Desertification and Risk Analysis Using High and Medium Resolution Satellite Data Alberto Marini, Mohamed Talbi, 2008-11-27 This work becomes with methodological rigor a part of the innovative proposals for the characterization of the areas at risk of desertification The complexity of the phenomenon of desertification which involves extended surfaces in all continents is one of the most alarming processes of the environmental degradation of our Planet and threatens the health and the living

conditions of over a billion of persons The food crisis in continuous increase ask for the world of research to urgently supply reassuring solutions concerning the acquisition of indicators which are easy to monitor and concur to control the phenomenon in order to fight its acceleration The constant but different combination that determines the diffusion of desertification in the territories attributable mostly to climatic changes and the activities of the man makes our job challenging and complicated since it varies from region to region We are aware of all this and therefore we think that the methodological approach of survey of the data is an extremely important element to locate of the phenomenon and to monitor its course This work which is characterized for its multi disciplinary approach suggests solutions that we wish will quickly find concrete applications at international level Prof Bruno Dettori President CNLSD Comitato Nazionale per la Lotta alla Siccità e alla Desertificazione v Baffin Island Mark Synnott,2011-02-01 Complete with maps and an invaluable trip planning section detailing the information needed to make your trip an unforgettable success Baffin Island is the first comprehensive adventure guide to the fifth largest island in the world which is quickly becoming known as a premiere destination for climbers skiers trekkers and adventure travellers alike **1997 American Alpine Journal** ,
