increasingly fragmented societies but designed to foster communication and collaborative action The second edition includes a major new chapter assessing recent developments in theory and practice

**Reservoir Sedimentation** Kumkum Bhattacharyya,Vijay P. Singh,2019-01-03 Reservoir Sedimentation Assessment and Environmental Controls appraises the issues of sedimentation in reservoirs and discusses measures that can be employed for the effective management of sediment to prolong the operational life of reservoirs It provides information for professional consultants and policymakers to enable them to manage dams in the best possible way in order to ensure their sustainability as well as the sustainability of water resources in general It examines the effects of anthropogenic intervention and management of sediment in dams and reservoirs as water resources become more sensitive and the demand for clean water continues to increase Features Examines the issue of sedimentation in dams and reservoirs and presents water management strategies to alleviate environmental issues Presents methods to help ensure the environmental sustainability of dams and reservoirs as well as the sustainability of water resources with consideration of climate change and increased demand Illustrates the spatial distribution of sedimentation characteristics for several dams using geographic information systems GIS Explains the relationships between loss in capacity and catchment characteristics Examines regional variation in sediment yield defines geomorphic regions on the basis of similar hydrometeorology physiography geology and vegetation affecting reservoirs

**The Lower Damodar River, India** Kumkum Bhattacharyya,2011-03-29 Interweaving the human aspects of river control with analysis of hydro physical data including historical data over the last few centuries this monograph is a comprehensive evaluation of the Damodar s lower reaches While the Damodar River isn t an exceptional tropical river nor does it feature classic examples of river control structures it is unusual and worthy of study due to the fact that nowhere else in the tropical world have riverine sandbars been used as a resource base as well as for permanent settlements Based on their knowledge of river stages the inhabitants have fine tuned their land use to flood events applying a concept of flood zoning to the riverbed Every available space has been utilized rationally and judiciously This rare human environmental study analyzes the remarkable way in which immigrants unfamiliar with the riverine environment have adapted to the altered hydrologic regime of the river In doing so they have demonstrated a sophisticated understanding of the flood regime and the vagaries of an unpromising environment in their land use cropping and settlement patterns Spurred on by restricted social and economic mobility and sometimes political constraints these self settled refugees have learned to adapt to their environment and live with the floods Bhattacharyya s text is particularly timely as anthropogenic processes of this kind have not been adequately studied by geographers

**International Development Governance** Ahmed Shafiqul Huque,Habib Zafarullah,2017-09-25 The establishment of good governance is a major challenge for the developing world along with the need to sustain the progress resulting from developmental efforts Although there are numerous studies on the development and governance of emerging nations few volumes make a serious effort to bring together these two critical concepts International Development

Governance combines the two concepts development and governance by examining the issues and problems faced by nations in their attempts to establish sustainable governance This textbook also initiates discussions on the concept of development governance in an international context The book fills the gap in existing literature by drawing upon the experience and expertise of scholars from a broad spectrum of knowledge Their views explain the issues and problems with reference to a number of tools that could establish development governance and sustain it The text offers in depth examinations of developmental sectors resulting in a textbook that will inspire future public officials policy makers and consultants to contribute to the betterment of life for citizens of developing countries

**Water Resources and Agricultural Development in the Tropics** Christopher J. Barrow,2016-07-01 First published in 1988 There are many excellent texts on water supply and irrigation engineering irrigation economics agricultural development and the problems which often plague such efforts Few syntheses of such writings have been made despite a clear need for them from people interested in water resources and agricultural development students of geography economics development studies and agricultural management administrators planners and aid agency staff This book attempts to provide a broad interdisciplinary introduction for such people

**Command Area Development Programmes** M. Venkata Reddy,1998 This book presents a comprehensive account of problems and issues associates with command area development It is a longitudinal study where the same set of villages and households were studied at two points of time with a gap of eight years The main thrust of the study among other things is on on farm development water management agricultural extension and the locational advantages of a farm plot in ensuring timely and adequate supply of water

**Water Resource Systems Planning and Management** Daniel P. Loucks,Eelco van Beek,2017-03-02 This book is open access under a CC BY NC 4 0 license This revised updated textbook presents a systems approach to the planning management and operation of water resources infrastructure in the environment Previously published in 2005 by UNESCO and Deltares Delft Hydraulics at the time this new edition written again with contributions from Jery R Stedinger Jozef P M Dijkman and Monique T Villars is aimed equally at students and

professionals It introduces readers to the concept of viewing issues involving water resources as a system of multiple interacting components and scales It offers guidelines for initiating and carrying out water resource system planning and management projects It introduces alternative optimization simulation and statistical methods useful for project identification design siting operation and evaluation and for studying post planning issues The authors cover both basin wide and urban water issues and present ways of identifying and evaluating alternatives for addressing multiple purpose and multi objective water quantity and quality management challenges Reinforced with cases studies exercises and media supplements throughout the text is ideal for upper level undergraduate and graduate courses in water resource planning and management as well as for practicing planners and engineers in the field      Development and the Environmental Crisis Michael Redclift,2010-11-26 First published in 1984 Michael Redclift s book makes the global environmental crisis a central concern of political economy and its structural causes a central concern of environmentalism Michael Redclift argues that a close analysis of the environmental crisis in the South reveals the importance of the share of resources obtained by different social groups The development strategies based on the experiences and interests of Western capitalist countries fail to recognise that environmental degradation in the South is a product of inequalities in both global and local economic relations and cannot be solved simply by applying solutions borrowed from environmentalism in the North The key to understanding the South s environmental problems lies in the recognition that structural processes markets technology state intervention are also a determining influence upon the way natural resources are used Through his review of Europe s Green Movement contemporary breakthroughs in biotechnology and information systems and recent feminist discourse Michael Redclift has enlarged the compass of the environmental debate and produced a book which should serve as a benchmark in future discussions of development and the environment It will be of importance to students in a range of disciplines within development studies geography ecology and the social sciences      **Room for Manoeuvre** Edward J. Clay,Bernard Schaffer,1984 Explores the roles of some of the organizations involved in the developing world and what might be done to increase their effectiveness Common instruments of intervention are illustrated with material from Bangladesh India Kenya Mauritius and Sri Lanka      **Green Development** Bill Adams,2008-07-30 The third edition retains the clear and powerful argument of previous editions but has been updated to reflect advances in ideas and changes in international policy Greater attention has been given to political ecology environmental risk and the environmental impacts of development
