Durfee,2012-12-06 The American University Publications In From its inception Philosophy has continued the direction stated in the sub title of the initial volume that of probing new directions in philosophy As the series has developed these probings of new directions have taken the two fold direction of exploring the relationships between the disparate traditions of twentieth century philosophy and with developing new insights into the foundations of some enduring philosophic problems This present volume continues both of these directions The interaction between twentieth century Anglo Saxon and Continental philosophy which was an implicit theme of our first and third volumes and the explicit subject of our second volume is here continued in a series of

studies on major figures and topics in each tradition In the context of these interpretative studies Professor Durfee returns again and again to the question of the relationships between the will and the reason and explores the conflicting goals of creativity and objectivity in formulating a philosophic position In so doing he raises the issue as his title suggests of the foundations of philosophy itself He seriously challenges the belief common to both phenomenology and analytic philosophy that philosophizing can be a presuppositionless activity objectively pursued independent of the personal and perhaps arbitrary commitments of the philosopher This issue critical as it is to all forms of philosophy is surely a worthy one for a series such as ours
