**Artifact** Obed Frausto,2023-02-06 In the nineteenth century French and Mexican intellectuals had a common interest in providing a groundwork for educating better citizens in response to social crises There were political and philosophical controversies regarding science and technology in this environment between spiritualists humanists and positivists scientists Power and knowledge were intertwined in these controversies Another objective of the book is to show that controversies can be seen as a dispute between two cultures between those in favor of science and technology and those in favor of philosophy and the humanities Their continuous arguments articulated a third culture based on an intertwining of power and knowledge This articulation had an implicit dimension in which philosophy science and technology had to interact to enrich the political potential of the human experience of thinking They were able to grasp a mix or a synthesis that conceptualized the power of a metaphysical artifact in which philosophy science and technology belong to the same culture where politics helps invite dialogue between different cultural religious and political perspectives      **National Narratives in Mexico** Enrique

Florescano,2006 If history is written by the victors then as the rulers of a nation change so too does the history Mexico has had many distinct periods of history demonstrating clearly that the tale changes with the writer In National Narratives in Mexico Enrique Florescano examines each historical vision of Mexico as it was interpreted in its own time revealing the influences of national or ethnic identity culture and evolving concepts of history and national memory Florescano shows how the image of Mexico today is deeply rooted in ideas of past Mexicos ancient Mexico colonial Mexico revolutionary Mexico and how these ideas can be more fully understood by examining Mexico s past historians An awareness of the historian s cultural perspective helps us to understand which types of evidence would be considered valid in constructing a national narrative These considerations are important in modern Mexican historiography as historians begin to question the validity of Mexico s collective memory Enhanced by more than two hundred drawings photographs and maps National Narratives in Mexico offers a new vision of Mexico s turbulent history

Muy pronto los frailes se percataron de que ese medio para que tuviera respuestas no podía ser unilateral es decir solo europeo sino que tenía que incorporar el universo americano. Primero en sus formas, gustos y colores después con el surgimiento y crecimiento de las ciudades a mediados del siglo XVI fue incorporando la conciencia de la existencia de una nueva tierra con hombres diferentes a los de España.

Pluralismo epistemológico, interdisciplina y diversidad cultural.

Homenaje a León Olivé Mónica Gómez Salazar, 2025-01-21 León Olivé defendió un pluralismo ontológico y epistemológico según el cual no existe un criterio de decisión independiente de los contextos, creencias, prácticas sociales, necesidades, deseos, fines, normas y valores en relación con los cuales las personas se constituyen en quienes son. Dicha tesis fue fundamental para posteriormente sostener una noción de equidad epistémica según la cual existen diferentes tipos de conocimiento entre los que se cuentan los científicos tecnológicos y los tradicionales. Este libro se edita desde una visión plural, intercultural e interdisciplinaria como un homenaje póstumo al investigador León Olivé.

**De la vida y trabajos ,2005**   A Companion to Global Historical Thought Prasenjit Duara,Viren Murthy,Andrew Sartori,2014-01-21 A COMPANION TO GLOBAL HISTORICAL THOUGHT A Companion to Global Historical Thought provides an overview of the development of historical thinking from the earliest times to the present directly addressing issues of historiography in a globalized context Questions concerning the global dissemination of historical writing and the relationship between

historiography and other ways of representing the past have become important not only in the academic study of history but also in public arenas in many countries. With contributions from leading international scholars the book considers the problem of the global in the multiplicity of traditions of narrating the past in the global dissemination of modern historical writing and of the global as a concept animating historical imaginations. It explores the different intellectual approaches that have shaped the discipline of history and the challenges posed by modernity and globalization while illustrating the shifts in thinking about time and the emergence of historical thought. Complementing A Companion to Western Historical Thought this book places non Western perspectives on historiography at the center of discussion helping scholars and students alike make sense of the discipline at the start of the twenty first century. [Literatura de la Independencia, independencia de la literatura](#) Katja Carrillo Zeiter, 2021-06-23 Los artículos reunidos en este volumen abarcan no sólo preguntas sobre la formación de una comunidad literaria a través de prácticas editoriales de tradiciones y de definiciones de literatura sino que también reflexionan sobre las estrategias para construir un repertorio temático. [Comparative Studies in Asian and Latin American Philosophies](#) Stephanie Rivera Berruz, Leah Kalmanson, 2018-04-05 Comparative philosophy is an important site for the study of non Western philosophical traditions but it has long been associated with East West dialogue. Comparative Studies in Asian and Latin American Philosophies shifts this trajectory to focus on cross cultural conversations across Asia and Latin America. A team of international contributors discuss subjects ranging from Orientalism in early Latin American studies of Asian thought to liberatory politics in today's globalized world. They bring together resources including Latin American feminism, Aztec teachings on ethics, Buddhist critiques of essentialism and Confucian morality. Chapters address topics such as educational reform, the social practices surrounding breastfeeding, martial arts as political resistance and the construction of race and identity. Together the essays reflect the philosophical diversity of Asia and Latin America while foregrounding their shared concerns on issues of Eurocentrism and coloniality. By bringing these critical perspectives to bear on the theories and methods of cross cultural philosophy Comparative Studies in Asian and Latin American Philosophies offers new insights into the nature and practice of philosophical comparison.
