Points Of Light New Approaches To Ending Welfare Dependency:

Points of Light Tamar Ann Mehuron,1991-02-22 In the 1980s as the culture of poverty evolved into an intractable and often inherited condition for many people new ways of encouraging self sufficiency emerged The ten essays in this anthology survey a variety of approaches and programs Among the authors are Charles Murray Ken Auletta Gertrude Himmelfarb Lawrence Mead Nicholas Lemann and William Raspberry Money and the Age of Shakespeare: Essays in New Economic Criticism L. Woodbridge,2015-12-25 In this collection literary scholars theorists and historians deploy new economic techniques to illuminate English Renaissance literature in fresh ways Contributors variously explore poetry s precarious perch between gift and commodity the longing for family in *The Comedy of Errors* as symbolically expressing the alienating pressures of mercantilism Measure for Measure s representation of singlewomen and the feminization of poverty the collision between two views of money in a possible collaboration between Shakespeare and Middleton the cultural spread of an accounting mentality and quantitative thinking and money as it crosses the frontier between price and pricelessness and from early bodily injury insurance schemes to *The Merchant of Venice* **Think Tanks in America** Thomas Medvetz,2020-03-04 A revealing look at the rise of these influential institutions and the effect they ve had on the United States Think tanks have become fixtures of American politics supplying advice to presidents and policy makers expert testimony on Capitol Hill and convenient facts and figures to journalists and media specialists But what are think tanks Who funds them What kind of research do they produce Where does their authority come from And how influential have they become In *Think Tanks in America* Thomas Medvetz argues that the unsettling ambiguity of the think tank is less an accidental feature of its existence than the very key to its impact By combining elements of more established sources of public knowledge universities government agencies businesses and the media think tanks exert a tremendous amount of influence on the way citizens and lawmakers perceive the world unbound by the more clearly defined roles of those other institutions In the process they transform the government of this country the press and the political role of intellectuals Timely succinct and instructive this provocative book will force us to rethink our understanding of the drivers of political debate in the United States **The Work and the Gift** Scott Cutler Shershow,2005-06-15 Considers how in a wide range of western culture and thought the ideas of working and giving remain locked in a fatal dilemma each one representing the other s aspirations and absolute limit Ranging from Marx and Derrida to Friedrich Hayek and Alvin Toffler Scott Cutler Shershow here explores the predictions of political thinkers on both the left and the right that work is fundamentally changing or even disappearing the debates among anthropologists and historians about an archaic gift economy that preceded capitalism and might reemerge in its wake contemporary political battles over charity and social welfare and attempts by modern and postmodern artists to destabilize the work of art as we know it BOOKJACKET Does America Hate the Poor? John E. Tropman,1998-09-30 Tropman examines American values and the two groups that threaten those

values One might wonder why in the world's wealthiest society do the poor seem so stigmatized Tropman's answer is that they represent potential and actual fates that create anxiety within the dominant culture and within the actual poor themselves The response in society is hatred of the poor he contends and among the poor themselves self hatred Two groups of poor are analyzed The status poor those at the bottom of America's money deference power education or occupation and combinations of those The status poor embody the truth that in the land of opportunity not all succeed The elderly are the life cycle poor They are deficient of future and in the land of opportunity to have one's own life trajectory circumscribe hope is a condition that must be denied Poorhate is a classic example of blame the victim Tropman explores the process of poorhate through data from the 1960s and 1970s and he uses the past to illuminate the problems of the present and hopefully to assist in crafting a better future A provocative work for students and scholars of social welfare policy and policymakers themselves

Ancient Greece and American Conservatism John Bloxham, 2018-03-28 US conservatives have repeatedly turned to classical Greece for inspiration and rhetorical power In the 1950s they used Plato to defend moral absolutism in the 1960s it was Aristotle as a means to develop a uniquely conservative social science and then Thucydides helped to justify a more assertive foreign policy in the 1990s By tracing this phenomenon and analysing these and various other examples of selectivity subversion and adaptation within their broader social and political contexts John Bloxham here employs classical thought as a prism through which to explore competing strands in American conservatism From the early years of the Cold War to the 2003 invasion of Iraq Bloxham illuminates the depth of conservatives engagement with Greece the singular flexibility of Greek ideas and the varied and diverse ways that Greek thought has reinforced and invigorated conservatism This innovative work of reception studies offers a richer understanding of the American Right and is important reading for classicists modern US historians and political scientists alike **Back to Reform** Charles J. Dougherty, 1996 Back to Reform

is a persuasive discussion of the moral values that spurred the movement for health care reform and that remain insistent today The book is also a critique of exclusive reliance on marketplace reforms for improvements in health care By examining the values at the heart of the need for health care reform Dougherty displays the incompatibilities between these values and those related to the marketplace **IBSS: Political Science: 1991** British Library of Political and Economic Science, 1993

Program Evaluation Emil J. Posavac, Raymond G. Carey, 1997 Posavac and Carey provide a comprehensive but accessible introduction to the field of program evaluation By adopting a flexible philosophy of evaluation the authors

demonstrate how program evaluation can be applied to answer a wide variety of questions in many different settings. Enjoying widespread acceptance, Program Evaluation includes case studies of completed program evaluations and sketches of the careers of program evaluators to help readers develop an appreciation of the applicability of evaluation methods. By viewing program evaluation as a formalization of something that people do all the time and indeed find essential, the implicit threat of evaluation is reduced by the authors' approach. Posavac and Carey stress the importance of working with representatives of all groups affected by the program, whether they be program staff or managers, recipients or people providing financial or moral support. The Improvement Focused Model of Evaluation can be used to include many people in the evaluation process. The authors show that the application of program evaluation serves to contribute to making society more effective, just, and healthy.

A compelling compilation of short entries, longer topical essays, and primary source documents that chronicles the historical development of the United States from an economic perspective. Based on a work originally published in 2003, *The American Economy: A Historical Encyclopedia* has been thoroughly updated with information on the accounting scandals of the early 2000s and the recession of 2008, including the government stimulus and bailout programs and the recession's impact on key markets. With more than 600 short entries, 31 longer essays, and 32 primary source documents, the encyclopedia spans American history from colonial times to the present. Researchers will discover detailed information on people, events, and government actions that have shaped our economy, with entries on such seminal issues as slavery, migration patterns, the welfare state, the rise of the city, and the development of financial institutions. Throughout, special attention is paid to the interdependence of economics with political, social, and cultural forces. Covering everything from the national debt to monetary policy, law, unemployment, inflation, and government-business relations, this work is the ideal go-to resource for quick answers, in-depth analysis, or direction for further research.
