Leslie P. Francis

Rights And Resources The International Library Of Medicine Ethics And Law:

Rights and Resources Frances H. Miller, 2024-11-01 This title was first published in 2003 The fulfilment of health care rights in a world where resources are scarce is a prominent issue In this volume Frances H Miller introduces studies on a wide variety of aspects of this important yet complex process **Revival: Human Experimentation and Research (2003)** George F. Tomossy, David N. Weisstub, 2017-07-12 This title was first published in 2003 As new medical technologies and treatments develop with increasing momentum the legal and ethical implications of research involving human participants are being called into question as never before Human Experimentation and Research explores the philosophical foundations of research ethics ongoing regulatory dilemmas and future challenges raised by the rapid globalisation and corporatisation of the research endeavour This volume brings together some of the most significant published essays in the field The editors also provide an informative introduction summarizing the area and the relevance of the articles chosen *Death, Dying and the Ending of Life, Volumes I and II* Leslie P. Francis, 2019-01-15 The two volumes of Death Dying and the Ending of Life present the core of recent philosophical work on end of life issues Volume I examines issues in death and consent the nature of death brain death and the uses of the dead and decision making at the end of life including the use of advance directives and decision making about the continuation discontinuation or futility of treatment for competent and incompetent patients and children Volume II on justice and hastening death examines whether there is a difference between killing and letting die issues about physician assisted suicide and euthanasia and questions about distributive justice and decisions about life and death **The Elderly** Martin Lyon Levine, 2017-05-15 Aging is a public health priority that is becoming increasingly important in both developed and less developed nations with individual health care providers and law makers each facing difficult ethical and policy dilemmas The complex issues physicians deal with include informed consent and patient decision making capacity use of advance care planning and decision making by family and medical staff and withdrawing and withholding life sustaining interventions Broader questions include has aging been over medicalized Is it ethical for older patients to receive less medical care than younger ones through unspoken practice or formal rationing Is there inevitable conflict between the generations over scarce medical resources How should physician patient and family confront end of life decisions How have different nations responded to increasing numbers of the elderly Have social values changed as to family responsibility and individual autonomy This volume brings together the most significant published essays in the field **Abortion** Belinda Bennett, 2017-03-02 Abortion remains one of the most complex and controversial issues in contemporary law and bioethics This volume draws together key essays from leading scholars on the ethical and regulatory aspects of abortion The essays explore the complex issues of personhood prenatal life and reproductive rights international perspectives on the regulation of abortion health professionals and the provision of abortion services and prenatal diagnosis and abortion This volume will be an invaluable tool for all those interested in this challenging area Organ and Tissue

Transplantation David Price, 2017-05-15 Organ transplantation has been one of the miracles of modern day medicine but in addition to presenting enormous technical and clinical challenges it throws up major ethical and legal issues principally from the perspective of the donor. Evolving capabilities in the spheres of both organ and tissue transplantation coupled with rapidly escalating demand assert consistent and critical pressure on our ethical and legal principles and frameworks including the expansion of the potential donor pool beyond the conventional categories of donor. This volume brings together seminal papers analyzing such matters in the context of an ever increasingly important area of clinical practice.

Genetics and Gene Therapy Sheila A.M. McLean, 2017-09-08 Genetics and Gene Therapy shows the wide range of the debate and the very real significance that genetics and its associated developments have for human beings individually and collectively. Few areas of science and medicine have resulted in the volume of academic and popular literature as has genetics. The so called revolution in understanding of the causes of disease states and even behavioural traits has focussed public attention on the influence of genes in making us what we are. Rapidly however the potential benefits of such understanding were overtaken in the public mind at least by the question of the possible negative implications of genetic knowledge and associated technologies. The chapters in this volume show just how wide ranging concern has become ranging from regulation to cloning with the fear of discrimination in between. Part One begins with a range of general discussions of about the genetic enterprise itself followed by consideration of some specific questions. Part Two then addresses cutting edge debates in genetics.
