Butler, Thomas E. Crow, Alexander Alberro, Museum of Contemporary Art (Los Angeles, Calif.), Moira Roth, Whitney Museum of American Art, 2004 This catalogue is the major study of Smithson 1938-1973 who is most renowned as an early earthworks artist and creator of Spiral Jetty a 1 500 foot rock coil dramatically situated in the Great Salt Lake *Robert Smithson* Ann Reynolds, 2004-10-01 An examination of the interplay between cultural context and artistic practice in the work of Robert Smithson Robert Smithson 1938-1973 produced his best known work during the 1960s and early 1970s a period in which the boundaries of the art world and the objectives of art making were questioned perhaps more consistently and thoroughly than any time before or since In Robert Smithson Ann Reynolds elucidates the complexity of Smithson's work and thought by placing them in their historical context a context greatly enhanced by the vast archival materials that Smithson's widow Nancy Holt donated to the Archives of American Art in 1987 The archive provides Reynolds with the remnants of Smithson's working life magazines postcards from other artists notebooks and perhaps most important his library from which she reconstructs the physical and conceptual world that Smithson inhabited Reynolds explores the relation of Smithson's art making thinking about art making writing and interaction with other artists to the articulated ideology and discreet assumptions that determined the parameters of artistic practice of the time A central focus of Reynolds's analysis is Smithson's fascination with the blind spots at the center of established ways of seeing and thinking about culture For Smithson New Jersey was such a blind spot and he returned there again and again alone and with fellow artists to make art that through its location alone undermined assumptions about what and more important where art should be For those who guarded the integrity of the established art world New Jersey was elsewhere but for Smithson elsewheres were the defining if often forgotten locations on the map of contemporary culture *Inside the Spiral* Suzaan Boettger, 2023-04-11 An expansive and revelatory study of Robert Smithson's life and the hidden influences on his iconic creations This first biography of the major American artist Robert Smithson famous as the creator of the Spiral Jetty deepens understanding of his art by addressing the potent forces in his life that were shrouded by his success including his suppressed early history as a painter his affiliation with Christianity astrology and alchemy and his sexual fluidity Integrating extensive investigation and acuity Suzaan Boettger uncovers Smithson's story and with it symbolic meanings across the span of his painted and drawn images sculptures essays

Sobieszek, Robert Smithson, 1993 There have been other exhibitions of his works but Robert Smithson Photo Works is the first to examine his use of the camera and to present the way he saw the unique landscapes in which he traveled and located his art As demonstrated by curator of photography Robert A. Sobieszek the photographic image was central to Smithson's art whether in collages montages sequences films or alone Smithson's final projects attempted a collaboration art and industry He believed artists could assist in reclaiming such devastated areas as open face strip mines Our expanding presence in and impact upon the land may have become so pervasive that the boundaries between nature and culture have been all but obliterated Now two decades after his death Robert Smithson's lessons are all the more vital and significant from preface

Robert Smithson and the American Landscape Ron Graziani, 2004-04-05 Publisher Description **Robert Smithson**, 1977 **Reviewing Robert Smithson** Sharon Lynn Corwin, 1995 **Gendering Landscape Art** Steven Adams, Anna Gruetzner Robins, 2000 While gender has been the subject of extensive critical inquiry the debate has focused primarily on the human particularly the female body The spaces bodies occupy and the ways in which those spaces are depicted in landscape art has not however been subject to investigation This book is the first sustained attempt to fill this gap in art history **Robert Smithson [6 artists, 6 exhibitions].**, 1968

