THE JAN PALFIJN SYMPOSIA In 1979 the Department of Obstetrics and Gynaecology of the Jan Palfijn Hospital in Merksem Antwerp celebrated its 25th Anniversary. To mark the occasion the first symposium was organized, the theme chosen being hysteroscopy. Thanks to the cooperation of specialists from both within and outside Belgium the event attracted such a large attendance that it was decided to follow up this first venture with others. In the light of the experience gained from the first symposium we established the Jan Palfijn Foundation for Gynaecological and Obstetrical Didactics, the reasons for this being budgetary and in particular organizational. This approach made it possible to attract the cooperation of enthusiastic fellow workers from outside the hospital on a permanent or ad hoc basis and hence to reach a much wider group of experts in all fields both at home and abroad. In 1981 the second symposium was held at the Jan Palfijn Hospital, the topic being echography in obstetrics and gynaecology. Almost all of the Belgian universities were represented and papers were presented by confreres from practically all of the EEC countries. When the third symposium was held in 1982 again on hysteroscopy the speakers and audience could literally hardly be squeezed into the Jan Palfijn Hospital's facilities. The fourth symposium was accordingly organized in the modern luxurious facilities of the new administration building of the Antwerp Provincial Authority.

Primary Maternal and Neonatal Health Fe Del Mundo, 2012-12-06 The First International Congress on Maternal and Neonatal Health IAMANEH chose as its theme Primary Maternal and Neonatal Health Care: A Global Concern. If the primary goal of all World Health Organization member states of Health For All By The Year 2000 is to be met, the most difficult challenge lies in the area of maternal and neonatal health care. Indeed, the preventable mortality of mothers and their newborns related to the quality of maternity care extracts a greater toll in life expectancy than any specific disease category. Such mortality is but the tip of an iceberg of morbidity that saps the quality of life of a majority of this world's citizens. They are the less privileged by accident of birth only. An intolerable situation exists. These Proceedings reflect a world concern by

menters of health academicians scientists and providers of maternal and neonatal care No blueprint is offered for solution of this world's greatest health problem But the Proceedings do contain an accurate description of the problem and revealing epidemiological diagnoses that both lay bare deficiencies in care and suggest the way to improve health for all The implications of these papers will not bring comfort to those responsible for the allocation of scarce resources for health They rather suggest radical changes are needed and that failure to make these changes could mean a catastrophic and meaning less loss of life during the balance of this century **Second-Trimester Abortion** G. Berger, W.E. Brenner, L.G.

Keith, 2012-12-06 Irvin M Cushner MD MPH It is both remarkable and at the same time a sign of this era of rapid change that one can refer back to the infancy of a field which has existed for barely more than a decade Yet one now reads of the maturing of the family planning and abortion fields both of which were incorporated into our society and integrated into our health care system within the past ten years Indeed in the very year that this book is being prepared we note the tenth anniversaries of several significant events of 1970 1 the enactment of Title X of the Public Health Service Act establishing a Federal program in family planning 2 the first issuance by a major health related organization the APHA of a policy statement advocating repeal of all abortion laws and 3 the enactment by New York State of an abortion law whose only restriction was that it be performed by a licensed physician and the subsequent action the first by any local health department New York City to assure both its implementation and its quality They were indeed eventful days These three events seemed to presage a then unprecedented acceptance of fertility regulation as a right and as a needed service
