Plantation Earth:

Plantation Earth Moriah Saul, 2003 This book is dedicated to the Constitution of the United States and to the constitutionality of money in America and to the intrinsic value of labor the most valuable and truly intrinsic item in existence in our world The only true value of money is its necessity to divide the fruits of labor in our modern system of barter therefore labor is not only above capitol it is above all other things of value in our world And this opinion was shared by Abraham Lincoln as well as others and the thought should be considered by all people who can form their own opinion on the value of labor and the value of money and which one deserves the higher consideration Money is a yoke and those who control it control those who wear its yoke In the absence of the gold standard there is no way to protect savings from confiscation through inflation There is no safe store of value Allen Greenspan The enormous differences between fiat unsecured paper currencies and the required intrinsic currency system of the United States Constitution is examined and discussed in depth The Constitution is quoted and it plainly states that No State shall make anything other than gold or silver a legal tender in payment of debts and yet all of the American States are today operating on a fiat unsecured currency system This book encourages each and every reader to do some research and see if in their own opinion they agree with the one that I have formed that the States are in non compliance with our Constitution on this issue I firmly believe that the Constitution of the United States should be taught in all public schools That historical content and background and the writings of the founding fathers should be taught in all schools as the well the iniquities of the past that brought the Constitution of the United States into existence I believe that it would be a definite advantage to all children to learn of their rights from the first Government agency with which they have dealings in life Adhesion Contract Standardized contract form offered to consumers of goods and services on essentially take it or leave it bases without affording consumers realistic opportunity to bargain and under such conditions that consumer can not obtain desired product or services except acquiescing in form contract Distinctive feature of adhesion contract is that weaker party has no realistic choice as to its terms Blacks Law Dictionary Sixth edition There are also other constitutional issues brought forward as food for thought for the purpose of encouraging discussion And with that said I will refer people to the opinion of Thomas Jefferson Let no more people be heard of confidence in men but bind him down from mischief by the chains of the Constitution Thomas Jefferson

Rudel, 2023-09-05 Forests offer a natural solution to the climate crisis Conserving and expanding them not only removes carbon from the atmosphere but also protects and fosters biodiversity Yet the results of elite driven reforestation initiatives have been disappointing and in many world regions deforestation continues relentlessly Thomas K Rudel examines a wide range of conservation and reforestation efforts to shed new light on the social factors that lead to success He details effective coalition building strategies and organizational models that have protected restored and expanded forests around the world Rudel argues that successful

reforestation projects bring together diverse groups of people with a stake in the land and a commitment to collective decision making They give voice to different economic and social interests including small farmers Indigenous peoples loggers ranchers government officials NGO personnel international donors and climate activists These varied coalition members each make commitments to promote forests Farmers limit the extent of lands under cultivation governments protect land tenure for smallholders and wealthy donors make payments for environmental protections Timely and accessible Reforesting the Earth offers a guide to scaling up local efforts to sequester carbon and makes a powerful case for a global reforestation movement
