Circulation Weather types as a tool in atmospheric, climate and environmental research Alexandre M. Ramos,David Barriopedro,Emanuel Dutra,2015-09-11 Classifications of circulation weather systems have a long history in meteorology and climatology Starting with manual classifications over specific regions of the globe these tools generally called catalogs of synoptic types were restricted mainly to weather forecasting and historical climate variability studies In the last decades the advance of computing resources and the availability of datasets have fostered the development of fast and objective methods that process large amount of data In recent years numerous methods of circulation type classification have been designed showing their usefulness on a wide range of applications in scientific domains related to weather climate and environment This Research Topic highlights methodological advances in circulation

weather types and also their applications to different research areas The articles included in this research topic show that circulation weather types can be used not only in Europe where they have been always more frequent but also applied to other regions of the world
