**Reflexivization** Leonard M. Faltz, 2016-11-10 This title first published in 1985 is the result of a cross linguistic comparative study of reflexives with a major role played by syntactic conditions on reflexivization rules The basic definitions outlined in the book lead to a discussion of morphological types discussions about syntax and speculations on the historical origins and destinies of the various kinds of reflexives This title will be of interest to students of language and linguistics

Reflexivization Leonard M. Faltz, 1900      The Handbook of Contemporary Syntactic Theory Mark Baltin, Chris Collins, 2008-04-15 This volume provides a comprehensive view of the current issues in contemporary syntactic theory Written by an international assembly of leading specialists in the field these 2 original articles serve as a useful reference for various areas of grammar Contains 23 articles written by an international assembly of specialists in the field The lucidly written articles grant accessibility to crucial areas of syntactic theory Contrasting theories are represented Contains an informative introduction and extensive bibliography which serves as a reference tool for both students and professional linguists      **Syntax - Theory and Analysis. Volume 1** Tibor Kiss, Artemis Alexiadou, 2015-02-17 This Handbook represents the development of research and the current level of knowledge in the fields of syntactic theory and syntax analysis Syntax can look back to a long tradition Especially in the last 50 years however the interaction between syntactic theory and syntactic analysis has led to a rapid increase in analyses and theoretical suggestions This second edition of the Handbook on Syntax adopts a unifying perspective and therefore does not place the division of syntactic theory into several schools to the fore but the increase in knowledge resulting from the fruitful argumentations between syntactic analysis and syntactic theory It uses selected phenomena of individual languages and their cross linguistic realizations to explain what syntactic analyses can do and at the same time to show in what respects syntactic theories differ from each other It investigates how syntax is related to neighbouring disciplines and investigate the role of the interfaces especially the relationship between syntax and phonology morphology compositional semantics pragmatics and the lexicon The phenomena chosen bring together renowned experts in syntax and represent the consensus reached as to what has to be considered as an important as well as illustrative syntactic phenomenon The phenomena discuss do not only serve to show syntactic analyses but also to compare theoretical approaches with each other

**Studies in the Morpho-Syntax of Greek** Artemis Alexiadou, 2009-03-26 The volume presents a collection of papers of recent generative work on Modern Greek morpho syntax The book is divided into three parts Part I of the book deals with argument alternations part II with clitics and part III with the syntax and semantics of free relatives The book will be interesting for scholars working on Greek but also in theoretical linguistics as it exemplifies how the study of Greek feeds the development of generative theory The issues discussed in the book are currently highly relevant for the development of a satisfactory theory of comparative syntax as well as the interface between syntax and morphology and syntax and semantics Thus the analyses put forth here will contribute to the elaboration of such a theory and to our

understanding of cross linguistic variation      **The Blackwell Companion to Syntax** Martin Everaert, Henk Van Riemsdijk, 2008-04-15 Pre Order The Wiley Blackwell Companion to Syntax second edition publishing December 2017 Find out more at [www.companiontosyntax.com](http://www.companiontosyntax.com) This long awaited reference work marks the culmination of numerous years of research and international collaboration by the world's leading syntacticians. There exists no other comparable collection of research that documents the development of syntax in this way. Under the editorial direction of Martin Everaert and Henk van Riemsdijk this 5 volume set comprises 70 case studies commissioned specifically for this volume. The 80 contributors are drawn from an international group of prestigious linguists including Joe Emonds, Sandra Chung, Susan Rothstein, Adriana Belletti, Jim Huang, Howard Lasnik and Marcel den Dikken among many others. A unique collection of 70 newly commissioned case studies offering access to research completed over the last 40 years. Brings together the world's leading syntacticians to provide a large and diverse number of case studies in the field. Explores a comprehensive range of syntax topics from an historical perspective. Investigates empirical domains which have been well documented and which have played a prominent role in theoretical syntax at some stage in the development of generative grammar. Serves as a research tool for not only theoretical linguistics but also the various forms of applied linguistics. Contains an accessible alphabetical structure with an index integral to each volume featuring keywords and key figures. Each multi volume set is also accompanied by a CD Rom of the entire Companion. Like the prestigious Blackwell Handbooks in Linguistics series this multi volume work in the new The Wiley Blackwell Companions to Linguistics series can be relied upon to deliver the quality and expertise with which Blackwell Publishing's linguistics list is associated.

