Spiritic and Magic Manifestations, Ancient and Modern Spiritualism A. S. Cassidy, 1886 **Modern Spiritualism** Frank Podmore, 1902 *The Rise of Contemporary Spiritualism* Anne Kalvig, 2016-10-04 Talking to the dead and communication with the other side is often presented as a taboo in an increasingly technological and medically advanced world. However, practices of spiritualism and mediumship continue to remain popular and in high demand within contemporary Western societies. This book analyses the practices of today's mediums who insist on standing at the threshold between life and death, interpreting signs and passing on communications, and asks how such concepts and practices are perceived by contemporary society. Using first-hand material gathered from alternative fairs, mediumistic congresses, sances and interviews with both practitioners and clients, as well as thorough textual analysis, Anne Kalvig provides a clear overview of the various forms of consumption of mediumship in Western society and places these within a socio-cultural, religious and historical context. She also raises questions as to the controversies surrounding spiritualism and its representation and relationship with popular culture and the media. This book will be of interest to researchers in the field of sociology, religious studies, folklore, media studies and anthropology, as well as to anyone interested in the upsurge of contemporary spiritualism, psychic phenomena and the paranormal. **Archaeological Sites as Space for Modern Spiritual Practice** Raimund Karl, Jutta

Leskovar, 2018-11-07 Archaeological heritage can be disputed, especially where it is important to religions and their practitioners. While the destruction of archaeological sites in war often due to religious fervour is frequently making the headlines, apparently lesser disputes about local heritage sites go unreported. This book focuses on these lesser but much more frequent potential conflicts between archaeological heritage management and conservation, on the one hand, and practitioners of religious beliefs who use archaeological heritage in their practice, on the other. By exploring case studies from Austria, the Czech Republic, Estonia, France, Norway, Romania, Russia, Spain, Sweden and Wales, this book examines the interaction between spiritual practice and monuments conservation. This book will be of great interest to heritage professionals, archaeologists, historians, conservationists and religious practitioners alike through its exploration of various kinds of interactions between these different heritage communities and their interests in archaeology. *Hartmann's Who's who in Occult, Psychic and Spiritual Realms...in the United States and Foreign Countries*, 1927 *Religion and Culture in Early Modern Europe, 1500-1800* Kasper von Greyerz, 2008 In the pre-industrial societies of early modern Europe, religion was a vessel of fundamental importance in making sense of personal and collective social, cultural and spiritual exercises. Making Magic Randall Styers, 2004-01-15 Since the emergence of religious studies and the social sciences as academic disciplines the concept of magic has played a major role in defining religion and in mediating the relation of religion to science Across these disciplines magic has regularly been configured as a definitively non-modern phenomenon juxtaposed to distinctly modern models of religion and science Yet this notion of magic has remained stubbornly amorphous In *Making Magic* Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that He argues that this persistence can best be explained in light of the Western drive to establish and secure distinctive norms for modern identity norms based on narrow forms of instrumental rationality industrious labor rigidly defined sexual roles and the containment of wayward forms of desire Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety legitimate scientific rationality and orderly social relations are brought into relief Scholars have found magic an invaluable tool in their efforts to define the appropriate boundaries of religion and science On a broader level says Styers magical thinking has served as an important foil for modernity itself Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world

lower class women were deliberately tortured and killed in the name of religion and morality during three centuries of intermittent witch hunting throughout Europe and North America Combining perspectives from history sociology psychology and other disciplines this book provides a comprehensive account of witch hunting in early modern Europe Julian Goodare sets out an original interpretation of witch hunting as an episode of ideologically driven persecution by the godly state in the era of the Reformation and Counter Reformation Full weight is also given to the context of village social relationships and there is a detailed analysis of gender issues Witch hunting was a legal operation and the courts rationale for interrogation under torture is explained Panicking local elites rather than central governments were at the forefront of witch hunting Further chapters explore folk beliefs about legendary witches and intellectuals beliefs about a secret conspiracy of witches in league with the Devil Witch hunting eventually declined when the ideological pressure to combat the Devil s allies slackened A final chapter sets witch hunting in the context of other episodes of modern persecution This book is the ideal resource for students exploring the history of witch hunting Its level of detail and use of social theory also make it important for scholars and researchers
