Industrial Archaeology Emory L. Kemp, 1996 Industrial archaeology is a flourishing discipline which seeks to document America's rich industrial heritage through measured drawings, archival photographs and contextual site histories. With increasing interest in historic industrial sites, a shortage exists of those capable of undertaking site documentation. Thus the purpose of this book is to provide information for historians, archaeologists, architects, engineers and other professionals. It is also intended for graduate courses and for professionals in public and private service wishing to gain a basic understanding of the discipline.

The Built Environment Transformed Geoffrey Timmins, 2021-12-02 This book is concerned with the remarkable changes made to the built environment in Lancashire's main textile district, essentially the eastern and central parts of the county during the Industrial Revolution c1780-c1850. A case study approach is taken with findings from investigations at six different types of site being presented. The sites included are water-powered mill remains in the Cheesden Valley near Rochdale; Barrow Bridge factory village near Bolton; the former handloom weavers colony at Club Houses, Horwich; Preston's Winckley Square; Eanam Wharf at Blackburn; and to the north of Bolton, the road between Bromley Cross and Edgworth. The case studies show how, in rural and urban areas alike, developments in industry, housing and transport greatly extended the built environment and brought striking new features to it. Emphasis is placed on interpreting the physical evidence the sites provide, linking it with that taken from various types of documentary source, especially historical maps. By making comparisons with developments occurring at similar types of site elsewhere in Britain as well as in Europe and North America, the forms the changes took are explained and their significance assessed. Additionally, insights are provided into the economic and social impact the changes brought, especially on the everyday lives that people led.

Dumfries and Galloway Edward J. Cowan, Kenneth Veitch, 2019-09-02 Dumfries and Galloway is one of the least known regions of Scotland. Despite memories and traditions to match those of Gaelic-speaking Scotland, it has been seriously understudied. This innovative ground-breaking study looks mainly at the everyday lives and culture of people in this region during a period of profound agricultural, industrial and demographic change. In doing so, it uncovers new information about a wide range of topics in local history, including food, festivals and folklore, music, mining, the development of towns and villages, population, smuggling, the experience of migration and the question of identity. All of the contributors to the book are specialists in their fields and have an in-depth knowledge of the region through life and work.