**The Derivation of Anaphoric Relations** Glyn Hicks, 2009-03-11 The Derivation of Anaphoric Relations resolves a conspicuous problem for Minimalist theory: the apparently representational nature of the binding conditions. Hicks adduces a broad variety of evidence against the binding conditions applying at LF and builds upon the insights of recent proposals by Hornstein, Kayne and Reuland by reducing them to the core narrow syntactic operations: specifically Agree and Merge. Several novel and independently motivated claims about syntactic features and phases are made: not only explaining the previously stipulated roles played by c-command, reference and locality but furnishing the derivational binding theory with sufficient flexibility to capture some long problematic empirical phenomena. These include connectivity effects, picture noun reflexives in English and anaphor-pronoun non-complementarity. Specific proposals are also made for extending the derivational approach to accommodate structured crosslinguistic variation in binding with thorough expositions and analyses of the Dutch, Norwegian and Icelandic pronominal systems.

**Voice: Form and Function** Barbara A. Fox, Paul J. Hopper, 1994-04-06 The volume's central concern is grammatical voice, traditionally known as diathesis, and its classical manifestations as Active, Middle and Passive. While numerous problems in the meaning, syntax and morphology of these categories in Indo-European remain unsolved, their counterparts in more exotic languages have raised still further questions. What discourse functions and diachronic events unite voice as a recognizable phenomenon across languages? How

are they typically grammaticalized What stages do children go through in learning them How does voice link up with ergativity and with other categories and constructions such as the Inverse and the Antipassive The authors in this volume have different perspectives on these problems they discuss voice e g from a typological universal view in relation to language acquisition and to ergativity and from diachronic and cross linguistic perspectives Sign Language Research Sixty Years Later: Current and Future Perspectives Valentina Cuccio,Erin Wilkinson,Brigitte Garcia,Adam Schembri,Erin Moriarty,Sabina Fontana,2022-11-14 *Reflexive Pronouns: A Theoretical and Experimental Synthesis* Darcy Sperlich,2021-01-04 This book presents a comprehensive picture of reflexive pronouns from both a theoretical and experimental perspective using the well researched languages of English German Dutch Chinese Japanese and Korean In order to understand the data from varying theoretical perspectives the book considers selected syntactic and pragmatic analyses based on their current importance in the field The volume consequently introduces the Emergentist Reflexivity Approach which is a novel theoretical synthesis incorporating a sentence and pragmatic processor that accounts for reflexive pronoun behaviour in these six languages Moreover in support of this model a vast array of experimental literature is considered including first and second language acquisition bilingual psycholinguistic neurolinguistic and clinical studies It is through both the intuitive and experimental data linguistic theorizing relies upon that brings out the strengths of the modelling adopted here paving new avenues for future research In sum this volume unites a diverse array of the literature that currently sits largely divorced between the theoretical and experimental realms and when put together a better understanding of reflexive pronouns under the auspices of the Emergentist Reflexivity Approach is forged Canonical Morphology and Syntax Dunstan Brown,Marina Chumakina,Greville G. Corbett,2013 This is the first book to present Canonical Typology a framework for comparing constructions and categories across languages The canonical method takes the criteria used to define particular categories or phenomena eg negation finiteness possession to create a multidimensional space in which language specific instances can be placed In this way the issue of fit becomes a matter of greater or lesser proximity to a canonical ideal Drawing on the expertise of world class scholars in the field the book addresses the issue of cross linguistic comparability illustrates the range of areas from morphosyntactic features to reported speech to which linguists are currently applying this methodology and explores to what degree the approach succeeds in discovering the elusive canon of linguistic phenomena *Defining Creole* John H. McWhorter,2005-02-03 A conventional wisdom among creolists is that creole is a sociohistorical term only that creole languages share a particular history entailing adults rapidly acquiring a language usually under conditions of subordination but that structurally they are indistinguishable from other languages The articles by John H McWhorter collected in this volume demonstrate that this is in fact untrue Creole languages while complex and nuanced as all human languages are are delineable from older languages as the result of their having come into existence only a few centuries ago Then adults learn a language under untutored conditions they

