Rivals Of Frankenstein:

The Rivals of Frankenstein Michael Parry, 1980-03-01 *The Rivals of Frankenstein* Michel Parry, 1977 **American Manufacturing in a Global Market** Kenneth Chilton, Melinda Warren, Murray L. Weidenbaum, 2012-12-06

The health of American manufacturing has been a cause of real concern during the 1980s. Foreign competition, hostile takeovers, new technologies, and a host of other factors have caused dramatic changes in this key sector of the American economy. Many observers of this process of change are singing the rust belt blues, consigning U.S. manufacturing greatness to the history books. In April 1986, the Center for the Study of American Business at Washington University issued a study by its director, Dr. Murray L. Weidenbaum, which challenged this perception of American manufacturing's future. The report, entitled *Learning to Compete*, pointed to a variety of positive developments resulting from the adversity faced by American firms in the first half of the decade: producers had improved quality and productivity, reduced costs, and increased emphasis on R&D. In November 1988, as a logical extension of this research, the Center held a conference on American Manufacturing in the 1990s. Focusing on American responses to the changing global competitive environment, this conference brought together the practical experience of business professionals and the more detached views of academic and media experts. In a day and a half of meetings encompassing six separate sessions, a luncheon address, and an after-dinner debate, conference participants assembled an extensive profile on the state of U.S. manufacturing.

Mystery Fanfare Michael L. Cook, 1983. This work is a composite index of the complete runs of all mystery and detective fan magazines that have been published through 1981. Added to it are indexes of many magazines of related nature. This includes magazines that are primarily oriented to boys, book collecting, the paperbacks, and the pulp magazine hero characters, since these all have a place in the mystery and detective genre.

Frankenstein's Children Iwan Rhys Morus, 2014-07-14. During the second quarter of the nineteenth century, Londoners were enthralled by a strange fluid called electricity. In examining this period, Iwan Morus moves beyond the conventional focus on the celebrated Michael Faraday to discuss other electrical experimenters who aspired to spectacular public displays of their discoveries. Revealing connections among such diverse fields as scientific lecturing, laboratory research, telegraphic communication, industrial electroplating, patent conventions, and innovative medical therapies, Morus also shows how electrical culture was integrated into a new machine-dominated consumer society. He sees the history of science as part of the history of production and emphasizes the labor and material resources needed to make electricity work. *Frankenstein's Children* explains that Faraday, with his colleagues at the Royal Society and the Royal Institution, looked at science as the province of a highly trained elite who presented their abstract picture of nature only to select groups. The book contrasts Faraday's views with those of other practitioners to whom science was a practical, skill-based activity open to all. In venues such as the Galleries of Practical Science, electrical phenomena were presented to a public less distinguished but no less enthusiastic and curious than Faraday's audiences. William Sturgeon, for instance, emphasized building apparatus and exhibiting electrical phenomena.

easternmost edge of a vast network of Chinese Southeast Asian Indian and Arab traders Items procured through maritime trade became key symbols of social prestige and political power for the Philippine chiefly elite *Raiding Trading and Feasting* presents the first comprehensive analysis of how participation in this trade related to broader changes in the political economy of these Philippine island societies By combining archaeological evidence with historical sources Laura Junker is able to offer a more nuanced examination of the nature and evolution of Philippine maritime trading chiefdoms Most importantly she demonstrates that it is the dynamic interplay between investment in the maritime luxury goods trade and other evolving aspects of local political economies rather than foreign contacts that led to the cyclical coalescence of larger and more complex chiefdoms at various times in Philippine history A broad spectrum of historical and ethnographic sources ranging from tenth century Chinese tributary trade records to turn of the century accounts of chiefly feasts of merit highlights both the diversity and commonality in evolving chiefly economic strategies within the larger political landscape of the archipelago The political ascendance of individual polities the emergence of more complex forms of social ranking and long term changes in chiefly economies are materially documented through a synthesis of archaeological research at sites dating from the Metal Age late first millennium B C to the colonial period The author draws on her archaeological fieldwork in the Tanjay River basin to investigate the long term dynamics of chiefly political economy in a single region Reaching beyond the Philippine archipelago this study contributes to the larger anthropological debate concerning ecological and cultural factors that shape political economy in chiefdoms and early states It attempts to address the question of why Philippine polities like early historic kingdoms elsewhere in Southeast Asia have a segmentary political structure in which political leaders are dependent on prestige goods exchanges personal charisma and ritual pageantry to maintain highly personalized power bases *Raiding Trading and Feasting* is a volume of impressive scholarship and substantial scope unmatched in the anthropological and historical literature It will be welcomed by Pacific and Asian historians and anthropologists and those interested in the theoretical issues of chiefdoms **Boris Karloff** Scott Allen Nollen,1991-01-01

This comprehensive analysis of Boris Karloff's life and career incorporates criticism in depth production information and discussions of cinematic themes and characters with an account of the historical periods and events depicted in the films and the Hollywood era in which they were produced Each of Karloff's horror films is examined at length as well as his contributions to other media Over 100 posters portraits film scenes and candid photos illustrate the text and numerous contemporaries Evelyn Karloff Laurence Olivier Henry Brandon Ian Wolfe Zita Johann others are quoted throughout [The Literary Imagination from Erasmus Darwin to H.G. ecology new technologies and literature in nineteenth century Britain Page shows how British writers from Darwin to H G Wells confronted the burgeoning expansion of scientific knowledge that was radically redefining human understanding and experience of the natural world of human species and of the self The wide range of authors covered in Page s ambitious study permits him to explore an impressive array of topics that include the role of the Romantic era in the molding of scientific and cultural perspectives the engagement of William Wordsworth and Percy Shelley with questions raised by contemporary science Mary Shelley s conflicted views on the unfolding prospects of modernity and how Victorian writers like Charles Kingsley Samuel Butler and W H Hudson responded to the implications of evolutionary theory Page concludes with the scientific romances of H G Wells to demonstrate how evolutionary fantasies reached the pinnacle of synthesis between evolutionary science and the imagination at the close of the century
