explores the cultural dynamics involved in grasping and understanding the New.

The Collected Works of Chögyam Trungpa: Volume 4 Chogyam Trungpa, 2010-09-28 The Collected Works of Chogyam Trungpa brings together in eight volumes the writings of the first and most influential and inspirational Tibetan teacher to present Buddhism in the West. Organized by theme, the collection includes full length books as well as articles, seminar transcripts, poems, plays and interviews, many of which have never before been available in book form. From memoirs of his escape from Chinese occupied Tibet to insightful discussions of psychology, mind and meditation, from original verse and calligraphy to the esoteric lore of tantric Buddhism, the impressive range of Trungpa's vision, talents and teachings is showcased in this landmark series. Volume Four presents introductory writings on the vajrayana tantric teachings, clearing up Western misconceptions about Buddhist tantra. It includes three full length books and a 1976 interview in which Chogyam Trungpa offers penetrating comments on the challenge of bringing the vajrayana teachings to America.

The Lion's Roar Chogyam Trungpa, 2001-11-13 This book is based on two historic seminars of the 1970s in which Chogyam Trungpa introduced the tantric teachings of Tibetan Buddhism to his Western students for the first time. Each seminar bore the title The Nine Yanas. Yana, a Sanskrit word meaning vehicle, refers to a body of doctrine and practical instruction that enables students to advance spiritually on the path of Buddha dharma. Nine vehicles arranged in successive levels make up the whole path of Buddhist practice. Teaching all nine means giving a total picture of the spiritual journey. The author's nontheoretical, experiential approach opens up a world of fundamental psychological insights and subtleties. He speaks directly to a contemporary Western audience using earthly analogies that place the ancient teachings in the midst of ordinary life.

Rediscovering the South's Celtic Heritage Barry Vann, 2004 Fabled

in American history the Scotch Irish played a principal role in settling the Southern Appalachian Mountains From the original settlers sprang a culture based on their Old World ways along with their daily habits they brought with them a reverence for the King James Bible and the land providing their sustenance Isolated in mountain pockets the culture existed on the periphery of mainstream America until the late 20th century In *Rediscovering the South's Celtic Heritage* author Barry Vann explores the roots and branches of America's pioneering Celts following their influence through the ages to the present day setting forth the bold theory that the Celts in America form a distinct ethnic group separate from the dominant Anglo Saxon culture from back cover

Rediscovering Magical Realism in the Americas Shannin Schroeder, 2004-10-30 Drawing from a variety of contemporary literature including such works as *One Hundred Years of Solitude* *Beloved* and *Like Water for Chocolate* Schroeder explores magical realism as one of many common denominators in the literature of the Americas challenging the notion that magical realism should be defined merely in terms of geography or Latin American history By relying on an all encompassing vision of this unique mode of writing the author argues that the Americas share a literary tradition and validates the North American strain of the mode In addition she points to fundamentally similar approaches to fiction that illustrate the ways in which the Americas share a common literature and calls for increased Pan American scholarship Counteracting the critical tendency to label anything unreal or supernatural in literature as magical realism Schroeder traces the mode through a variety of contemporary works including well known and lesser known examples Through a carefully articulated history and description of the mode itself she is able to show that while Latin American and North American fiction share in common certain features of magical realism their distinctive approaches to it reflect Latin America's third world concerns and North America's preoccupation with popular culture and capitalism Tracing the forces of change at work on the mode in an effort to counter the tendency among scholars to apply the label without justification this book reclaims magical realism as a current and significant term for use in its application to literary works **Review**, 1992
