**The Resilient Sector**

Lester M. Salamon, 2003-08-29 A Brookings Institution Press and the Aspen Institute publication *The Resilient Sector* makes available in an updated form the concise overview of the state of health of America's nonprofit organizations that Johns Hopkins scholar Lester Salamon recently completed as part of the state of nonprofit America project he undertook in cooperation with the Aspen Institute. Contrary to popular understanding, Salamon argues America's nonprofit organizations have shown remarkable resilience in recent years in the face of a variety of difficult challenges, significantly reengineering themselves in the process. But this very resilience now poses risks for the sector's continued ability to perform the tasks that we have long expected of it. *The Resilient Sector* offers nonprofit practitioners, policymakers, the press, and the public at large a lively assessment of this set of institutions that we have long taken for granted but that the Frenchman Alexis de Toqueville recognized to be more deserving of our attention than almost any other part of the American experiment. **Managing High-intensity Internet Projects** Edward Yourdon, 2002 In *Managing High Intensity Internet Projects*, Ed Yourdon delivers instant practical solutions for virtually every challenge you'll face in leading today's high intensity Internet time projects. Yourdon's breakthrough management techniques cover strategies, politics, processes, tools, and the entire development lifecycle from requirements through coding, monitoring, progress, testing, and delivery. **Reengineering the Training Function** Donald Shandler, 2024-11-01 If you have questions about how to meet the demands of the new economy, corporate and organizational agendas, and the changing workplace, you will find the answers in this well-written and concise book. *Reengineering the Training Function* provides a plan of action rich in strategies and tactics, full of specific guidelines and tools that can be put to use immediately. **Measuring Information Technology Investment Payoff** Mo Adam Mahmood, Edward J. Szewczak, 1999-01-01 It would seem that business investment in information technology IT is at root no different from business investment in anything else After a careful consideration of the costs of the investment and its anticipated benefits a decision is made as to whether the benefits of the investment outstrip the costs and by how much If the benefits are competitive with other investment alternatives say a major marketing campaign then the business will commit financial resources to the IT proposal Otherwise it won t This decision making process is at the heart of capital budgeting Senior executives have been making IT investment decisions for well over three decades So why is the measurement of IT investment payoff so difficult and controversial Why do we need a book dealing with contemporary approaches to measuring IT investment payoff Why have earlier approaches to measuring IT investment payoff proven unsatisfactory In what respects have earlier approaches fallen short Do we need to scrap earlier approaches entirely or can we find important improvements to these approaches such that they can be newly applied to effectively measure IT investment payoff in ways that are convincing to senior management This book will help you to find improvements in existing methods for measuring IT investment payoff as well as to find new innovative methods for addressing the value of emerging IT 0000 0
