Introduction

You're about to learn a new way to use a computer. If this is your first experience with a computer, you're starting at a great time. If you've used "traditional" computers, you'll really appreciate the Macintosh difference. No more guessing what the computer wants. No more memorizing long commands with names only a programmer could love. With Macintosh, you're in charge.

Macintosh removes a lot of the mystery about using computers. Every action you take has an effect you can see — so you're always in control of what happens. And you don't have to keep useless details in your head, because Macintosh keeps track of them for you. You're free to think about what you want to do rather than how to get your computer to do it.

This chapter teaches what you need to know to use your Macintosh 512K enhanced — how to create documents (the same for anything you create with Macintosh), make changes to them, and put them away. It all happens with a few basic techniques, the same Macintosh techniques you'll use whenever you work with any application on your Macintosh 512K enhanced.
