Robert Silverberg Presents The Great Science Fiction Stories 1964:

Robert Silverberg Presents the Great SF Stories Robert Silverberg, Martin Harry Greenberg, 2001 *The Science Fiction Hall of Fame, Volume One 1929-1964* Robert Silverberg, 2018-02-06 The definitive collection of the best in science fiction stories between 1929-1964. This book contains twenty-six of the greatest science fiction stories ever written. They represent the considered verdict of the Science Fiction Writers of America: those who have shaped the genre and who know more intimately than anyone else what the criteria for excellence in the field should be. The authors chosen for *The Science Fiction Hall of Fame* are the men and women who have shaped the body and heart of modern science fiction; their brilliantly imaginative creations continue to inspire and astound new generations of writers and fans. Robert Heinlein in *The Roads Must Roll* describes an industrial civilization of the future caught up in the deadly flaws of its own complexity. *Country of the Kind* by Damon Knight is a frightening portrayal of biological mutation. *Nightfall* by Isaac Asimov, one of the greatest stories in the science fiction field, is the story of a planet where the sun sets only once every millennium and is a chilling study in mass psychology. Originally published in 1970 to honor those writers and their stories that had come before the institution of the Nebula Awards, *The Science Fiction Hall of Fame Volume One* was the book that introduced tens of thousands of young readers to the wonders of science fiction. Too long unavailable, this new edition will be treasured by all science fiction fans everywhere. *The Science Fiction Hall of Fame Volume One* includes the following stories: Introduction by Robert Silverberg; *A Martian Odyssey* by Stanley G. Weinbaum; *Twilight* by John W. Campbell; *Helen O'Loey* by Lester del Rey; *The Roads Must Roll* by Robert A. Heinlein; *Microcosmic God* by Theodore Sturgeon; *Nightfall* by Isaac Asimov; *The Weapon Shop* by A. E. van Vogt; *Mimsy Were the Borogoves* by Lewis Padgett; *Huddling Place* by Clifford D. Simak; *Arena* by Frederic Brown; *First Contact* by Murray Leinster; *That Only a Mother* by Judith Merril; *Scanners Live in Vain* by Cordwainer Smith; *Mars is Heaven* by Ray Bradbury; *The Little Black Bag* by C. M. Kornbluth; *Born of Man and Woman* by Richard Matheson; *Coming Attraction* by Fritz Leiber; *The Quest for Saint Aquin* by Anthony Boucher; *Surface Tension* by James Blish; *The Nine Billion Names of God* by Arthur C. As a geometric term, parabola suggests a narrative trajectory or story arc. In science fiction, parabolas take us from the known to the unknown. More concrete than themes, more complex than motifs, parabolas are combinations of meaningful setting, character, and action that lend themselves to endless redefinition and jazzlike improvisation. The fourteen original essays in this collection explore how the field of science fiction has developed as a complex of repetitions, influences, arguments, and broad conversations. This

particular feature of the genre has been the source of much critical commentary most notably through growing interest in the sf megatext a continually expanding archive of shared images situations plots characters settings and themes found in science fiction across media Contributors include Jane Donawerth Terry Dowling L Timmel Duchamp Rachel Haywood Ferreira Pawel Frelik David M Higgins Amy J Ransom John Rieder Nicholas Ruddick Graham Sleight Gary K Wolfe and Lisa Yaszek

Holy Sci-Fi! Paul J. Nahin, 2014-04-09 Can a computer have a soul Are religion and science mutually exclusive Is there really such a thing as free will If you could time travel to visit Jesus would you and should you For hundreds of years philosophers scientists and science fiction writers have pondered these questions and many more In Holy Sci Fi popular writer Paul Nahin explores the fertile and sometimes uneasy relationship between science fiction and religion With a scope spanning the history of religion philosophy and literature Nahin follows religious themes in science fiction from Feynman to Foucault and from Asimov to Aristotle An intriguing journey through popular and well loved books and stories Holy Sci Fi shows how sci fi has informed humanity s attitudes towards our faiths our future and ourselves