Entropic Philosophy Shannon M. Mussett, 2022-01-31 Now is a time of tremendous anxiety about the present and future state of the world As the second law of thermodynamics states entropy never decreases time marches relentlessly forward and closed systems inevitably break down Entropy serves as a powerful metaphor capturing expressions of growing malaise and decline *Entropic Philosophy* Chaos Breakdown and Creation builds on the meaning of entropy from the Greek *entropia* signifying a turning toward or transformation Developing a philosophy of entropy this book draws variously from anthropology psychoanalysis literature art and the history of philosophy This approach opens pathways for reverence and care that are crucial in preventing fear existential inertia and despair *Memory & Oblivion* A.W. Reinink, Jeroen Stumpel, 2012-12-06 Memory is a subject that recently has attracted many scholars and readers not only in the general historical sciences but also in the special field of art history However in this book in which more than 130 papers given at the XXIXth International Congress of the History of Art Amsterdam 1996 have been compiled Memory is also juxtaposed to its counterpart Oblivion thus generating extra excitement in the exchange of ideas The papers are presented in eleven sections each of which is devoted to a different aspect of memory and oblivion ranging from purely material aspects of preservation to social phenomena with regard to art collecting from the memory of the art historian to workshop practices from art in antiquity to the newest media from Buddhist iconography to the Berlin Wall The book addresses readers in the field of history history of art and psychology *Barry Le Va* Michael Maizels, 2015-10-01 Of the conceptual artists who began their careers in the 1960s and 1970s Bruce Nauman Chris Burden Vito Acconci and Mel Bochner among them Barry Le Va may be the

most elusive As this first study of his work reveals his rigorously planned art was instigated to mask its creator s intentions and methods presenting itself as an aftermath of modernism s claim to permanency and civil society s preferred mode of monumentalism For Michael Maizels Le Va s work constitutes a particularly productive subject of inquiry because it clearly articulates the interconnection between the avant garde s distrust of autonomous art objects two decades of social unrest the emergence of information theory and lingering notions of scientific objectivity Barry Le Va The Aesthetic Aftermath explores how Le Va used such materials as shattered glass spent bullets sound recordings scattered flour and meat cleavers embedded in a floor to challenge the interlocking assumptions behind blind faith in lasting beauty just government and perfectible knowledge Taking inspiration from popular crime novels as well as contemporary art theory Le Va charged his viewers to attempt like detectives at a crime scene to decipher an order underlying the apparent chaos Le Va s installations were designed to erode not simply the presumed autonomy of the art object but also the economic and political authority of the art establishment In his concluding chapter Maizels looks at the more fixed work of the past two decades in which Le Va turned to architectural themes and cast concrete to probe the limits of dynamism and the idea of permanence

Beyond Objecthood James Voorhies, 2017-02-24 The rise of the exhibition as critical form and artistic medium from Robert Smithson s antimodernist non sites in 1968 to today s institutional gravitation toward the participatory In 1968 Robert Smithson reacted to Michael Fried s influential essay Art and Objecthood with a series of works called non sites While Fried described the spectator s connection with a work of art as a momentary visual engagement Smithson s non sites asked spectators to do something more to take time looking walking seeing reading and thinking about the combination of objects images and texts installed in a gallery In Beyond Objecthood James Voorhies traces a genealogy of spectatorship through the rise of the exhibition as a critical form and artistic medium Artists like Smithson Group Material and Michael Asher sought to reconfigure and expand the exhibition and the museum into something more active open and democratic by inviting spectators into new and unexpected encounters with works of art and institutions This practice was sharply critical of the ingrained characteristics long associated with art institutions and conventional exhibition making and yet Voorhies finds over time the critique has been diluted by efforts of the very institutions that now gravitate to the participatory Beyond Objecthood focuses on innovative figures artworks and institutions that pioneered the exhibition as a critical form tracing its evolution through the activities of curator Harald Szeemann relational art and New Institutionalism Voorhies examines recent artistic and curatorial work by Liam Gillick Thomas Hirschhorn Carsten Holler Maria Lind Apolonija Uter i and others at such institutions as Documenta e flux Manifesta and Office for Contemporary Art Norway and he considers the continued potential of the exhibition as a critical form in a time when the differences between art and entertainment increasingly blur