abbreviate its structure focusing upon features vital to communication and shaving away most of the features useless to communication that bedevil those acquiring the language non natively When they utilize their rendition of the language consistently enough to create a brand new one this new creation naturally evinces evidence of its youth specifically a much lower degree of the random accretions typical in older languages which only develop over vast periods of time The articles constitute a case for this thesis based on both broad cross creole ranges of data and focused expositions referring to single creole languages The book presents a general case for a theory of language contact and creolization in which not only transfer from source languages but also structural reduction plays a central role based on facts whose marginality of address in creole studies has arisen from issues sociopolitical as well as scientific For several decades the very definition of the term creole has been elusive even among creole specialists This book attempts to forge a path beyond the inter and intra disciplinary misunderstandings and stalemates that have resulted from this and to demonstrate the place that creoles might occupy in other linguistic subfields including typology language contact and syntactic theory

**Interfaces in Functional Discourse Grammar** Lucía Contreras-García, Daniel García Velasco, 2021-08-23 In grammar design a basic distinction is made between derivational and modular architectures This raises the question of which organization of grammar can deal with linguistic phenomena more appropriately The studies contained in the present volume explore the interface relations between different levels of linguistic representation in Functional Discourse Grammar as presented in Hengeveld and Mackenzie 2008 and Keizer 2015 This theory analyses linguistic expressions at four linguistic levels interpersonal representational morphosyntactic and phonological The articles address issues such as the possible correspondences and mismatches between those levels as well as the conditions which constrain the combinations of levels in well formed expressions Additionally the theory is tested by examining various grammatical phenomena with a focus both on the English language and on typological adequacy anaphora raising phonological reduction noun incorporation reflexives and reciprocals serial verbs the passive voice time measurement constructions coordination nominal modification and connectives Overall the volume provides both theoretical and descriptive insights which are of relevance to linguistics in general

*Thoughts on grammaticalization* Christian Lehmann, 2024-05-23 *Thoughts on grammaticalization* was first published in a working paper version in 1982 and became very influential immediately even though it was properly published only in 1995 Despite its modest title the book can be read as an advanced introduction to grammaticalization though its conception is very original The present edition contains a number of corrections of the 1995 edition After a short review of the history of research the work introduces and delimits the concepts related to grammaticalization It then provides extensive exemplification of grammaticalization phenomena in diverse languages ordered by grammatical domains such as the verbal pronominal and nominal sphere and clause level relations The final chapter presents a theory of grammaticalization which is based on the autonomy of the linguistic sign with respect to the paradigmatic and syntagmatic axes This is the basis of the structural

parameters that constitute grammaticalization They are operationalized to the point of rendering degrees of grammaticalization measurable *Thoughts on grammaticalization* Christian Lehmann, 2015-12-24 After a short review of the history of research the work introduces and delimits the concepts related to grammaticalization It then provides extensive exemplification of grammaticalization phenomena in diverse languages ordered by grammatical domains such as the verbal pronominal and nominal sphere and clause level relations The final chapter presents a theory of grammaticalization which is based on the autonomy of the linguistic sign with respect to the paradigmatic and syntagmatic axes This is the basis of the structural parameters that constitute grammaticalization They are operationalized to the point of rendering degrees of grammaticalization measurable The present edition contains corrections of the 1995 edition

