Poland's Politics Adam Bromke,1967 Communist Eastern Europe; Analytical Survey of Literature United States. Department of the Army,1971 Individualism and the Rise of Democracy in Poland Tomek Grabowski,2023 This book investigates the long term preconditions of lasting and successful democratization It counters conventional wisdom that they are a matter of proper institutional design or that the political culture of democracy is a by product of modernizing economic change Instead it argues that achieving lasting democracy is difficult without a prior breakthrough to individualism a system of beliefs centered on the belief in one s inner worth and in one s inner capacity for judgment The rise of an individualist belief system that is widely proliferated in society requires social conditions that are in turn hard to meet including a widespread breakdown of traditional culture a frontier experience and a process of civic nation building The book s empirical focus Poland demonstrates the logic of the individuation process in a condensed form Poland s road to individualism and with it to democracy consisted of a catastrophic uprooting of broad segments of society in the aftermath of World War II the rise of a frontier environment in the Western Territories acquired from Germany and an unlikely emergence of the Catholic Church as a civic nation builder in these Territories in the 1960s and the 1970s However the Polish case is not unique and the book offers an analytical approach that could successfully be brought to bear on other cases of democratization both past and present

reconsideration of the relation between religion and modernity Jose Casanova surveys the roles that religions may play in the public sphere of modern societies During the 1980s religious traditions around the world from Islamic fundamentalism to Catholic liberation theology began making their way often forcefully out of the private sphere and into public life causing the deprivatization of religion in contemporary life No longer content merely to administer pastoral care to individual souls

religious institutions are challenging dominant political and social forces raising questions about the claims of entities such as nations and markets to be value neutral and straining the traditional connections of private and public morality Casanova looks at five cases from two religious traditions Catholicism and Protestantism in four countries Spain Poland Brazil and the United States These cases challenge postwar and indeed post Enlightenment assumptions about the role of modernity and secularization in religious movements throughout the world This book expands our understanding of the increasingly significant role religion plays in the ongoing construction of the modern world
