Mycenaean Chronicle

Graham Harman, Christopher Witmore

Mycenaean Chronicle:

Chronicles of the Ancient World John Haywood, 2015-06-04 Sumeria c 3500 BC witnessed the birth of the world's very first city by the rich and fertile banks of the Euphrates. Over the next four millennia the social and cultural landscape would change beyond recognition as many of history's most important kingdoms and cities took root. Interweaving Mesopotamian, Egyptian, Persian, Greek and Roman history, this book follows these burgeoning empires over 4,000 years, examining the delicate balance of power as they vied for territory, conquest and glory. From Alexander the Great's 22,000-mile march on Persia to Attila the Hun's plunder of the Roman empire, John Haywood brings the most crucial battles and decisive campaigns to vivid life and examines the extraordinary cultural achievements of these civilizations: the first written words, the spectacular works of architecture, the growth of democracy and the spread of religions that changed our world for ever.

Chronicles of Agamemnon Alex Kornejev, 2024-02-28 This book is dedicated to the prehistory of the Trojan War. This historical fiction is based on ancient myths and describes the events that took place in the fifty-year period preceding the campaign of the Achaeans on Ilium. The book consists of five parts. The first part is devoted to the capture of Ilium by Hercules and the enthronement of King Priam. The second describes the adventures of Agamemnon in exile from the moment of the death of his father King Atreus. The third reflects the accession of Agamemnon in Mycenae and his actions to strengthen the royal power up to his marriage to the daughter of the king of Sparta. The fourth part describes the period from the wedding of Helen and Menelaus to the abduction of Helen by Paris. The fifth part is devoted to the preparation of an assault on Troy up to the gathering of the Achaeans in Aulis. The book reflects such mythological themes as the Calydonian hunt, the Theban campaigns of the Argives, the Oedipus cycle and Eriphyla's necklace and the last years of Theseus and others. All events, names of heroes and geographic names are taken from ancient sources. The interpretation of the motives of the characters' actions is the fruit of the author's inspiration. University of California Chronicle, 1922

The Mycenaeans Louise Schofield, 2007 For almost three thousand years the Mycenaeans, ancestors of the classical Greeks, lay lost and forgotten beneath the soil of Greece. In 1876, however, a German businessman, Heinrich Schliemann, in his search for the great Mycenaean king Agamemnon and other heroes of the Trojan War, made an astounding discovery in Mycenae: inside the monumental Lion Gate, he discovered shaft graves belonging to a warrior elite, many of whom were buried wearing striking gold funerary masks and armor. In this authoritative new survey, Schofield examines these initial discoveries and other material evidence from Mycenaean culture, including painted pottery, documents in Linear B script and the remains of fortress-palaces, all of which have yielded important information about the social hierarchies, religion and military and trading activities of this wealthy and sophisticated culture. The author also considers the factual basis for the Mycenaeans' legendary links with the Trojan War and the various explanations for the eventual decline of their civilization. The Complete Mycenaean Chronicle William Harwood,2005 The 1975 version including chapters omitted from the first published version of *The Mycenaean Chronicle* From Mycenae to Homer T. Webster,2014-06-11 This book first published in 1958 aims to describe Greek art and poetry within this ambiguous period of ancient history often referred to as the Greek Dark Ages and to explore the possibilities of learning about Mycenaean civilisation from its own documents and not only from archaeology Specifically Webster utilises Michael Ventris decipherment of Linear B in 1952 which proved that Greek was spoken in the Mycenaean world to determine the general contours of aesthetic development from Mycenae to the time of the written composition of the Homeric epics Because they record Mycenaean civilisation in Mycenaean terminology while Homer was writing in Ionian Greek at the beginning of the polis civilisation they show how much in Homer is in fact Mycenaean Further where it is clear that these Mycenaean elements cannot have survived until Homer s time they tell us something about the poetry which connected the two

Tel Dan in Its Northern Cultic Context Andrew R. Davis,2013-11-04 This work presents in detail a description of archaeological data from the Iron II temple complex at Tel Dan in northern Israel Davis analyzes the archaeological remains from the ninth and eighth centuries paying close attention to how the temple functioned as sacred space Correlating the archaeological data with biblical depictions of worship especially the textual strata of 1 Kings 18 and the book of Amos Davis argues that the temple was the site of official and family religion and that worship at the temple became increasingly centralized Tel Dan s role in helping reconstruct ancient Israelite religion especially distinctive religious traditions of the northern kingdom is also considered

Objects Untimely Graham Harman,Christopher Witmore,2023-03-21 Objects generate time time does not generate or change objects That is the central thesis of this book by the philosopher Graham Harman and the archaeologist Christopher Witmore who defend radical positions in their respective

fields Against a current and pervasive conviction that reality consists of an unceasing flux a view associated in philosophy with New Materialism object oriented ontology asserts that objects of all varieties are the bedrock of reality from which time emerges And against the narrative convictions of time as the course of historical events the objects and encounters associated with archaeology push back against the very temporal delimitations which defined the field and its objects ever since its professionalization in the nineteenth century In a study ranging from the ruins of ancient Corinth Mycenae and Troy to debates over time from Aristotle and al Ash ari through Henri Bergson and Alfred North Whitehead the authors draw on alternative conceptions of time as retroactive percolating topological cyclical and generational as consisting of countercurrents or of a surface tension between objects and their own qualities Objects Untimely invites us to reconsider the modern notion of objects as inert matter serving as a receptacle for human categories

Temples in Transformation Filip Čapek, 2023 The focus of this book is on temples in the Southern Levant during the Iron Age ca 1200 600 BC and their transformations In order to capture the long term context some significant sites with temples from the Late Bronze Age are also presented and discussed The author traces both material culture related to the temples and the way in which the same themes are treated in Old Testament texts concentrated primarily on Israel and Judah From the analysis of these texts he deduces a threefold transformation of the form of memory in relation to the temples and the cult The first concerns a contrastive reshaping Philistia and other neighbouring political entities the second an external Israel and the third an internal Judah silencing of the actual form of religious practice in the Iron Age

Aram and Israel during the Jehuiste Dynasty Shuichi Hasegawa, 2012-07-04 The Jehuiste Dynasty ruled more than ninety years 841 747 BCE in the Kingdom of Israel the longest dynasty in the history of the Northern Kingdom Under the five kings of the dynasty Israel was thrown into the arena of the regional political struggles and experienced the time of an unprecedented upheaval and then enjoyed great prosperity The Aramaeans under Hazael and Ben Hadad of Damascus and the Assyrians from the north Mesopotamia had great influence on the history of the dynasty This book is the result of a comprehensive and updated historical study on this significant dynasty By consulting all the available Assyrian Aramaic Hebrew and Moabite inscriptions and recent archaeological data this study radically evaluates the historical authenticity of the biblical text of 2 Kings and some parts of the Books of Amos and Hosea and integrates the results into the historical discussion The study reveals the great importance of this dynasty in the history of the Northern Kingdom as a turning point in its policy toward the Neo Assyrian Empire and will contribute toward understanding the history of Syria Palestine in the 9th 8th centuries BCE
