Reforms And Policy Adult Education Research In Nordic Countries:

Reforms and Policy Sigvart Tøsse, 2000 This volume contains 15 articles on recent reforms and policy in the field of adult education

Educational Reform in Europe Richard R. Verdugo, 2014-10-01 Education is a contested terrain The symmetry of education reform among the seven countries examined in this volume is remarkable There is much commonality in the issues they raise in the competing groups battling over education policy their policy choices and the implementation of such policies Also all seven countries address the same issues equity global competition the performance of their students There are at least six important traits characterizing these battles the context the combatants the issues the process and the policies To begin with history culture and governance regime set the context for education policy and reform Second there is the process of how these battles are waged is compromise an outcome or is it a zero sum contest Third there appear to be four groups of combatants each with its own ideology representing a particular social class in society and their views about education and its uses Conservatives Socialists Neo Liberals and Elites Education is an important and valued resource that each status group tries to control and shape to its own views Fourth there are key issues that drive education reform how education can best flatten a social system how education train students for work and how education socializes students to be functioning citizens In recent years fifth issue has emerged student performance on international standardized tests Not only is a society's international reputation based on their students performance but nations see such performance as an indicator of the quality of their educational system and if it is good enough to secure its economic future Finally there are the policies themselves do they reduce or increase inequality who benefits and how The chapters in this volume clearly point out that education reform is not a homogeneous process as some scholars have conjectured Rather education reform involves heated battles over the control of the educational system because education is seen as a key factor in maintaining a society's vision and social structure

What Works in Nordic School Policies? John Benedicto Krejsler, Leif Moos, 2021-03-23 This book offers an original contribution to the area of international research on comparative education policies and the influence of transnational agencies on national school policy and reform With a focus on grasping what the Nordic model or the Nordic dimension means in school and educational policy the book explores in depth the school policy contexts of the five Nordic countries Denmark Finland Iceland Norway and Sweden It demonstrates how these particular national contexts engage with and contextualize transnational collaboration on issues like school reform accountability evidence and what works and digitalization The book situates these policy issues over a long period of time while integrating the latest developments and reforms It demonstrates how context matters It shows how the often elusive but pervasive Nordic dimension can only be fully understood by painstaking scrutiny of the five national contexts their particular trajectories and mutual interactions in formal and informal education

Homo Sapiens Europæus Michael Kuhn, Ronald G. Sultana, 2006 In many ways education mirrors society by reflecting changing and emergent goals and values as well as by contributing to both the reproduction and production of particular life forms In the context of the formative project Europe education is called upon to play an increasingly central role one that is responsive to particular images of the European Union and to its aspirations and goals The widespread conviction is that education and training will reinvigorate ailing economies and that in the context of globalization national and regional competitiveness will only prevail if there is a qualitative continued improvement in human capital This volume critically examines such claims considering the ways in which learning is being constructed across Europe and the implications this has for notions of democratic citizenship and education

New Challenges □ New Learning □ New Possibilities Johan Lovgren, 2023-12-01 The title of this anthology mirrors the theme of the 9th Nordic Conference on Adult Education and Learning The caption reflects how adult education plays an integral part in our societies by advancing new learning that generates possibilities to address contemporary challenges While the chapters reflect the wide variety of research connected to the field of adult education the authors agree on the ideal of combining the development of work life competences with the promotion of democratic empowerment as demonstrated in the tradition of Nordic adult education

Vocational Education in the Nordic Countries Christian Jørgensen, Ole Olsen, Daniel Thunqvist, 2018-05-15 Vocational Education in the Nordic Countries Learning from Diversity is the second of two books that disseminates new and systematic knowledge on the strengths and weaknesses of the different models of vocational education and training VET in four Nordic countries Vocational education in

Europe has resisted standardisation to a higher degree than other fields of education and during the last decade there has been a growth in international comparative VET research. While the Nordic countries provide an ideal case for comparative education studies, the literature in English on the Nordic VET systems is at present very limited. This book provides thorough examinations of VET in Sweden, Denmark, Norway, and Finland. Each section examines the current challenges for VET, compares how these challenges are managed, and explores recent reforms and institutional innovations. Contributors also analyse institutions and policies at the national level and include comparative studies of two occupations at the micro level in the four countries. The book explores what can be learned from the diversity of the VET systems in the Nordic countries, which otherwise have many similarities and share a common heritage in education policy. This volume will help strengthen the knowledge base required for transnational policy learning and for developing vocational education internationally for the future. As a result, the book will be of interest to researchers, academics, and postgraduate students involved in the study of vocational education, educational studies, and educational policy, as well as policy makers.

Governance and Choice of Upper Secondary Education in the Nordic Countries Annette Rasmussen, Marianne Dovemark, 2022-09-03. This work discusses how the complex relationship between welfare policies of equity and market efficiencies, deficiencies of education policies, is handled in local practices. It offers contributions from the five Nordic countries: Norway, Sweden, Denmark, Finland, and Iceland, and pays special attention to questions about access and diversity in upper secondary education. The book draws on a wide range of theoretical frameworks and research projects and provides multiple perspectives of how upper secondary staff and students have experienced reforms of education governance during the last two or three decades. The research projects range from in-depth case studies to the analysis of large-scale data sets and inform practitioners, policy makers, and researchers about practices of education policy that are highly influenced by market forces.
