for most workers is falling Ghilarducci takes an unflinching look at the eroding economic structure of retirement in America and what she finds is alarming She exposes the failures of pension regulators and the false hopes of privatized Social Security She tells the ugly truth about risky 401 k plans do it yourself retirement schemes and companies like Enron that have left employees without any retirement savings Ghilarducci puts forward a sweeping plan to revive the retirement income system a plan that will ensure that after forty years of work every American will receive 70 percent of their preretirement earnings guaranteed for life No other book makes such a persuasive case for overhauling the pension and Social Security system in order to provide older Americans with the financial stability they have earned and deserve

Informality and the Challenge of Pension Adequacy: Outlook and Reform Options for Peru Christoph Freudenberg, Frederik Toscani, 2019-07-11 Past reforms have put the Peruvian pension system on a largely fiscally sustainable path but the system faces important challenges in providing adequate pension levels for a large share of the population Using administrative microdata at the affiliate level we project replacement rates in the defined benefit DB and defined contribution DC pillars over the next 30 years and simulate the impact of various reform scenarios on the average level and distribution of pensions In the DB pillar the regressive minimum contribution period should be re thought while in the DC pillar a broadening of the contribution base and or an increase in contribution rates would help increase replacement rates relative to the baseline forecast of 25 33 percent A higher net real rate of return than assumed in the baseline would also have a significant positive impact In the medium term labor market

reform to tackle informality and a broad pension reform to restructure the system and avoid competition between the DB and DC pillars should be a priority Given low pension coverage having a strong non contributory pillar will remain important for the foreseeable future

Jacobs, 2011-03-28 In Governing for the Long Term Alan M Jacobs investigates the conditions under which elected governments invest in long term social benefits at short term social cost Jacobs contends that along the path to adoption investment oriented policies must surmount three distinct hurdles to future oriented state action a problem of electoral risk rooted in the scarcity of voter attention a problem of prediction deriving from the complexity of long term policy effects and a problem of institutional capacity arising from interest groups preferences for distributive gains over intertemporal bargains Testing this argument through a four country historical analysis of pension policymaking the book illuminates crucial differences between the causal logics of distributive and intertemporal politics and makes a case for bringing trade offs over time to the center of the study of policymaking
