Science Fiction and the Dismal Science Gary Westfahl, Gregory Benford, Howard V. Hendrix, 2019-11-27 Despite the growing importance of economics in our lives literary scholars have long been reluctant to consider economic issues as they examine key texts This volume seeks to fill one of these conspicuous gaps in the critical literature by focusing on various connections between science fiction and economics with some attention to related fields such as politics and government Its seventeen contributors include five award winning scholars five science fiction writers and a widely published economist Three topics are covered what noted science fiction writers like Robert A. Heinlein Frank Herbert and Kim Stanley Robinson have had to say about our economic and political future how the competitive and ever changing publishing marketplace has

affected the growth and development of science fiction from the nineteenth century to today and how the scholars who examine science fiction have themselves been influenced by the economics of academia Although the essays focus primarily on American science fiction the traditions of Russian and Chinese science fiction are also examined A comprehensive bibliography of works related to science fiction and economics will assist other readers and critics who are interested in this subject

Three Science Fiction Novellas J. H. Rosny, 2012-01-01 Probably the greatest of all French speaking science fiction writers after Jules Verne I was unprepared for the power and beauty Michael Dirda The Washington Post To the short list that includes Jules Verne and H G Wells as founding fathers of science fiction the name of the Belgian writer J H Rosny A n must be added He was the first writer to conceive and attempt to narrate the workings of aliens and alternate life forms His fascination with evolutionary scenarios and long historical vistas from first man to last man are important precursors to the myriad cosmic epics of modern science fiction Until now his work has been virtually unknown and unavailable in the English speaking world but it is crucial for our understanding of the genre Three wonderfully imaginative novellas are included in this volume The Xipehuz is a prehistoric tale in which the human species battles strange geometric alien life forms Another World is the story of a mysterious being who does not live in the same acoustic and temporal world as humans The Death of the Earth is a scientifically uncompromising Last Man story The book also includes an insightful critical introduction that places Rosny s work within the context of evolutionary biology Rosny was a species pluralist and believed that human beings are no more entitled than any other creature to reign supreme He would have felt right at home among the Men In Black

Science Fiction, Canonization, Marginalization, and the Academy Gary Westfahl, George Slusser, 2002-01-30 Science fiction occupies a peculiar place in

the academic study of literature For decades scholars have looked at science fiction with disdain and have criticized it for being inferior to other types of literature But despite the sentiments of these traditionalists many works of science fiction engage recognized canonical texts such as the Odyssey and many traditionally canonical works contain elements of science fiction More recently the canon has been subject to revision as scholars have deliberately sought to include works that reflect diversity and have participated in the serious study of popular culture But these attempts to create a more inclusive canon have nonetheless continued to marginalize science fiction This book examines the treatment of science fiction within the academy The expert contributors to this volume explore a wide range of topics related to the place of science fiction in literary studies These include academic attitudes toward science fiction the role of journals and cultural gatekeepers in canon formation and the marginalization of specific works and authors by literary critics In addition the volume gives special attention to multicultural and feminist concerns In discussing these topics the book sheds considerable light on much broader issues related to the politics of literary studies and academic inquiry

The Monomyth in American Science Fiction Films Donald E. Palumbo, 2014-11-05 One of the great intellectual achievements of the 20th century Joseph Campbell's *The Hero with a Thousand Faces* is an elaborate articulation of the monomyth the narrative pattern underlying countless stories from the most ancient myths and legends to the films and television series of today The monomyth's fundamental storyline in Campbell's words sees the hero venture forth from the world of the common day into a region of supernatural wonder fabulous forces are there encountered and a decisive victory is won the hero comes back from this mysterious adventure with the power to bestow boons to his fellow man Campbell asserted that the hero is each of us thus the monomyth's endurance as a compelling plot structure This study examines the monomyth in the context of Campbell's *The Hero* and discusses the use of this versatile narrative in 26 films and two television shows produced between 1960 and 2009 including the initial Star Wars trilogy 1977 1983 *The Time Machine* 1960 *Logan's Run* 1976 *Escape from New York* 1981 *Tron* 1982 *The Terminator* 1984 *The Matrix* 1999 the first 11 *Star Trek* films 1979 2009 and the Sci Fi Channel's miniseries *Frank Herbert's Dune* 2000 and *Frank Herbert's Children of Dune* 2003
