Redemption of Things Samuel Frederick,2022-01-15 Collecting is usually understood as an activity that bestows permanence unity and meaning on otherwise scattered and ephemeral objects In The Redemption of Things Samuel Frederick emphasizes that to collect things however always entails displacing immobilizing and potentially disfiguring them too He argues that the dispersal of objects seemingly antithetical to the collector s task is essential to the logic of gathering and preservation Through analyses of collecting as a dialectical process of preservation and loss The Redemption of Things illustrates this paradox by focusing on objects that challenge notions of collectability ephemera detritus and trivialities such as moss junk paper scraps dust scent and the transitory moment In meticulous close readings of works by Gotthelf Stifter Keller Rilke Glauser and Frisch and by examining an experimental film by Oskar Fischinger Frederick reveals how the difficulties posed by these fleeting fragile and forsaken objects help to reconceptualize collecting as a poetic activity that makes the world of scattered things uniquely palpable and knowable **Between the Black Box and the White Cube**

Andrew V. Uroskie,2014-02-27 Today the moving image is ubiquitous in global contemporary art The first book to tell the story of the postwar expanded cinema that inspired this omnipresence Between the Black Box and the White Cube travels back to the 1950s and 1960s when the rise of television caused movie theaters to lose their monopoly over the moving image leading cinema to be installed directly alongside other forms of modern art Explaining that the postwar expanded cinema was a response to both developments Andrew V Uroskie argues that rather than a formal or technological innovation the key

change for artists involved a displacement of the moving image from the familiarity of the cinematic theater to original spaces and contexts He shows how newly available inexpensive film and video technology enabled artists such as Nam June Paik Robert Whitman Stan VanDerBeek Robert Breer and especially Andy Warhol to become filmmakers Through their efforts to explore a fresh way of experiencing the moving image these artists sought to reimagine the nature and possibilities of art in a post cinematic age and helped to develop a novel space between the black box of the movie theater and the white cube of the art gallery Packed with over one hundred illustrations *Between the Black Box and the White Cube* is a compelling look at a seminal moment in the cultural life of the moving image and its emergence in contemporary art

Lessons in Perception Paul Taberham, 2018-06-19 *Lessons in Perception* seeks to clarify notoriously elusive themes of the avant garde with the use of existing research from the field of psychology There is a long standing history of reference to psychological concepts in relation to avant garde film such as its unique relationship to memory visual perception narrative comprehension and synesthesia Yet direct analysis of these topics in light of existing psychological research remains largely unexplored until now More broadly the aim of the book is to frame avant garde filmmaking practice as a form of practical psychology In doing so two principal arguments are proposed first that many avant garde filmmakers draw creative inspiration from their own cognitive and perceptual capacities and touch on topics explored by actual psychologists secondly that as practical psychologists avant garde filmmakers provide lessons in perception that offer psychological experiences that are largely unrehearsed in commercial cinema
