The What and the Why of History Goldstein, 2021-12-06 *The What and the Why of History* deals with history as a cognitive discipline concerned to establish justifiable knowledge about a past we can never experience It is divided into three parts The first focuses on the conditions that are presupposed when historians offer explanations of what they have come to know But whatever is to be explained must first come to be known and the second part is concerned with the character of the cognitive activity which is the constitution of the historical past The point is that we must attend to the historical enterprise on its own

terms and not try to make it fit the epistemology of natural science or of common sense The last section deals with Collingwood It is shown that his characteristic positions contribute to an account of historical knowing not historical explanation

Theology and Science in the Thought of Francis Bacon Steven Matthews, 2017-11-22 This study re-evaluates the religious beliefs of Francis Bacon and the role which his theology played in the development of his program for the reform of learning and the natural sciences the Great Instauration Bacon's Instauration writings are saturated with theological statements and Biblical references which inform and explain his program yet this aspect of his writings has received little attention Previous considerations of Bacon's religion have been drawn from a fairly short list of his published writings Consequently Bacon has been portrayed as everything from an atheist to a Puritan scholarly consensus is lacking This book argues that by considering the historical context of Bacon's society and his conversion from Puritanism to anti-Calvinism as a young man his own theology can be brought into clearer focus and his philosophy more properly understood After leaving his mother's household Bacon underwent a transformation of belief which led him away from his mother's Calvinism and toward the writings of the ancient Church Fathers particularly Irenaeus of Lyon Bacon's theology increasingly came to reflect the theological interests of his friend and editor Lancelot Andrewes The patristic turn of Bacon's belief in the last two decades of the reign of Elizabeth significantly affected the development of his philosophical program which was produced in the first two decades of the Stuart era This study then examines the theology present in the Instauration writings themselves and concludes with a consideration of the effect which Bacon's theology had on the subsequent direction of empirical science and natural theology in the English context In so doing it not only offers a

new perspective on Bacon but will serve as a contribution toward a better understanding of the religious context of and motivations behind empirical science in early modern England

Renaissance Humanism in Support of the Gospel in Luther's Early Correspondence Timothy P. Dost, 2017-07-05 Drawing on the early correspondence of Martin Luther Timothy Dost presents a reassessment of the degree to which humanism influenced the thinking of this key reformation figure Studying letters written by Luther between 1507 and 1522 he explores the various ways Luther used humanism and humanist techniques in his writings and the effect of these influences on his developing religious beliefs The letters used in this study many of which have never before been translated into English focus on Luther's thoughts attitudes and application of humanism uncovering the extent to which he used humanist devices to develop his understanding of the gospel Although there have been other studies of Luther and humanism few have been grounded in such a close philological examination of Luther's writings Combining a sound knowledge of recent historiography with a detailed familiarity with Luther's correspondence Dost provides a sophisticated contribution to the field of reformation studies

The Age of Milton C. A. Patrides, Raymond B. Waddington, 1980 *Image as Insight* Margaret R. Miles, 2006-09-01 Miles's pathbreaking work shows how art and architecture have shaped religious understanding throughout the history of Christianity

Sourcebook in Late-Scholastic Monetary Theory Stephen J. Grabill, 2007-11-28 The Sourcebook in Late Scholastic Monetary Theory is a thematically unified collection of seminal texts in the history of economics on the topic of money and exchange relations cambium _its nature purpose value and relationship to justice and morality in financial transactions_ within the tradition of late scholastic commercial ethics Cambium embraces the development of banking practices and institutions in early modern Europe and therefore is much broader in scope than the simple practice of exchanging currency Here for the first time the unabridged texts of Mart n de Azpilcueta's *Commentary on the Resolution of Money* 1556 Luis de Molina's *A Treatise on Money* 1597 and Juan de Mariana's *Treatise on the Alteration of Money* 1609 are available in English translation with scholarly annotations The publication of these foundational texts under a single cover will stimulate exploration of the continuities and discontinuities agreements and disagreements innovations and ruptures within the Salamancan tradition of commercial ethics during the latter half of the sixteenth and the early seventeenth century A close reading shows that the Salamancans were involved not only in an internal conversation within Spain concerning inflation usury rates of currency exchange currency debasement subjective value just prices and so on but also that they were critical intermediaries in a wider conversation spanning centuries that includes prominent canonists jurists philosophers and theologians The Salamancans also serve as conduits of scholastic economic reflection to Adam Smith and the political economists of the seventeenth and eighteenth centuries The texts in conjunction with the introductions by leading authorities demonstrate the sophistication with which the Spanish doctors examined the new process of using bills of exchange cambium per litteras to replace the cumbersome and dangerous transportation of metallic coins between commercial fairs which led not only to new

scholastic insights on interest credit and international trade but also to a much more comprehensive analysis of monetary exchange and banking practices than had been undertaken before **Cross in Tensions** Philip Ruge-Jones, 2008-08-08

Luther's theology of the cross is a direct critique of oppressive power relationships in his day. Luther's early thought challenges specific economic, political, social, ideological, and religious power dynamics. The cross confronts those who enjoy power, prestige, pomp, and profits at the expense of the poor. Ruge-Jones maps the power relationships that Luther's theology addressed and then turns to specific works that challenge established structures of his world. Luther's Latin texts undermine the ideological assumptions and presumptions that bolstered an opulent church and empire. Luther uses the cross of Christ to challenge what he called *volatilem cogitatum* knowledge that is prone to violence. His German writings directed to a broader, more popular audience focus this critique of human pretensions into an attack on systems of wealth, status, and power that refuse to look with compassion upon poor Mary or upon the many domestic servants of Germany. God has respected the ones whom the world disrespects and has thus entered the world to turn it upside down. Also in the German writings, the Lord's Supper calls the powerful to enter into solidarity with the poor, suffering people to whom Christ has given himself. Finally, in his popular pamphlets, visual images show with graphic specificity that throughout his life, Christ sought out solidarity with the least. These images contrast brutally with images of a church that has sold its soul to wealth, political influence, military power, and status. **Proceedings, American Philosophical Society (vol. 137, No. 4, 1993)** ,
