The Other Rebellion Eric Van Young, 2002-04-01 Mexico's movement toward independence from Spain was a key episode in the dissolution of the great Spanish Empire and its accompanying armed conflict arguably the first great war of decolonization in the nineteenth century. This book argues that in addition to being a war of national liberation the struggle was also an internal war pitting classes and ethnic groups against each other an intensely localized struggle by rural people especially Indians for the preservation of their communities. While local and national elites focused their energies on wresting power from colonial authorities and building a new nation state rural people were often much more concerned about keeping village identities and lifeways intact against the forces of state expansion commercialization and modernization. Conventional wisdom says that Mexican independence was achieved through a cross class and cross ethnic alliance between creole ideologues military leaders and a mass following. This book shows that this is not only an incomplete explanation of what went on in Mexico during the decade of armed confrontation that led to Mexico's independence but also a distortion of Mexican social and cultural history. The author delves deeply into life histories previously unexamined texts statistical social profiling and local historical ethnography to examine the dynamics of popular rebellion. He focuses especially on Mexico's Indian villages but also considers the role of parish priests as insurgent leaders local conflicts over land politics and religious symbols the influence of messianism and millenarianism in popular insurgent ideology and the everyday language of political upheaval.

Popular Movements and State Formation in Revolutionary Mexico Jennie Purnell, 1999 Purnell reconsiders peasant partisanship in the *cristiada* of 1926-29 one episode in the broader Mexican Revolution.

Popular Piety and Political Identity in Mexico's Cristero Rebellion Matthew Butler, 2004-06-17 Dr Butler provides a new interpretation of the cristero war 1926-29 which divided Mexico's peasantry into rival camps loyal to the Catholic Church cristero or the Revolution agrarista. Focusing on the state of Michoacán in western central Mexico the book shows how matters of faith were as crucial to peasants on both sides as political factors. Based on oral testimonies and evidence from many ecclesiastical and state archives this study makes an important contribution to the religious history of the Mexican Revolution.

Urban Water Conflicts Bernard Barraque, 2011-12-02 Urban water conflicts manifested first in Europe in the 19th century and are observed nowadays in various forms throughout the world in particular in developing countries. Main causes of these conflicts are characterized by complex socioeconomic and institutional issues related to urban water management. The debate about public water services ver

Empire and Revolution John Mason Hart, 2002-04-11 Publisher Fact Sheet A sweeping chronicle of the economic and social connections between the US and Mexico as well as the definitive book on US-Mexico relations and their local and global ramifications.

The Roots of Conservatism in Mexico Benjamin T. Smith, 2012-11-15 *The Roots of Conservatism* is the first attempt to ask why over the past two centuries so many Mexican peasants have opted to ally with conservative groups rather than their radical counterparts. Blending socioeconomic history, cultural analysis, and political narrative, Smith's study begins with the late Bourbon period and moves through the early republic, the mid-nineteenth century Reforma, the Porfiriato, and the Revolution, when the Mixtecs rejected Zapatista offers of land distribution, ending with the armed religious uprising known as the last Cristiada, a desperate Cold War bid to rid the region of impious communist governance. In recounting this long tradition of regional conservatism, Smith emphasizes the influence of religious belief, church ritual, and lay-clerical relations both on social relations and on political affiliation. He posits that many Mexican peasants embraced provincial conservatism, a variant of elite or metropolitan conservatism which not only comprised ideas on property hierarchy and the state but also the overwhelming import of the church to maintaining this system.

Specters of Revolution Alexander Aviña, 2014 *Specters of Revolution* examines the development of two guerrilla insurgencies led by schoolteachers in Mexico during the 1960s. Relying upon recently declassified documents and oral histories, it chronicles a history of nonviolent peasant political action underscored by long-held rural utopian ideals radicalized by persistent state terror.

Mexico, 1848-1853 Pedro Santoni, Will Fowler, 2018-08-06 Historians have paid scant attention to the five years that span from the conclusion early in 1848 of Mexico's disastrous conflict with the United States to the final return to power in April 1853 of General Antonio López de Santa Anna. This volume presents a more thorough understanding of this pivotal time and the issues and experiences that then affected Mexicans. It sheds light on how elite politics, church-state relations, institutional affairs, and peasant revolts played a crucial role in Mexico's long-term historical development and also explores topics like marriage and everyday life and the public trials and executions staged in the aftermath of the war with the U.S.