Off the Main Sequence Tom Easton, 2006-10-01 Tom Easton has served as the monthly book review columnist for Analog Science Fiction for almost three decades having contributed during that span many hundreds of columns and over a million words of penetrating criticism on the best literature that science fiction has to offer His reviews have been celebrated for their wit humor readability knowledge and incisiveness His love of literature particularly fantastic literature is everywhere evident in his essays Easton has ever been willing to cover small presses obscure authors and unusual publications being the only major critic in the field to do so on a regular basis He seems to delight in finding the rare gem among the backwaters of the publishing field A reviewer s job he says is not to judge books for the ages but to tell readers enough about a book to give them some idea of whether they would enjoy it And this he does admirably whether he s discussing the works of the great writers in the field or touching upon the least amongst them This companion volume to Periodic Stars Borgo Wildside collects another 250 of Easton s best reviews from the last fifteen years of The Reference Library No one does it better and no other guide provides such lengthy or discerning commentary on the best SF works of recent times Complete with Introduction and detailed Index

Irony in The Twilight Zone David Melbye, 2015-12-14 Rod Serling s pioneering series The Twilight Zone 1959 to 1964 is remembered for its surprise twist endings and pervading sense of irony While other American television series of the time also experimented with ironic surprises none depended on these as much as Serling s However irony was not used merely as a structural device Serling and his writers used it as a

provocative means by which to comment on the cultural landscape of the time Irony in The Twilight Zone How the Series Critiqued Postwar American Culture explores the multiple types of irony such as technological invasive martial sociopolitical and domestic that Serling Richard Matheson Charles Beaumont and other contributors employed in the show David Melbye explains how each kind of irony critiqued of a specific aspect of American culture and how all of them informed one another creating a larger social commentary This book also places the show s use of irony in historical and philosophical contexts connecting it to a rich cultural tradition reaching back to ancient Greece The Twilight Zone endures because it uses irony to negotiate its definitively modernist moment of high social consciousness and low cultural escapism With its richly detailed frequently unexpected readings of episodes Irony in The Twilight Zone offers scholars and fans a fresh and unique lens through which to view the classic series

The Science Fiction of Poetics and the Avant-Garde Imagination Michael Golston,2023-11-19 How the tropes of science fiction infuse and inform avant garde poetics and many other kindred arts This insightful playful monograph from Golston does exactly what it advertises modeling poetics based on how poetry and some parallel artistic endeavors has filtered through a century plus of science fiction This is not a book about science fiction in and of itself but it is a book about the resonances of science fiction tropes and ideas in poetic language The germ of Golston s project is a throwaway line in Robert Smithson s Entropy and the New Monuments about how cinema supplanted nature as inspiration for many of his fellow artists The movies give a ritual pattern to the lives of many artists and this induces a kind of low budget mysticism which keeps them in a perpetual trance Golston charts how the demotic appeal of sci fi much like that of the B movie cross pollinated into poetry and other branches of the avant garde Golston creates what he calls a regular Rube Goldberg machine of a critical apparatus drawing on Walter Benjamin Roman Jakobson and Gilles Deleuze He starts by acknowledging that per the important work of Darko Suvin to situate science fiction critically the genre is premised on cognitive estrangement But he is not interested in the specific nuts and bolts of science fiction as it exists but rather how science fiction has created a model not only for other poets but also for musicians and landscape artists Golston s critical lens moves around quite a bit but he begins with familiar enough subjects Edgar Rice Burroughs Mina Loy William S Burroughs From there he moves into more alien terrain Ed Dorn s long poem Gunslinger the discombobulated work of Clark Coolidge Sun Ra Ornette Coleman and Jimi Hendrix all come under consideration The result of Golston s restless rich scholarship is the first substantial monograph on science fiction and avant garde poetics using Russian Formalism Frankfurt School dialectics and Deleuzian theory to show how the avant garde inherently follows the parameters of sci fi in both theme and form