**Patient-Subject Constructions in Mandarin Chinese** Xiaoling He, 2019-06-15 As a distinctive syntactic structure in Mandarin Chinese the Patient Subject Construction PSC is one of the most interesting but least well understood structures in the language This book offers a comprehensive account of the history structure meaning and use of the PSC Unlike previous descriptions which were framed in terms of pre existing grammatical notions such as topicalization passivization and ergativization this book offers a fresh look at the PSC in which its syntactic and semantic as well as its discourse functions are examined within the system of major construction types of the language as a whole The PSC being low in transitivity serves primarily the function of backgrounding in discourse Typologically the PSC bears a resemblance to middle constructions in Indo European and other languages raising interesting questions about ways to understand congruent and divergent syntactic structures across the world's languages This book will be of interest to students of Chinese Linguistics as well as Language Typology

**Reciprocals** Zygmunt Frajzyngier, Traci Walker, 2000-03-15 The theoretical issues addressed in the present volume are semantic and cognitive properties of reciprocal events syntactic properties of reciprocals and the relationship of reciprocals to other grammatical categories Several papers discuss the history of reciprocal constructions offering alternative hypotheses regarding the grammaticalization of reciprocals The formal functional typological and historical approaches in the present volume complement each other contributing together to the understanding of forms and syntactic and semantic properties of reciprocal markers Several papers in the present volume make a double contribution to the problems of reciprocal constructions they provide new descriptive data and they address theoretical issues at the same time The languages discussed include English Dutch German Greek Polish Nyulnyulan Australian Amharic Ethio Semitic Bilin Cushitic Chadic languages Bantu Halkomelem Salishan Mandarin Yukaghir and a number of Oceanic languages The volume also includes a study of grammaticalization of reciprocals and reflexives in African languages

Transitivity Patrick Brandt, Marco García García, 2010-11-17 What happens when a canonically transitive form meets a canonically transitive meaning and what happens when this doesn't happen How do dyadic forms relate to monadic ones and what are the entailments of the operations that the grammar uses to relate one to the other Collecting original expert work from

acquisition processing typological and theoretical syntax semantics research this volume provides a state of the art as well as cutting edge discussion of central issues in the realm of Transitivity These include the definition and role of Natural Transitivity the interpretation and repercussions of valency changing operations and differential case marking and the interactions between in transitive Gestalts in different categories and at different levels of representation **Language**

**Typology and Syntactic Description: Volume 1, Clause Structure** Timothy Shopen, 2007-10-04 This unique three volume survey brings together a team of leading scholars to explore the syntactic and morphological structures of the world's languages Clearly organized and broad ranging it covers topics such as parts of speech passives complementation relative clauses adverbial clauses inflectional morphology tense aspect mood and diexis The contributors look at the major ways that these notions are realized and provide informative sketches of them at work in a range of languages Each volume is accessibly written and clearly explains each new concept introduced Although the volumes can be read independently together they provide an indispensable reference work for all linguists and fieldworkers interested in cross linguistic generalizations Volume I covers parts of speech systems word order the noun phrase clause types speech act distinctions the passive and information packaging in the clause **Grammaticalization** Paul J. Hopper, Elizabeth Closs

Traugott, 2003-07-31 This is a general introduction to grammaticalization the change whereby lexical terms and constructions come in certain linguistic contexts to serve grammatical functions and once grammaticalized continue to develop new grammatical functions The authors synthesize work from several areas of linguistics including historical linguistics discourse analysis and pragmatics Data are drawn from many languages including Ewe Finnish French Hindi Hittite Japanese Malay and especially English This 2003 second edition has been thoroughly revised with substantial updates on theoretical and methodological issues that have arisen in the decade since the first edition and includes a significantly expanded bibliography Particular attention is paid to recent debates over directionality in change and the role of grammaticalization in creolization Grammaticalization will be a valuable and stimulating textbook for all linguists interested in the development of grammatical forms and will also be of interest to readers in anthropology and psychology
