The Handbook of Road Safety Measures Rune Elvik, Truls Vaa, Alena Høy, Michael Sørensen, 2009-10-14 Contains summaries of the knowledge regarding the effects of 128 road safety measures This title covers various areas of road safety including traffic control vehicle inspection driver training publicity campaigns police enforcement and general policy instruments It also covers topics such as post accident care and speed cameras **Structural Crashworthiness and Failure** N. Jones, T. Wierzbicki, 2010-02-25 This book contains twelve invited lectures from the Third International Symposium on Structural Crashworthiness Particular emphasis is given to the failure predictions for ductile metal structures under large dynamic loads and to the behaviour of composite and cellular structures **Behavioural Adaptation and Road Safety** Christina Rudin-Brown, Samantha Jamson, 2013-05-24 Despite being an accepted construct in traffic and transport psychology the precise nature of behavioural adaptation including its causes and consequences has not yet been established within the road safety community A comprehensive collection of recent literature Behavioural Adaptation and Road Safety Theory Evidence and Action explores be **What Value May Geographic Information Systems Add to the Art of Identifying Crash Countermeasures?** John S. Miller, 2008-09 Geographic Info Systems GIS can be employed to relate organize and analyze roadway and crash data thereby facilitating crash countermeasure identification and evaluation GIS cannot however replace the role of the local analyst as a problem solver who needs to interpret results and recommend engineering enforcement or educ improvements Using the PC based Micro Traffic Records System MTRS a software packaged employed in Virginia that records crashes at either a specific intersection or between 2 cross streets it was possible to place 82% of the MTRS crash locations within a GIS Without crashes that were demarcated at private property locations the placement rate climbs to 94% for intersection locations Illus Roadside Safety Features , 1988-01-01

Restructuring Public Transport through Bus Rapid Transit Munoz, Juan Carlos, Paget-Seekins, Laurel, 2016-01-10 Bus Rapid Transit BRT is commonly discussed as an affordable way for cities to build sustainable rapid transport infrastructure This book is the first to offer an in depth analysis of BRT examining the opportunities it presents along with the significant challenges cities face in its implementation A wide range of contributors from both developed and developing countries bring expertise in fields ranging from engineering planning and public policy to economics and urban design to provide a big picture assessment of BRT as part of a process for restructuring transit systems Academically rigorous based on five years of research conducted by the BRT Centre of Excellence in Chile the book is written in an accessible style making it a valuable resource for academic researchers and postgraduate students as well as policy makers and practitioners Human Factors Guidelines for Road Systems John L. Campbell, 2012 This report completes and updates the first edition of NCHRP Report 600 Human Factors Guidelines for Road Systems HFG which was published previously in three collections The HFG contains guidelines that provide human factors principles and findings for consideration by and is a resource document for highway

Jan Theeuwes,Richard van der Horst,2017-09-18 Many books focus on individual differences and how those relate to traffic safety such as accident proneness gender differences age alcohol and the effects of drugs Others focus on the safety effects regarding the vehicle such as airbags anti lock brakes navigation systems intelligent cruise control and other new gadgets coming to the vehicle Even though these topics are undoubtedly important for traffic safety this book takes a unique approach as it focuses solely on the road environment Designing Safe Road Systems provides the background for those who want to know more about the effects of road design on driving behaviour It uses a systems approach to allow a better understanding of why and in what circumstances drivers may commit errors This understanding will ultimately lead to road systems that prevent fatal errors from occurring The book contains an overview of the current models and theories about human performance and human behaviour in traffic that are relevant for all those involved in designing safe road systems The central theme of this book is how design principles can reduce the probability of an error while driving The authors demonstrate how knowledge of human factors helps a road authority to better understand how road users behave They argue that in many cases the design of the environment can be further adjusted to human capabilities and that safety should be considered a system property to be built into the road system **News Report** National Research Council (U.S.),1991

Data Analytics for Smart Cities Amir Alavi,William G. Buttler,2018-10-26 The development of smart cities is one of the most important challenges over the next few decades Governments and companies are leveraging billions of dollars in public and private funds for smart cities Next generation smart cities are heavily dependent on distributed smart sensing systems and devices to monitor the urban infrastructure The smart sensor networks serve as autonomous intelligent nodes to measure a variety of physical or environmental parameters They should react in time establish automated control and collect information for intelligent decision making In this context one of the major tasks is to develop advanced frameworks for the interpretation of the huge amount of information provided by the emerging testing and monitoring systems Data Analytics for Smart Cities brings together some of the most exciting new developments in the area of integrating advanced data analytics systems into smart cities along with complementary technological paradigms such as cloud computing and Internet of Things IoT The book serves as a reference for researchers and engineers in domains of advanced computation optimization and data mining for smart civil infrastructure condition assessment dynamic visualization intelligent transportation systems ITS cyber physical systems and smart construction technologies The chapters are presented in a hands on manner to facilitate

researchers in tackling applications Arguably data analytics technologies play a key role in tackling the challenge of creating smart cities Data analytics applications involve collecting integrating and preparing time and space dependent data produced by sensors complex engineered systems and physical assets followed by developing and testing analytical models to verify the accuracy of results This book covers this multidisciplinary field and examines multiple paradigms such as machine learning pattern recognition statistics intelligent databases knowledge acquisition data visualization high performance computing and expert systems The book explores new territory by discussing the cutting edge concept of Big Data analytics for interpreting massive amounts of data in smart city applications

Igharo, Eric Munger, Richard W. Glad, 2004 *Advances in Human Aspects of Transportation: Part II* Neville Stanton, Steven Landry, Giuseppe Di Bucchianico, Andrea Vallicelli, 2021-07-19 Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation awareness skill development and training warnings and workload This book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system
