Sabra, 2003 Recent historical research and new perspectives on the Islamic scientific tradition *The Making of Islamic Science* Muzaffar Iqbal, 2009 **Science Under Islam** Sayyed M. Deen, 2007 The book describes the rise of science and technology in the Islamic Golden Age examines the causes that led to its decline reviews failed later attempts for its revival and finally discusses social and religious reformation needed for it to flourish in contemporary Muslim societies Social reformation covers rule of law democratic infra structure and human rights while religious reformation involves the reinterpretation of scripture It is argued that without such a social and religious reformation Muslims a quarter of the earth's population will be less able to participate in the science driven 21st century world Note that Muslim leaders in the UK and elsewhere are not addressing the need of such an essential reformation without which Muslims as a people will remain in a limbo and thus continue to be vulnerable to extremist ideas Therefore this book should be a must for all those interested in the creation of a harmonious one world Look at www.scienceunderislam.com for more information *Can Science Come Back to Islam?* K. Razi Naqvi, The Muslim world aware of the paramount importance of scientific knowledge is searching for the route to an affirmative answer to the question raised in the title but it seems to shy away from asking some closely related questions which are Who brought science to Islam Who banished science from Islam Who can bring science back to Islam This book seeks to answer all these questions Its author who has had a lifelong interest in the history of science and religion and has spent five decades at the forefront of scientific research tries to convince contemporary Muslims to forsake regressive and anti scientific interpretations of their scriptures to warn them that the gap between dogma and fact cannot be papered over that progress will be possible and that science will come back to Islam only when a clean break is made from those whose teaching has led to the current malaise The book ends with the pregnant question How can Western voters help in this important project *Islamic Perspectives on Science* Ali Unal, 2007 Aiming to unveil the revelation that Islam is a religion that encourages and supports scientific research this collection of essays by Muslim scholars focuses on the importance of the universe in Islamic tradition The contributors offer extensive historical and doctrinal evidence that reveals the harmony between Islam and positive sciences *Studies in the Making of Islamic Science: Knowledge in Motion* Muzaffar Iqbal, 2017-05-15 Situated between the Greek Indian and Persian scientific traditions and modern science the Islamic scientific tradition received enriched transformed and then bequeathed scientific knowledge to Europe The articles selected for this volume explore the fascinating process of knowledge in motion between different civilizations *Studies in the Making of Islamic Science* Muzaffar Iqbal, 2012 Brings together the most important influential articles dealing with various aspects of the relationship between Islam and science It sheds new light on historical links between modern science and the Islamic scientific tradition and also includes special studies on major voices in Islam and science discourse Islam and Science Muzaffar Iqbal, 2018-05-08 This title was first published in 2002 This text seeks

to provide the necessary background for understanding the contemporary relationship between Islam and modern science. Presenting an authentic discourse on the Islamic understanding of the physical cosmos, Muzaffar Iqbal explores God's relationship to the created world and the historical and cultural forces that have shaped and defined Muslim attitudes towards science. What was Islamic in the Islamic scientific tradition? How was it rooted in the Qur'anic worldview and whatever happened to it? These are some of the facets of this account of a tradition that spans eight centuries and covers a vast geographical region. Written from within this ground-breaking exploration of some of the most fundamental questions in the Islam and science discourse, it explores the process of appropriation and transformation of the Islamic scientific tradition in Europe during the three centuries leading up to the Scientific revolution.

Development of Science & Technology in Islamic History Shabeer Ahmed, 2015-11-10

The spectacular advances in science and technology that have occurred over the last century have led some to believe that only Western Capitalism can produce material progress. Does religion hinder man's progress in life? Is there a contradiction between Islam and science? Why are the countries of the Islamic world so technologically backward? Is Islam capable of addressing man's diverse problems in the 21st century? This book tackles these questions by exploring the relationship between Islam and science by examining how science bloomed under Islam while Europe struggled in the Dark Ages and by illustrating a distinct vision for future scientific and technological advancement under the Islamic State.
