Reforming Metropolitan Schools:

Reforming Metropolitan Schools Allan C. Ornstein, Daniel U. Levine, Doxey Alphonso Wilkerson, 1975 *Reforming Schools* Kimberly Kinsler, Mae Gamble, 2004-11-01 Reforming Schools will transform the study of school reform development and improvement. It not only provides an overview of research findings, professional and political issues and policy developments and their history, it also relates such thinking to practice through a rich and multi-faceted case study of school reform. Particular emphasis is given to urban schooling with a candid look at what can be learnt not only from successful school reforms but also from failure. The authors provide questions and exercises throughout to help readers interact with case study material. Reforming Schools enables the readers to experience what it is like to work in the field in a way that no other book on school reform does.

The Business of Reforming American Schools Denise Gelberg, 1997-01-01 Focusing on the influence of the business community on schools, this book describes how popular business management theories and production processes have been imported into schools during periods of societal upheaval in order to create a sense of order and efficiency while meeting the objective of producing a workforce that meets the specifications set down by employers. Unlike other books that say why schools need to be reformed or how that reform should proceed, this study takes a critical look at the latest call to restructure schools in light of the economic, social and political forces that affect the education establishment and the children of our nation.

Education Reform in Florida Kathryn M. Borman, Sherman Dorn, 2012-02-01 In *Education Reform in Florida*, sociologists and historians evaluate Governor Jeb Bush's nation-leading school reform policies since 1999. They examine the startlingly broad range of education policy changes enacted in Florida during Bush's first term, including moves toward privatization with a voucher system, more government control of public education institutions with centralized accountability mechanisms, and a superboard for all public education. The contributors arrive at a mixed conclusion regarding Bush's first term education policies: while he deserves credit for holding students to higher standards, his policies have unfortunately pushed for equality in a very narrow way. The contributors remain skeptical about seeing significant and sweeping improvement in how well Florida schools work for all students.

Urban School Reform Frederick M. Hess, 2005-01-01 An indispensable book for administrators, policymakers, scholars, and practitioners, *Urban School Reform* presents a revealing portrait of reform efforts while identifying the full range of issues that education reformers will need to address in districts across the country in the years ahead. Today's urban school reformers face a bewildering array of challenges. Urgent problems pertaining to governance, management, labor relations, classroom instruction, and numerous other areas face those who wish to reform and improve urban schools. Having undergone one of the nation's most comprehensive school reform efforts in recent years, San Diego has been a site of nationwide interest, one that is uncommonly well suited to learning about the challenges facing all reformers. This timely book addresses the full range of critical issues pertaining to

urban school reform by looking closely at the recent reform efforts in San Diego In essays by an impressive gathering of scholars and practitioners from across the country the book considers crucial dimensions of reform efforts in the San Diego schools including performance governance the external environment central leadership and management district infrastructure support services and school level instructional efforts The result is a full scale assessment of San Diego s reform efforts a record of unmistakable relevance and value to other urban reform movements throughout the United States

Reforming Economics and Economics Teaching in the Transition Economies Michael Watts, William B. Walstad, 2002-01-01 The volume is of greatest interest to those pursuing issues of the implementation of economics education and its impact at an elementary level on economic understanding and attitudes Through generally careful statistical analysis it shows what can be done even in a most difficult environment as well as the constraints on change imposed by Soviet legacies It is a valuable addition to the literature on economics pedagogy Richard E Ericson Slavic Review This comprehensive and impressive volume presents the first book length multi country investigation of reform of economic education in transition economies Authors from the West and from transition economies describe the major changes in economics content and instruction that occurred in schools and universities throughout nations in Eastern and Central Europe and the former Soviet Union from 1989 to 2000

Problems and Possibilities of Neoliberal Education Reforms Mustafa Toprak, 2024-11-14 Neoliberal education reforms promise but often don t succeed to improve student outcomes and provide more equitable educational opportunities to students with different backgrounds They hold schools accountable for their performance through high stakes testing and linking performance to rewards and sanctions and by empowering parents This book presents a critical and objective appraisal of these neoliberalist education reforms Mustafa Toprak considers the practical elements of neoliberal reforms including voucher systems choice accountability competition within and between schools educational inequalities and high stakes testing and in doing this contributes to social justice debates and the idea of education as a common good He uses reforms in Chile as a case study and offers a critique of its neoliberal educational reforms Rather than discrediting all the central tenets of neoliberal education Toprak considers the pros and cons of these reforms for students teachers schools and societies and proposes new reforms to ensure that policies accurately and responsively address the needs of all stakeholders
