**Beyond the Systems Paradigm** Luciano L'Abate,2013-05-30 This monograph owes its origins to the decades old proposal by David Bakan 1968 about the duality of human experience He proposed that community and agency would be two necessary and sufficient constructs to classify and to encompass most human relationships This dichotomy has been found to be valid by a variety of contributions over the last half a century L Abate 2009 L Abate Cusinato Maino Colesso Scilletta 2010 Additionally the purpose of this book is to argue and assert that two important fields of psychology family and personality psychologies if not already dead are conceptually empirically and practically moribund They are being superseded respectively by perhaps more appropriate perhaps more specific and more likely verifiable concepts and constructs such as intimacy and identity The traditional family still conceived as composed by two parents and two children of different gender is responsible for only one fourth of all domiciles in USA Singles same sex couples and completely different family organization complete the remaining 100% Difficulties in defining what is personality require a change in perspective and advance toward a comprehensive theory of human relationships that can and should fulfill requirements necessary to achieve an undoubtedly grandiose and ambitious universal status

**Advances in Emotion Regulation: From Neuroscience to Psychotherapy** Alessandro Grecucci,Remo Job,Jon J. Frederickson,2017-08-24

Emotions are the gift nature gave us to help us connect with others Emotions do not come from out of nowhere Rather they are constantly generated usually by stimuli in our interpersonal world They bond us to others guide us in navigating our social interactions and help us care for each other Paraphrasing Shakespeare Our relationships are such stuff as emotions are made of Emotions express our needs and desires When problems happen in our relationships emotions arise to help us fix those problems However when emotions can become dysregulated pathology begins Almost all forms of psychopathology are associated with dysregulated emotions or dysregulatory mechanisms These dysregulated emotions can become regulated when the therapist helps clients express face and regulate their emotions and channel them into healthy actions This research topic gathers contributions from affective neuroscientists and psychotherapists to illustrate how our emotions become dysregulated in life and can become regulated through psychotherapy
