Roadway Lighting and Safety Omar Smadi, 2011 This Phase II project follows a previous project titled Strategies to Address Nighttime Crashes at Rural Unsignalized Intersections Based on the results of the previous study the Iowa Highway Research Board IHRB indicated interest in pursuing further research to address the quality of lighting rather than just the presence of light with respect to safety The research team supplemented the literature review from the previous study specifically addressing lighting level in terms of measurement the relationship between light levels and safety and lamp durability and efficiency The Center for Transportation Research and Education CTRE teamed with a national research leader in roadway lighting Virginia Tech Transportation Institute VTTI to collect the data An integral instrument to the data collection efforts was the creation of the Roadway Monitoring System RMS The RMS allowed the research team to collect lighting data and approach information for each rural intersection identified in the previous phase After data cleanup the final data set contained illuminance data for 101 lighted intersections of 137 lighted intersections in the first study Data analysis included a robust statistical analysis based on Bayesian techniques Average illuminance average glare and average uniformity ratio values were used to classify quality of lighting at the intersections

Congress. House. Public Works,1966 *Light Pollution Handbook* Kohei Narisada,Duco Schreuder,2013-06-05 This book deals with light pollution and about the ways to reduce it Light pollution is one of the negative side effects of artificial outdoor lighting The term light pollution is an unhappy one but as no better alternative seems to exist it will be used throughout this book The function of all outdoor lighting is to

enhance the visibility or the aesthetics in the nighttime environment The light should come where it is needed If not it is spilled causing economic and environmental losses as well as disturbance and discomfort The overall effects are termed light pollution a major form of light pollution is the glow extending over the night sky Sky glow is discussed in many astronomical textbooks and in many popular brochures The present book is primarily aimed at those responsible for outdoor lighting installations Thus an engineering approach has been chosen The level of the book is that of college or University level The book is organized in two parts The first seven chapters cover the areas of general interest and conclude with recommendations The second part deals with the scientific and engineering elaboration of the first part A number of examples are included that refer to specific outdoor lighting installations and projects that are directly related to the reduction of light pollution Finally some information is given about the authors

Outdoor Lighting: Physics, Vision and Perception Duco Schreuder, 2008-08-15 The present book is based on the experience of the author The experience is mainly the result of years of research of consulting work and in participation in policy decision making in many fields most but not all related to outdoor lighting To some degree the book represents the preference of the author The selection of the subjects is based on more than 50 years of experience of what is desirable to know for persons engaged in scientific research or practical application in the fields of lighting and vision The subjects deal with a number of fundamental aspects The theorists must have them at their fingertips whereas the practical engineers may assume them as known in their daily work The selection of subjects is based in part by the questions that came to the author over the years but even more by the preference of the author himself In this respect it is a personal book Thus it should be stressed that the book is not a handbook or even a textbook many subjects that commonly are treated in such books are not included here Not because they lack importance but because the author feels that they are adequately treated elsewhere Some relevant works are mentioned in the References Over the years the author has been engaged in giving courses on vision and lighting lately more in particular on Masterclasses on a post graduate or post doctorate level
