**Introduction to Numerical Ordinary and Partial Differential Equations Using MATLAB** Alexander Stanoyevitch, 2011-10-14

**Consciousness** Neil Rossman, 1991-01-21 A central claim of this book is that the emergence of humanity involves a splitting of consciousness the ability of consciousness to become reflectively aware of itself But the splitting of consciousness is simultaneously the development of the possibility of fragmentation incoherence within consciousness and alienation non unity of consciousness with others and the world Thus through the growth of reflective consciousness separation comes to permeate the whole of human experience So understood it creates the need for integration and Rossman's discussion ultimately centers on its attainment Within this perspective various aspects of consciousness including perception organic sensation desire and belief are explored There is also extensive discussion of

personal identity or the experience of being a self Finally the above analyses provide the ground for discussions of freedom morality and being religious      *Rabbits, Cats and Cavies* Charles Henry Lane,1903      **Transparency and Reflection** Matthew Boyle,2024 The maxim Know thyself has been central to philosophy since antiquity but today there is widespread skepticism both within philosophy and in our intellectual culture at large about the extent to which we can truly know our own minds and the extent to which self knowledge matters to our lives Transparency and Reflection argues that although we can be mistaken about ourselves in many respects such mistakes occur against the background of a fundamental self understanding that is necessarily available to any human subject To deny this essential capacity for self understanding Matthew Boyle argues is to leave out the very thing that makes us human      Mr. P.'s diary: facts, ideas, suggestions, reflections, and confessions James Thornton Hoskins,1893
