Rise Of The Trading State Commerce And Conquest In The Modern World:

Rise Trading State Richard Rosecrance, 1987-05-31 What will power look like in the century to come Imperial Great Britain may have been the model for the nineteenth century Richard Rosecrance writes but Hong Kong will be the model for the twenty first We are entering the Age of the Virtual State when land and its products are no longer the primary source of power when managing flows is more important than maintaining stockpiles when service industries are the greatest source of wealth and expertise and creativity are the greatest natural resources Rosecrance's brilliant new book combines international relations theory with economics and the business model of the virtual corporation to describe how virtual states arise and operate and how traditional powers will relate to them In specific detail he shows why Japan's kereitsu system which brought it industrial dominance is doomed why Hong Kong and Taiwan will influence China more than vice versa and why the European Union will command the most international prestige even though the U S may produce more wealth

The Geopolitics of Super Power Colin S. Gray, 1988-01-01 Discusses the reasons for Soviet American antagonism looks at four alternative policies for U S security and stresses the importance of deemphasizing nuclear weapons [The Rise of the Trading State](#) Richard N. Rosecrance, 1985 *The Oxford Handbook of Transformations of the State* Stephan Leibfried, Evelyn Huber, Matthew Lange, Jonah D. Levy, Frank Nullmeier, John D. Stephens, 2015-06-11 This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries the post Communist world and the Global South Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention from security to financial regulation migration welfare states democratization and quality of democracy ethno nationalism and human development The volume makes a compelling case that far from losing its relevance in the face of globalization the state remains a key actor in all areas of social and economic life changing its areas of intervention its modes of operation and its structures in adaption to new international and domestic challenges **US-China Relations in the 21st Century** Zhiquan Zhu, 2006-04-18 US China Relations in the 21st Century addresses the bilateral relations of these two nations on an international domestic societal and individual level between 1990 and 2005 Peaceful power shifts remain a central dilemma in world politics since historically power transition from a dominant nation to a challenger has been associated with international wars This book examines whether China and the US can learn from history and manage a potential power

transition peacefully Zhiquan Zhu selects two important cases of power transitions in history as the background for this study power rivalry between Great Britain and Germany that led to the First World War the peaceful power transition from Great Britain to the United States US China Relations in the 21st Century contributes to the current International Relations theory by proposing a new analytical model on global power transition and providing recommendations for peacefully handling a potential power transition from the US to China in the future This original and comprehensive study is essential reading for scholars of US and Chinese foreign policy world politics and international relations *Mobilizing the Past* Steve

Chan, 2025-07-29 Historical analogies are often utilized to frame and formulate foreign policies illuminate issues of war and peace and mobilize support for particular political programs The historical record however can be distorted in a variety of ways leading to overly simplistic misleading conclusions that impair sound policy and scholarship This danger is most imminent and palpable when there exists premature academic consensus pressure to conform to political orthodoxy intellectual complacency and cognitive resistance to alternate interpretations of historical episodes We must be especially vigilant to guard against these pitfalls when deliberating one of the most high stakes topics in global politics the alarming potential for military conflict between the United States and China Past precedents and parallels regularly inform analyses of China's relations with the US By highlighting serious errors of commission or omission in popular narratives and scholarly studies concerning international relations in general and Sino American relations in particular Steve Chan challenges commonly accepted lessons of history and cautions against the misuse and misunderstanding of the past in examining China's rise and its implications for international peace and stability This far reaching book presents alternative overlooked historical accounts that are highly pertinent to Sino American relations today making it essential for researchers and students of international affairs **The ^AUnited States and the End of the Cold War** John Lewis Gaddis, 1994-04-28

The Cold War ended with an exhilarating wave of events the toppling of the Berlin Wall the rise of the dissident poet Vaclav Havel the revolution in Romania Americans rejoiced at the dramatic conclusion of the long struggle But victories in wars hot or cold tend to unfocus the mind writes John Gaddis It can be a dangerous thing to have achieved one's objectives because one then has to decide what to do next In *The United States and the End of the Cold War* Gaddis provides a sharp focus on the long history of the Cold War shedding new light on its sudden ending as well as on what might come next In this provocative insightful book Gaddis offers a number of thoughtful essays on the history of international relations during the last half century His reassessments of important figures and themes from the Cold War are sometimes surprising For example he portrays John Foster Dulles and Ronald Reagan as far more flexible and perceptive statesmen than the missile toting caricatures depicted in editorial cartoons And he takes a second look at the importance of espionage and intelligence in Cold War history a field often left to buffs and spy novelists Most important he focuses on the central elements in superpower relations In an eloquent account of the American style of foreign policy in the twentieth century for instance he

explores how Americans having learned the lesson of Adolf Hitler consistently equated the forms of foreign governments with their external behavior assuming that authoritarian states would be aggressive states He also analyzes the tectonics of Cold War history demonstrating how long term changes in international affairs and Soviet bloc countries built up pressures that led to the sudden earthquakes of 1989 And along the way Gaddis illuminates such topics as the role of morality in American foreign policy the relevance of nuclear weapons to the balance of power and the objectives of containment He even includes and criticizes an essay entitled How the Cold War Might End written before the dramatic events of recent years to demonstrate how quickly the tide of history can overwhelm contemporary analysis Gaddis concludes with a thoughtful consideration of the problems and forces at work in the post Cold War world Author of such works as *The Long Peace* and *Strategies of Containment* John Lewis Gaddis is one of the leading authorities on postwar American foreign policy In these perceptive highly readable essays he provides a fresh assessment of the evolution of the Cold War and insight into the shape of things to come

Innovation and the Arms Race Matthew Evangelista, 2023-08-15 *Innovation and the Arms Race* investigates the causes and mechanisms of the technological arms race between the United States and the Soviet Union Challenging the commonly held notion that Soviet weapons innovation processes simply mirror those of the United States Matthew Evangelista shows that the United States usually leads in introducing new military technology while the Soviets typically react to American initiatives Evangelista bases his study of pivotal nuclear weapons development decisions on a variety of US and USSR primary sources including the memoirs of weapons designers and scientists declassified intelligence analyses Soviet Academy of Science documents and Nikita Khrushchev's taped reminiscences He finds that in the United States impetus for innovation comes from the bottom at the initiative of corporate or government researchers and military officials whereas the centralized Soviet system produces innovations from the top in response to foreign developments A revelatory analysis of US military policy Soviet American relations and weaponry development *Innovation and the Arms Race* bears lessons for the study of great power competition and military innovation today

Theories of International Cooperation and the Primacy of Anarchy Jennifer Sterling-Folker, 2002-01-17 Argues the state and not markets should be the center of analysis when attempting to explain international cooperation
