Luton,2010-11-23 Increased enviromental awareness more demands on local governments a newly invigorated citizen activism and a decaying and overburdened infrastructure have made taking care of our garbage one of the major policy making challenges facing local communities Luton uses the case study of Spokane WA to analyze the public administration and socio political context of solid waste policy making Luton s thorough exploration of Spokane s experience as opens a window onto contemporary issues of solid waste management as well as the complex social and political environment in which public administrators must operate His integration of systems theory in the analysis adds to the book s value as a teaching tool for courses on policy making urban planning public administration and the environment He examines the complex combination of ecological political social and relational dynamics that affect such policies providing insight into inter governmental public policy making

The Decline Effect Dean Brooks,2023-01-31 A crisis is coming for everyone who uses math and science For decades now the classical model of probability the indifference principle and the Gaussian distribution has been breaking down and revealing its limitations in fields from economics to epidemiology Now a new approach has revealed the underlying non classical principle behind all these anomalous laws Pareto s law of elite incomes Zipf s law of word frequencies Lotka s law of scientific publications Kleiber s law of metabolic rates the Clausewitz Dupuy law of combat friction Moore s law of computing costs the Wright Henderson cost law Weibull s law of electronics failures the

Flynn Effect in IQ scores Benford's law of digit frequencies Farr's law of epidemics Hubbell's neutral theory of biodiversity Rogers law of innovation classes Wilson's law of island biogeography Smeed's law of traffic fatalities The general law behind all these particular laws and countless others is the decline effect As a system ages or grows in size the rules of probability subtly change Entropy increases rare items become rarer and average performance measures decline The human meaning of a decline may be positive decreasing costs falling epidemic mortality or negative lower customer loyalty decreasing efficiency but the mathematical pattern is always the same The implications are enormous as these examples show All epidemic diseases decline in infectiousness and in lethality HIV/AIDS went from a highly infectious 95 percent fatal disease to a survivable condition with a latency of decades COVID-19 went from a death rate of 7 percent in early 2020 to under 2 percent in 2022 Hereditary dynasties around the world declined smoothly in lifespan from hundreds of years to tens of years When democracies replaced monarchies the decline in spans of party control continued

Housing for the 21st Century

Carlo Aiello, 2011-01-01 Housing for the 21st Century is a collaboration between thinkers from diverse fields attempting to understand our current habitation necessities an exploration of where we are and where are we heading We start off with the analysis of the economic social and architectural causes and consequences of the largest and fastest migration event of human history the exodus from rural to urban China Opinion is a collection of essays on the broad topic of housing reaching broadly from discussions about the use of new technologies ecology and global warming to the transformation of a house into another member of a family This section also includes a reflection on the legacy of Frank Lloyd Wright and his architectural sensibility to make house and context one single entity In this section you will also find critiques on some of the most forward looking housing projects designed by world class firms such as Steven Holl Architects Asymptote Architecture Herzog & de Meuron Bjarke Ingels Group and Office for Metropolitan Architecture Central to this issue are the winning projects of the Housing Competition organized by eVolo which consists of twenty proposals that through the use of new materials technology novel spatial organizations and combinations of programs present a glimpse of the possible world to come You will find examples of underground housing the regeneration of existing neighborhoods the exploration of new aesthetics from mathematical algorithms and the studies of biogenetic materials used for environmentally responsive claddings
