Poison Dieter Martinetz, Karlheinz Lohs, 1987 *The A to Z of Nuclear, Biological and Chemical Warfare* Benjamin C. Garrett, John Mason Hart, 2009-09-16 Human experience with nuclear biological and chemical NBC warfare has been limited especially in comparison to conventional forms of warfare Our experience with nuclear warfare is confined to a period of less than one week during the end of World War II when the United States successfully used two nuclear weapons against targets in Japan The course of biological warfare and modern use of biological weapons are difficult to track owing to the difficulty of differentiating deliberate use from natural outbreaks However the keen potential of biological weapons in acts of terror was shown in the mass disruption caused in the fall 2001 experience in the U S with the release of anthrax through the American postal system Chemical weapons have been used in a handful of conflicts since their introduction to modern warfare during World War I most recently during the Iran Iraq War during the 1980s Despite this limited experience NBC warfare continues to exert a certain fascination among states The A to Z of Nuclear Biological and Chemical Warfare covers the development and use of NBC weapons as well as efforts to limit or control the use of these weapons through a chronology a bibliography an introductory essay and dictionary entries Over 500 cross referenced dictionary entries provide a unique selection of terms related to NBC warfare ranging from basic descriptions of substances used in NBC warfare to details on incidents and episodes where NBC weapons were used Entries are structured around historical events persons important to NBC warfare countries where such weapons have been developed or used and international treaties and treaty related organizations

Garrett, John Mason Hart, 2007-07-19 Human experience with nuclear biological and chemical NBC warfare has been limited especially in comparison to conventional forms of warfare Our experience with nuclear warfare is confined to a period of less than one week during the end of World War II when the United States successfully used two nuclear weapons against targets in Japan The course of biological warfare and modern use of biological weapons are difficult to track owing to the difficulty of differentiating deliberate use from natural outbreaks However the keen potential of biological weapons in acts of terror was

shown in the mass disruption caused in the fall 2001 experience in the U S with the release of anthrax through the American postal system Chemical weapons have been used in a handful of conflicts since their introduction to modern warfare during World War I most recently during the Iran Iraq War during the 1980s Despite this limited experience NBC warfare continues to exert a certain fascination among states The Historical Dictionary of Nuclear Biological and Chemical Warfare covers the development and use of NBC weapons as well as efforts to limit or control the use of these weapons through a chronology a bibliography an introductory essay and dictionary entries Over 500 cross referenced dictionary entries provide a unique selection of terms related to NBC warfare ranging from basic descriptions of substances used in NBC warfare to details on incidents and episodes where NBC weapons were used Entries are structured around historical events persons important to NBC warfare countries where such weapons have been developed or used and international treaties and treaty related organizations

rites the meaning of which is no longer understood Only harmlessness and brotherhood in thought and deed coupled with non resistance to evil can shield us from evil Real protection comes from personal merit and virtue not from talismans Nought is permitted to the virtuous man Love above all in a woman is a veritable hallucination for want of a prudent motive it will frequently select an absurd one Cyanide when not lethal will enfeeble the mind already poisoned by an evil will Stay clear of bitter almonds as well as the kernels of apricot peach and cherry almond flavour extracts such as Amaretto almond milk soaps and perfumes Datura stramonium and other hallucinogens Tobacco by smoking or otherwise is a dangerous and stupefying philtre and brain poison Nicotine is not less deadly than cyanide Moreover the latter is present in tobacco in larger quantities than in bitter almonds But the most terrific of all philtres is the exaltation of misdirected devotion By fuelling the imagination excessive fear becomes a self fulfilling prophecy Goodness is much stronger than evil Rise then above childish fears and dumb desires Stamp out evil influence by controlling unbridled imagination and fanciful speculation Believe in supreme wisdom for true wisdom cannot ensnare your intelligence Poisons can may make you ill but never immoral Weakness sympathises with vice because vice itself is a weakness that assumes the mask of strength Madness holds reason in horror and delights in the exaggerations of falsehood Every human being whether magus or not should oppose violence by mildness chastise evil by good cruelty by tenderness There can be nothing more dangerous than to make magic a pastime or part of an evening s entertainment Magnetic experiments performed under such conditions can only exhaust the subjects mislead opinions and defeat science The milder and calmer you are the more effective will be your anger the more energetic you are the more precious will be your forbearance the more skilful you are the better will you profit by your intelligence and even by your virtues the more indifferent you are the more easily will you make yourself loved Excessive love produces antipathy blind hate counteracts and scourges itself vanity leads to abasement and the most cruel humiliations Remember that the magus is sovereign and a sovereign never avenges because he has the right to punish in the exercise of this right he performs his duty and is implacable as justice The way to see clearly is not to be always looking and he who spends his whole life upon a single object will not attain it Ceremonies are methods to create a habit of will however redundant when the habit is firmly established We will now expose and stigmatise some of the most abhorrent acts What sorcerers seek above all in their evocations of the impure spirit is that magnetic power which is the possession of the true adept so that they can shamefully abuse it Providence seems to scorn those who despise the martyrs and to slay those who would deprive them of life The terrible menace of hell inflicted by Christianity upon its flock has created more nightmares more nameless diseases more furious madness than all vices and excesses combined That is what the Hermetic artists of the middle ages represented by the incredible and unheard of monsters which they carved at the doors of basilicas Moral equilibrium rests upon the immutable distinction between true and false good and bad one must place himself by his works in the empire of truth and goodness or relapse eternally like the rock of Sisyphus into a pandemonium of falsehood and evil

Wash carefully your clothes before giving them away In times of epidemic the terror struck are the first to be attacked The secret of not fearing evil is to ignore it altogether The wise men have scarcely any sorceries to fear save those of fortune but when called upon to advise they must persuade the bewitched to do some act of goodness to his bewitcher to render him some service which he cannot refuse and lead him to the communion of salt The chemist imitates nature the alchemist surpasses nature herself Chemistry decomposes and recombines material substances it purifies simple substances of foreign elements but leaves the primitive elements unchanged Alchemy changes the character of things and raises them up into higher states of existence As all the powers of the universe are potentially contained in us our body and its organs are the representatives of the powers of nature and a constellation of the same powers that formed the stars in the sky
