Moments Madness:

Repertoires and Cycles of Collective Action Mark Traugott, 1995 The modern era has generated a bewildering profusion of popular protest including widespread social movements and sporadic revolutionary upheaval Despite the seemingly chaotic character of such collective action social scientists have increasingly noted the remarkable regularities exhibited by even the most tumultuous social change In this volume sociologists political scientists and historians come together to assess the complementary concepts of repertoires and cycles as tools for illuminating the consistent patterns that emerge from the apparent chaos The significance of repertoires recurrent forms or tactics of social protest is explored in an essay on eighteenth and nineteenth century Britain by the originator of the concept Charles Tilly Sidney Tarrow whose work has most directly linked the concept of repertoires with that of cycles the recurrent peaks and troughs in the historical incidence of collective action contributes an essay that focuses on twentieth century Italy Other essays investigate the rhythms and logic of social change in contexts as diverse as sixteenth through nineteenth century Japan nineteenth century Europe and twentieth century America Through inquiries into the consequences of violent repression for social mobilization the struggle to control the linguistic terms of social conflict the unacknowledged antecedents of contemporary movements and the importance of movement families this volume demonstrates the usefulness of these two concepts and defines the relationship between them Collected from past issues of *Social Science History* with a new introduction and two new essays *Repertoires and Cycles of Collective Action* will reward an interdisciplinary audience of readers with the extraordinary vitality that emerges from this rich blend of historical perspectives Contributors Charles Brockett Craig Calhoun Doug McAdam Marc Steinberg Sidney Tarrow Charles Tilly Mark Traugott James White **A Moment of Madness and Other Stories** Florence Marryat, 1883 **Queering Professionalism: Pitfalls and Possibilities** Adam Davies and Cameron Greensmith, *Sound and Sense in Contemporary Theatre* Matthew Tomkinson, 2025-01-11 This book is among the first to consider the subject of mad auralities in theatre and performance asking what does it mean to hear and listen madly Drawing widely upon mad studies critical disability studies theatre studies sound studies queer studies and critical race theory it seeks to explore the theatrical relationship between sound and mental health differences by examining a range of case studies in which audience members are immersed in auditory simulations of madness Ultimately however this critical study investigates the shortcomings of simulation as a representational practice in keeping with the critical tradition of disability studies and mad studies **Experiencing Psychosis** Jim Geekie, Patte Randal, Debra Lampshire, John Read, 2013-03 In this book first person accounts are brought centre stage and examined alongside current research to suggest how service user experience can contribute to professional understanding and therefore the treatment of psychosis *Key Concepts in Critical Social Theory* Nick Crossley, 2005 Clear and accessible *Key Concepts in Critical Social Theory* makes difficult ideas available to an undergraduate audience Larry Ray Professor of Sociology University of Kent The SAGE Key Concepts series

provides students with accessible and authoritative knowledge of the essential topics in a variety of disciplines Cross referenced throughout the format encourages critical evaluation through understanding Written by experienced and respected academics the books are indispensable study aids and guides to comprehension Key Concepts in Critical Social Theory Provides brief accounts of the central ideas behind the key concepts Prepares students to tackle primary texts giving them a point of reference when they find themselves stuck Discusses each concept in an introductory way Offers further reading guidance for independent learning This is an essential companion for reading for students across the social sciences who are exploring critical theory for the first time The Literary Exception and the Rule of Law Johan Van Der Walt,2022-07-20 Addressing the influential analysis of law and literature this book offers a new perspective on their relationship The law and literature movement that has gained global prominence in the course of last decades of the twentieth and the first decades of the twenty first centuries has provided the research and teaching of law with a considerable body of new and valuable knowledge and understanding Most of the knowledge and insights generated by the movement concern either a thematic overlap between legal and literary discourses suggesting they deal with the same moral concerns or a rhetorical semiotic or general linguistic comparability or sameness between them imputing to both the same or very similar narrative structures The Literary Exception and the Rule of Law recognises the wealth of knowledge generated by this approach to the relationship between law and literature and acknowledges its debt to this genre of scholarship It nevertheless also proposes on the basis of a number of revealing phenomenological inquiries a different approach to law and literary studies one that emphasises the irreducible difference between law and literature It does so with the firm belief that a regard for the very different and indeed opposite discursive trajectories of legal and literary language allows for a more profound understanding of the unique and indeed separate roles that the discourses of law and literature generally play in the sustenance of relatively stable legal cultures This important rethinking of the relationship between law and literature will appeal to scholars and students of legal theory jurisprudence philosophy politics and literary theory Redescriptions Pasi Ihalainen,2006 The 2006 volume of Redescriptions has two main themes the political principles and practices of democratic political representation and the temporal dimension of politics discussed in six articles and two review articles Different principles and organizational arrangements play a key role in theories of political representation in the democratization of suffrage and in the present debates on the modes of equal representation of women The articles discussing the proper time for politics also refer to issues closely connected to debates on democracy and representation today **Old Thoughts for a Modern Age** Joy Olree,2014-08-14 Life is complicated and unpredictable I have Aspergers and MS but I refuse to believe I was born just to live a while then die I am not the result of a Big Bang nor did I come from a monkey I believe God created the universe and everything in it then he created Adam and Eve who were fruitful and multiplied until well here I am My new book of poems is the result of my reading and studying the Bible and my personal

