Jean-Louis Cohen,2014-08-15 Everyone knows Notre Dame the Eiffel Tower and the chateaux of the Loire Valley but French architects have also produced some of the most iconic buildings of the twentieth century playing a central role in the emergence and development of modernism In France Jean Louis Cohen presents a complete narrative of the unfolding architectural modernity in the country grappling not only with the buildings but also with the political and critical context surrounding them Cohen examines the developments in urban design and architecture within France depicting the continuities and breaks in French architecture since 1900 against a broader international background Describing the systems of architectural exchange with other countries including Italy Germany Russia and the United States he offers a new view on the ideas projects and buildings otherwise so often considered only from narrow nationalistic perspectives Cohen also maps the problematic search for a national identity against the background of European rivalries and France s colonial past Drawing on a wealth of recent research this authoritatively written book will challenge the way design professionals and historians view modern French architecture **Robert Mallet Stevens, architecte** Jean-Pierre Lyonnet,2005 Quinze sp

Robert Mallet-Stevens Robert Mallet-Stevens,2018-06-14 **The stadium century** Robert W. Lewis,2016-12-08 The

stadium century traces the history of stadia and mass spectatorship in modern France from the velodromes of the late nineteenth century to the construction of the Stade de France before the 1998 soccer World Cup. As the book demonstrates, the stadium was at the centre of debates over public health and urban development and proved to be a key space for mobilising the urban crowd for political rallies and spectator sporting events alike. After 1945, the transformed French stadium constituted part of the process of postwar modernisation but also was increasingly connected to global transformations to the spaces and practices of sport. Drawing from a wide range of sources, the stadium century links the histories of French urbanism, mass politics and sport through the stadium in an innovative work that will appeal to historians, students of French history and the history of sport and general readers alike. *History of Architectural Theory*

Hanno-Walter Kruft, 1994. As the first comprehensive encyclopedic survey of Western architectural theory from Vitruvius to the present, this book is an essential resource for architects, students, teachers, historians and theorists. Using only original sources, Kruft has undertaken the monumental task of researching, organizing and analyzing the significant statements put forth by architectural theorists over the last two thousand years. The result is a text that is authoritative and complete, easy to read without being reductive. **Modern Architecture**

Alan Colquhoun, 2002-04-25. This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures. The work of the main architects of the movement, such as Frank Lloyd Wright, Adolf Loos, Le Corbusier and Mies van der Rohe, is re-examined, shedding new light on their roles as acknowledged masters. Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s, revealing the often contradictory demands of form, function, social engagement, modernity and tradition. Architecture's Historical Turn

Jorge Otero-Pailos, 2013-11-30. Architecture's Historical Turn traces the hidden history of architectural phenomenology, a movement that reflected a key turning point in the early phases of postmodernism and a legitimating source for those architects who first dared to confront history as an intellectual problem and not merely as a stylistic question. Jorge Otero-Pailos shows how architectural phenomenology radically transformed how architects engaged, theorized and produced history. In the first critical intellectual account of the movement, Otero-Pailos discusses the contributions of leading members, including Jean Labatut, Charles Moore, Christian Norberg-Schulz and Kenneth Frampton. For architects maturing after World War II, Otero-Pailos contends, architectural history was a problem rather than a given. Paradoxically, their awareness of modernism's historicity led some of them to search for an ahistorical, experiential constant that might underpin all architectural expression. They drew from phenomenology, exploring the work of Bachelard, Merleau-Ponty, Heidegger and Ricoeur, which they translated for architectural audiences. Initially, the concept that experience could be a timeless architectural language provided a unifying intellectual basis for the stylistic pluralism that characterized postmodernism. It helped give theory, especially the theory of architectural history, a new importance over practice. However, as Otero-Pailos makes clear, architectural phenomenologists

could not accept the idea of theory as an end in itself In the mid 1980s they were caught in the contradictory and untenable position of having to formulate their own demotion of theory Otero Pailos reveals how ultimately the rise of architectural phenomenology played a crucial double role in the rise of postmodernism creating the antimodern specter of a historical consciousness and offering the modern notion of essential experience as the means to defeat it The Society of the Stadium Robert W.
