The Law & Politics of the Caspian Sea in the Twenty-first Century Bahman Āqāyī,Bahman Aghai Diba,2003 The Caspian Sea has been the focus of states and peoples in and out of the area for the last decade The surrounding states are interested in getting a decent share of the lake s resources The industrial states are interested in taking the oil gas and other natural wealth of the Caspian Sea to world markets as soon as possible The populations of the littoral states which are all ruled by undemocratic regimes are concerned with whether their governments will retain their

just rights in the Caspian Sea They realise that the highest priority for their current rulers is to keep their grip on power not their nation s present or future interests How have the respective governments in Azerbaijan the Federation of Russia Kazakhstan Turkmenistan and especially Iran thought and acted in regard to the situation of the Caspian Sea and their interests The issue has a special reference to Iran because it is experiencing a terrible situation in regard to the Caspian Sea due to the poor management of its foreign policy and international relations Iran will end up with the smallest share of the Caspian Sea whether it likes it or not This is a serious setback for a country that once shared the Caspian Sea with the former Soviet Union Iran s mismanagement of its Caspian Sea rights is a political and diplomatic lesson in what not to do This book gives everyone even those without legal or political backgrounds in this issue an opportunity to survey the facts and history and to analyse the legal and political realities of the present political situation of the world s largest lake

Biogeochemical Dynamics at Major River-Coastal Interfaces Thomas S. Bianchi, Mead A. Allison, Wei-Jun Cai, 2013-10-28 This volume provides a state of the art summary of biogeochemical dynamics at major river coastal interfaces for advanced students and researchers River systems play an important role via the carbon cycle in the natural self regulation of Earth s surface conditions by serving as a major sink for anthropogenic CO₂ Approximately 90 percent of global carbon burial occurs in ocean margins with the majority of this thought to be buried in large delta front estuaries LDEs This book provides information on how humans have altered carbon cycling sediment dynamics CO₂ budgets wetland dynamics and nutrients and trace element cycling at the land margin interface Many of the globally important LDEs are discussed across a range of latitudes elevation and climate in the drainage basin coastal oceanographic setting and nature and degree of human alteration It is this breadth of examination that provides the reader with a comprehensive understanding of the overarching controls on major river biogeochemistry

River Plants of Western Europe S. M. Haslam, 2014-05-08 Originally published in 1987 this book describes and discusses the vegetation of rivers and other watercourses in Europe with an emphasis upon distributional community and historical ecology It was firmly based upon many years of field investigations carried out by the author in various countries in the European Economic Community The main purpose of the text was to increase the understanding of river vegetation in relation to the varying physical characteristics of the watercourses The rivers of the EEC are considered in detail with an emphasis upon the influences of landscape geology climate settlement patterns water use and management and pollution This book will be of value to anyone with an interest in river botany

Geomorphic Analysis of River Systems Kirstie A. Fryirs, Gary J. Brierley, 2012-12-10 Filling a niche in the geomorphology teaching market this introductory book is built around a 12 week course in fluvial geomorphology Reading the landscape entails making sense of what a riverscape looks like how it works how it has evolved over time and how alterations to one part of a catchment may have secondary consequences elsewhere over different timeframes These place based field analyses are framed within their topographic climatic and environmental context Issues and principles presented in the first part of

this book provide foundational understandings that underpin the approach to reading the landscape that is presented in the second half of the book In reading the landscape detective style investigations and interpretations are tied to theoretical and conceptual principles to generate catchment specific analyses of river character behaviour and evolution including responses to human disturbance This book has been constructed as an introductory text on river landscapes providing a bridge and or companion to quantitatively framed or modelled approaches to landscape analysis that are addressed elsewhere Key principles outlined in the book emphasise the importance of complexity contingency and emergence in interpreting the character behaviour and evolution of any given system The target audience is second and third year undergraduate students in geomorphology hydrology earth science and environmental science as well as river practitioners who use geomorphic understandings to guide scientific and or management applications The primary focus of Kirstie and Gary s research and teaching entails the use of geomorphic principles as a tool with which to develop coherent scientific understandings of river systems and the application of these understandings in management practice Kirstie and Gary are co developers of the River Styles Framework and Short Course that is widely used in river management decision making and training Additional resources for this book can be found at www.wiley.com/go/fryirs_riversystems **The American Schoolmaster**, 1928

Fishing, Gone? Sid Dobrin, 2019-03-27 Humans have a rapacious relationship with the world s ocean extracting immeasurable quantities of its inhabitants and resources while simultaneously depositing unbound sums of pollution into it If we are to move toward sustainable practices then we must first move toward ways of thinking about fish and fisheries beyond mere economic agendas And there is one group in particular who could make an impact saltwater anglers Recreational saltwater fishing is big business and big culture The industry is one of the largest in the United States but that has not translated into a cohesive effort agenda or ethic Saltwater anglers a diverse group with a range of motivations do not belong to a single organization through which to galvanize significant voting or lobbying power toward conservation regulation As a result federal policymakers have traditionally focused on commercial harvesting interests Dubbed the most contemplative of pastimes recreational fishing provides a valuable perspective on how humans interact with saltwater environments Fishing Gone builds on this tradition of reflection and opens up the saltwater sportfishing life as a method for thinking through the current status of marine fisheries and environment Author Sid Dobrin calls on fellow saltwater anglers to reconsider their relationship to fishes and the ocean the sport can no longer be only about the joy and freedom of fishing but it must also be about living for the ocean living with the ocean and living through the ocean It is about securing the opportunity to fish on while meeting the economic and environmental challenges that lie ahead
