Mobility Patterns and Urban Structure Paulo Pinho,Cecília Silva,2016-03-03 Despite extensive efforts to understand the overall effect of urban structure on the current patterns of urban mobility we are still far from a consensual perspective on this complex matter To help build agreement on the factors influencing travel behaviour this book discusses the influence of alternative urban structures on sustainable mobility Bringing together two existing and complementary methods to study the relationship between urban structure and mobility the authors compare two case studies with distinct urban structures and travel behaviour Copenhagen and Oporto Of particular concern is the influence of urban structure factors namely land use and transport system factors and motivational factors related to the social economic and cultural characteristics of the individual traveller The research presented in this book highlights the relevance of centrality in travel behaviour and in more sustainable travel choices Different operational forms of the centrality concept are revealed as important it is shown that more sustainable travel can be influenced by several urban structure factors and that no particular combination is required as long as a certain level of centrality is provided Finally the book concludes that urban

structure can on the one hand constrain and on the other hand influence travel choice What Drives Third World City Growth? Allen C. Kelley, Nancy Burley, 2014-07-14 The book shows that earlier studies exaggerated the effects of rural land scarcity foreign capital inflows and population growth on Third World urbanization More critical were imbalances of productivity advance across sectors and terms of trade between primary products and manufactures Originally published in 1984 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Comparitive Urbanization: City Growth and Change , The**

Dublin-Belfast Development Corridor: Ireland's Mega-City Region? John Yarwood, 2017-03-02 The aim of the Dublin Belfast Development Corridor is to link several towns and cities by various modes of communication in order to create a poly centric mega city region in Ireland on a scale large enough to compete with the major urban clusters of continental Europe This volume brings together an interdisciplinary team of leading scholars and practitioners from both sides of the border to discuss the Dublin Belfast corridor and the associated challenges of cross border development from economic geographic regional studies sociological and planning perspectives As well as providing insight into this important project the book also throws light on regional development more generally **Core-Periphery Patterns across the European Union** Adelaide Duarte, Gabriela Carmen Pascariu, 2017-08-25 In this new work Pascariu and Duarte along with an international group of acclaimed scholars delve into key challenges currently facing the European Union They Analyze the effect of peripherality across the EU regions which will be of great interest to those countries and regions facing a process of integration

Redefining Urban and Suburban America Bruce Katz, Robert E. Lang, 2004-05-13 The early returns from Census 2000 data show that the United States continued to undergo dynamic changes in the 1990s with cities and suburbs providing the locus of most of the volatility Metropolitan areas are growing more diverse especially with the influx of new immigrants the population is aging and the make up of households is shifting Singles and empty nesters now surpass families with children in many suburbs The contributors to this book review data on population race and ethnicity and household composition provided by the Census s short form and attempt to respond to three simple queries Are cities coming back Are all suburbs growing Are cities and suburbs becoming more alike Regional trends muddy the picture Communities in the Northeast and Midwest are generally growing slowly while those in the South and West are experiencing explosive growth Warm dry places grew Cold wet places declined note two authors Some cities are robust others are distressed Some suburbs are bedroom communities others are hot employment centers while still others are deteriorating And while some cities cores may have been intensely developed including those in the Northeast and Midwest and seen population increases the areas surrounding

the cores may have declined significantly Trends in population confirm an increasingly diverse population in both metropolitan and suburban areas with the influx of Hispanic and Asian immigrants and with majority populations of central cities for the first time being made up of minority groups Census 2000 also reveals that the overall level of black to nonblack segregation has reached its lowest point since 1920 although high segregation remains in many areas Redefining Urban and Suburban America explores these demographic trends and their complexities along with their implications for the policies and politics shaping metropolitan America The shifts discussed here have significant influence

Urban Geology Pradeep Bhaskarrao Jadhav, 2025-09-26 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary for example climate planetary and evolution sciences Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader would find useful The automatically generated literature summaries in this book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make the advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine interaction to generate readable usable collated research content
