

Five Points of View: Analyzing James Bond Movies - Essay Sample Essay

Introduction

The Berger's focal points refer to an analysis of a work of art, in this case, films, based on five points of view. The views are the audience, the medium, artwork, the artists and the society. That enables the better understanding of the film, based on the five bases. In this case, there is an analysis of two James bond movies; from two different times (Berger, 2016). First, is the Dr No; which was produced in 1962, with the actor being Sean Connery. He was the main actor; where he was tasked with the responsibility of looking for a fellow agent that was abducted. The audience that is targeted by the film in general, because it is an investigative movie, and could thrill anyone. The medium that was used was mainly television because the other options had not been launched at that time. The artwork was in the form of a film because it supported by the technology state that that time. Regarding the artists, there were various in supporting roles such as Ursula Andress, Joseph Wiseman and Jack Lord. The society that was targeted mainly was American and the United Kingdom.

The other film that can be based on James Bond is Spectre, which is a 2015 film. The main actor is Daniel Craig; playing the role of James Bond. The audience that the film is meant for is diverse and can include anyone because the film is a thriller. The medium that was used is television, as well as other online streaming services; which increase the audience target by the film. Various artists played different roles; where they include Daniel Craig, Christophe Waltz, Lea Seydoux, Ben Whishaw, Naomie Harris and many others. The society that is targeted is also diverse; worldwide, but is majorly adults, because of the content. The audience by this movie is quite larger. That is compared to that of the film that came before it because of the advancement in technology. Considering artwork, the film is crime scene investigation; though the role of the fictional character James Bond played by Daniel Craig.

When the two movies are compared, various differences can be noticed. That is although they are the same type, and based on the same character. Their differences can be highlighted based on Berger's Focal Points (Berger, 2012). First, the significant difference is about the way through which the artwork is presented. The quality of the pictures and sound is different between the two movies. In Spectre, there is high-quality resolution. That enables the audience to enjoy the various aspects of the film better. That is because of the advancement in the technology that was used. As compared to Dr No, it has a comparatively lower quality of its artwork. Moreover, the audience is different. At the time when Spectre was produced, the audience was much broader (Thomas, 2009). That is supported by the various options that were available during the release. That includes television and online streaming services.

The other significant difference based on Berger's Focal Points is about the artists that were used to play various roles in the films. In Dr No, some fewer artists played significant roles. However, in Spectre, there are more artists; who star in various parts. That is enhanced by the better cash flows that are received by the industry, more than before. That puts them in a position where they can have more actors, owing to the increased audience and budget. Moreover, the impact on society is much broader, because of the larger audience that the film Spectre has. It has a worldwide audience

The Oxford Point of View , 1902 *Ludwig Wittgenstein - A Cultural Point of View* William J. DeAngelis, 2016-05-13

In the preface to his *Philosophical Investigations* Ludwig Wittgenstein expresses pessimism about the culture of his time and doubts as to whether his ideas would be understood in such a time. I make them public with doubtful feelings. It is not impossible that it should fall to the lot of this work in its poverty and in the darkness of this time to bring light into one brain or another but of course it is not likely. In this book William James DeAngelis develops a deeper understanding of Wittgenstein's remark and argues that it is an expression of a significant cultural component in Wittgenstein's later thought which while latent is very much intended. DeAngelis focuses on the fascinating connection between Wittgenstein and Oswald Spengler and in particular the acknowledged influence of Spengler's *Decline of the West*. His book shows in meticulous detail how Spengler's dark conception of an ongoing cultural decline resonated deeply for Wittgenstein and influenced his later work. In so doing the work takes into account discussions of these matters by major commentators such as Malcolm Von Wright, Cavell, Winch and Clack among others. A noteworthy feature of this book is its attempt to link Wittgenstein's cultural concerns with his views on religion and religious language. DeAngelis offers a fresh and original interpretation of the latter.

Experimental Social Psychology Chester A. Insko, John Schopler, 2013-09-03

Experimental Social Psychology: Text with Illustrative Readings represents a new approach to undergraduate social psychology by combining both text and readings. This book grew out of the authors' laborious and yet rewarding collaboration as associate editors of the *Journal of Experimental Social Psychology*. The book is organized into three parts that cover the three overlapping categories of social psychology: attitude and belief change, interpersonal processes, and small groups. The investigation of attitude and belief change typically involves the persuasive impact produced by a written or orally presented communication when directed at a person. The area of interpersonal processes typically involves two people; it puts greater emphasis upon the interactive nature of social relations and is not restricted to just certain effects such as attitude or belief change. The study of interpersonal processes includes person perception, interpersonal attraction, conformity, conflict resolution, norm formation, etc. The area of small groups includes the study of groups varying in size between two and the number beyond which face-to-face interaction among all the members does not or cannot easily occur. Included within this category is the study of leadership, status, group decision making, etc.

Monetarist Perspectives David E. W. Laidler,1982 Here is a clear and thoughtful introduction to the current literature of monetary economics and macroeconomics The book s central theme is a view of the macroeconomy in which recession and inflation are to be interpreted as the result of the economy adjusting to a discrepancy between the quantity of money supplied and the quantity of money demanded with the latter quantity being determined by a stable aggregate demand function The author discusses in turn the place of monetarism in macroeconomics its implications for the interpretation of the short run demand for money function its relationship to equilibrium business cycle theory the disequilibrium transmission mechanism that underlies the monetarist viewpoint and finally its implications for the policy of eoegradualism e He synthesizes a large body of theoretical and empirical literature and his empirical observations are broadly based on the experiences of England and Australia as well as Canada and the United States Each chapter can be read apart from the others and Laidler has taken particular care to keep the technical level of exposition low without sacrificing much in the way of theoretical sophistication *Encyclopedia of the American Short Story* Abby H.
