## **Rise Of The Social Sciences And The Formation Of Modernity The:**

*The Rise of the Social Sciences and the Formation of Modernity* J. Heilbronn, Lars Magnusson, Björn Wittrock, 1998 This volume offers one of the first systematic analyses of the rise of modern social science. Contrary to the standard accounts of various social science disciplines the essays in this volume demonstrate that modern social science actually emerged during the critical period between 1750 and 1850. It is shown that the social sciences were a crucial element in the conceptual and epistemic revolution which paralleled and partly underpinned the political and economic transformations of the modern world. From a consistently comparative perspective a group of internationally leading scholars takes up fundamental issues such as the role of the Enlightenment and the French Revolution in the shaping of the social sciences, the changing relationships between political theory and moral discourse, the profound transformation of philosophy and the constitution of political economy and statistics.

**The Rise of the Social Sciences and the Formation of Modernity** J. Heilbronn, Lars Magnusson, Björn Wittrock, 2014-09-01 Frontiers of Sociology Peter

Hedström, Björn Wittrock, 2009-01-01 The 37th World Congress of the IIS focused on theory and research at the forefront of sociology and the relationship between sociology and its neighbouring disciplines. This volume constitutes a sustained effort by prominent sociologists and other social scientists to assess the current standing of sociology. It is a stocktaking of the unique nature of sociology in the light of advances within the discipline itself and within a range of neighbouring disciplines. Some of the chapters outline institutional and professional strategies for sociology in the new millennium. Others trace scholarly advances and propose ambitious research programmes drawing on recent developments not only within traditional neighbouring disciplines such as history, political science and economics but also within the cognitive, cultural and mathematical sciences. Contributors include Hans Peter Blossfeld, Raymond Boudon, Richard Breen, Christofer R. Edling, S. N. Eisenstadt, Jack Goldstone, Philip Gorski, Peter G. Renssen, Ulf Hannerz, Peter Hedström, Hans Joas, Dietrich Rueschemeyer, Jens Rydgren, Neil Smelser, Aage B. S. Renssen, Richard Swedberg, Piotr Sztompka, Peter Wagner and Björn Wittrock. *Culture and Context in World Politics* Stephanie Lawson, 2006-09-05 This wide ranging historically informed study examines the career of

the culture concept and related notions of context in comparative and international politics tracing connections through the disciplines of anthropology and history as well as through issues in nationalism and democracy

**Languages of Belief and Early Sociology in Nineteenth-Century France** Michiel Van Dam, 2024-09-27 This book presents a new reading of the history of French social science and religion through an investigation of early sociology's techniques for narrating the category of belief. The author argues that by looking at the history of social sciences in this manner we gain a deeper understanding of both our present debates on post secularity as well as our modernist past both of which were thoroughly shaped by their reflections and critiques on the notion of belief yet failed to enter into any sort of meaningful communication with each other. This book seeks to rectify this failure by introducing the concept of belief languages an anthropological framework designed to historicize different discussions on belief and allow for their comparative description and analysis.

Sociological Knowledge and Collective Identity Stavit Sinai, 2019-03-28 Sociology emerging in the 19th century as the study of national societies is the intellectual product of its time power relations and social imaginaries. As a discursive practice that was enmeshed in the meta narratives of modernity the discipline of sociology bears the inherent capacity to shape socially shared concepts and construct collective identities. This book examines the relationships between sociology and projects of national identity construction and presents a critique of Shmuel N Eisenstadt the prominent Israeli sociologist known as the father of Israeli sociology. The book focuses on Eisenstadt's sociology of Israel as a case of knowledge construction within an ideological system and examines the relationships between his various sociological analyses of Israeli society and the Zionist imaginary namely the deeply entrenched political myths and historiographical narratives that constitute Israel's hegemonic national identity. By emphasizing the interrelation between textuality identity and loaded language the volume seeks to demythologize Eisenstadt's sociology of Israel. Three major concepts in Eisenstadt's scholarship are specifically thematized integration civilization and modernities. In each of these foci the author shows how Eisenstadt's sociological conjectures reproduce dominant Zionist historiographical representations of the past rationalize prevalent social hierarchies reify the boundaries of a national collective Self and render legitimacy to Israel's governing ethnocratic tendencies underlying the premises of the Zionist settler colonial project. Sociological Knowledge and Collective Identity will appeal to those interested in the interconnectedness of sociology and political memory as well as in a radical postcolonial reconstruction of sociology.

Constructing Global Challenges in World Politics Alina Isakova, Malte Neuwinger, Robin Schulze Waltrup, Oday Uraiqat, 2024-06-24 This interdisciplinary book investigates the problematization of global challenges in world politics by analyzing what they are and how they come to be. Offering a

conceptual framework including four modes of construction universalizing bundling upscaling and creating urgency this book provides a heuristic method for understanding how the process of rendering an issue a global challenge unfolds It examines the role of the global challenges discourse which may either reinforce or challenge the dominant orders of world politics such as the capitalist market based system and the liberal international order As a consequence the global challenges discourse facilitates the emergence of new actors and policy fields The book will be of interest to students academics and practitioners of global governance international organizations and more broadly international political economy and international relations

Social Studies of Science and Technology: Looking Back, Ahead B. Joerges, H. Nowotny, 2012-12-06 BERNW ARD

JOERGES AND HELGA NOWOTNY YET ANOTHER TURN The thing that doesn't fit is the thing that's most interesting Richard Feynman This volume was originally conceived as a contribution to yet another turn not captured by one of the many adjectives that have served to describe the collective meandering of the scholarly community in search of direction It was meant to mark the millennial turn a seemingly purely chronological event but one in search for great meanings and invested with loaded significances The editors wanted to seize the opportunity of the moment in order to pause and reflect on the sociology and history of social studies of science and technology The moment came and went and the new millennium barely nine months later thrust its historical marker upon the world through a horrendous and cruel shock in an unforeseen and unforeseeable way Since then the world appears more vulnerable and volatile fragmented and fraught with uncertainty The universal values as bequeathed by the Enlightenment are either refused or appear refuted The dream of a universal civilization which has accompanied the unfolding of the existing multiple modernities in their historically unique trajectories has been discarded and its promises in tatters