opinions of human life based on how humans act you dont have to agree with me you have freewill just like me Deeply Odd Assuredly Strange Guess imbecile suits me fine I am deeply odd assuredly strange Rebellion not surrendered and muted of course Hey listen up what do you want from an autistic poet with MS Thats not enough Well kiss my grits Bye I hate grits Ok so I save a few lives not Eat Jello Eggos and applesauce Woo woo breakfast is served Im still deeply odd assuredly strange Strange See Joy See Joy walk see joy fall see Joy blow her whistle See help come See ching ching Nothing is faster than the speed of light except money and it comes and goes so fast you never really see it but you know its there by the stack of bill on the coffee table

Cloud Ethics Louise Amoore,2020-05-01 In *Cloud Ethics* Louise Amoore examines how machine learning algorithms are transforming the ethics and politics of contemporary society Conceptualizing algorithms as ethicopolitical entities that are entangled with the data attributes of people Amoore outlines how algorithms give incomplete accounts of themselves learn through relationships with human practices and exist in the world in ways that exceed their source code In these ways algorithms and their relations to people cannot be understood by simply examining their code nor can ethics be encoded into algorithms Instead Amoore locates the ethical responsibility of algorithms in the conditions of partiality and opacity that haunt both human and algorithmic decisions To this end she proposes what she calls cloud ethics an approach to holding algorithms accountable by engaging with the social and technical conditions under which they emerge and operate

Two Sides of a Barricade Christian Scholl,2013-12-28 *Two Sides of a Barricade* argues that to construct global democracy conflict and dissent must be taken seriously Christian Scholl explores the political significance of the confrontations within four sites of interaction bodies space communication and law Each site of struggle provides a different entry point to understand the influence of protester and police tactics on each other At the same time the four sites of struggle allow a comprehensive analysis of how the contestation of global hegemonic forces during summit protests trigger a preemptive shift in social control through increased deployment of biopolitical forms of power This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA collections and from leading publishing houses and OA initiatives Learn more at the Knowledge Unlatched website at <https://www.knowledgeunlatched.org> and access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/1709>

Going Beyond Helga Schier,2011-07-22 No detailed description available for *Going Beyond*

A Thousand Moments of Solitude Federico Sanchez,2006-04-10 On November 12 2002 at the age of twenty two my son Mitchell committed suicide His sudden and unexpected death sent me reeling down a path I needed to travel if I ever wanted to escape the forest of grief and loss in which I found myself This book recounts my journey to come to terms with the death of my son The path I started downto fulfill a promise I had made to my son while he was alive to find answers to the mental problems he sufferedtook me places I had not anticipated The path became a network of four intersecting paths and my journey took me far beyond the death of a son to the human condition where we are governed by forces both internal and

external over which we have little control and little understanding Intricately connected the four paths explored in this book are 1 the autobiographical the story of my life with my son Mitchell as we struggled with the mental problems that eventually led to his suicide 2 the diagnostic the various diagnostic tools available to psychiatrists which illustrate the level of knowledge in the field and show some of the failings of our present approach to mental disorders 3 historical fiction narrative accounts of the lives and deaths by suicide of both historical and fictional characters including the son of Queen Isabela of Spain Meriwether Lewis Vincent Van Gogh Miguel a slave working at the Count of Valencianas silver mine La Boca del Infierno in 18th century Mexico and Michele a passenger on the Titanic By telling these stories sometimes in the first person I found a way to express my own anguish and pain something I could not do directly as well as a way to explore further my relationship with my son and my sons complexity and fullness as a person 4 scientific explanation of how the brain works a theory of how the brain works explaining in detail how mental images and thoughts are formed and travel through the nervous system how we live in a world of illusions and how mental illness can be explained in these terms These four paths are intricately connected and reinforce each other in the book The diagnostic explains in technical terms what the autobiographical recounts the autobiographical recounts events which help to explain the complexities and subtleties of human behavior within the context of how the brain works the historical fiction ties into the autobiographical elements and the diagnostic The book also confronts the issue of suicide itself It answers that elusive question Why do people commit suicide The book presents a personal honest biographical testimonial of the experience of the suicide of a son The book speaks from experience not some abstract philosophical point of view The organization and contents of the book are unique a weaving together of four distinct yet related subjects the suicide of a son the classification of mental illnesses narratives of historical fiction and a theory of how the brain works The most outstanding feature of this book is that it presents for the first time to my knowledge a comprehensive theory of the brain that explains mental disorders such as dementia delirium depression manic depression and schizophrenia For the first time suicide is placed in a scientific context and why and how it happens is explained In particular the brain theory here is presented in a simplified form accessible to most particularly because of the anecdotes and stories that help illustrate how the brain functions and malfunctions The book also deals with other related subjects the importance of love in our lives the possibilities of past lives how to deal with grief and loss the possible reasons for the rise of suicide rates in industrialized nations the failures of the system to cure and prevent suicide and other mental disorders and possible directions that therapies and medications might explore in the future The writing is forceful
